Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. The Interview: Q. Is there anything about this job that you feel you might not be very good at? A. Dealing with people. Q. What person, living or dead, would you most like to meet? A. The living one.

Ford Tractor Story Stuart Gibbard 1998 In 1964 Ford replaced its separate British and American tractor lines with the new 6X range, a "worldwide" family of tractors designed for manufacture in Basildon, Antwerp and the USA. It marked the beginning of an exciting new period in the history of Ford tractors. The next 30 years saw a host of new models and features as the line expanded and evolved towards the machines of the late 1990s with their computer-age technology. It was also a time during which Ford's agricultural business grew into an organization of global proportions, taking over both the New Holland and Versatile equipment companies. In 1994, Fiat acquired Ford's agricultural machinery interests and merged them with Fiatagri to form a new company under the New Holland name. In the late 1990s, New Holland is the leading manufacturer in Europe and many of the World's markets. In this book, the companion to the first part, the author gives an account of all the main Ford and New Holland models as well as the company changes and the personalities involved. It provides a comprehensive resource on this period of tractor history.

Restructuring Education Through Technology Theodore Wayne Frick 1991 This paper examines the role of technology in restructuring education by analyzing how it influences seven important relationships in the educative process: (1) teacher-student relationships; (2) student-content relationships; (3) teacher-content relationships; (4) student-context relationships; (5) teacher-context relationships; (6) content-context relationships; and (7) educational system-environment relationships. After a brief historical overview of the uses of technology in education, the paper discusses the nature of systems in education and examines the process of restructuring through systems change in the seven pairs of relationships as they exist today and as they might change in a restructured educational system. How educational technology can empower teachers and students is then discussed with emphasis on how electronic technology is transforming the way information is communicated and processed. A brief discussion of the role of the teacher in evaluating the worth of content--i.e., selecting the best of culture for sharing with students--concludes the report. (ALF)
