**The Subversion of**

**Christianity** Jacques Ellul  
2011-06-02 Pointing to the many contradictions between the Bible and the practice of the church, Jacques Ellul asserts in this provocative and stimulating book that what we today call Christianity is actually far removed from the revelation of God. Successive generations have reinterpreted Scripture and modeled it after their own cultures, thus moving society further from the truth of the original gospel. The church also perverted the gospel message, for instead of simply doing away with pagan practice and belief, it reconstituted the sacred, set up its own religious forms, and thus resacralized the world. Ellul develops several areas in which this perversion is most obvious, including the church's emphasis on moralism and its teaching in the political sphere. The heart of the problem, he says, is that we have not

accepted the fact that Christianity is a scandal; we attempt to make it acceptable and easy--and thus pervert its true message. Ultimately, however, Ellul remains hopeful. For, in spite of all that has been done to subvert the message of God, the Holy Spirit continues to move in the world. Christianity, writes Ellul, never carries the day decisively against Christ.

### Philosophy for Non-

Philosophers Louis Althusser 2017-02-23 In 1980, at the end of the most intensely political period of his work and life, Louis Althusser penned *Philosophy for Non-philosophers*. Available here for the first time in English, *Philosophy for Non-philosophers* constitutes a rigorous and engaged attempt to address a wide reading public unfamiliar with Althusser's project. As such, the work is a concentration of the most fundamental theses of Althusser's own ideas, and presents a synthesis of his sprawling and disparate philosophical and political

writings. Nowhere else does Althusser push the distinction between philosophy and other disciplines as far, or develop in such detail the concept of 'practice'. Rather than a work of 'popular philosophy', *Philosophy for Non-philosophers* is a continuation and conglomeration of Althusser's thought; a thought whose radicality is still perceptible in those that have followed since. *Philosophy for Non-philosophers* thus provides a vivid encapsulation of Althusser's seminal influence on the leading thinkers of today, including Ranciere, Badiou, Balibar, and Žižek.

**Visions of Cell Biology** Karl S. Matlin 2018-01-19 Although modern cell biology is often considered to have arisen following World War II in tandem with certain technological and methodological advances—in particular, the electron microscope and cell fractionation—its origins actually date to the 1830s and the development of cytology, the scientific study of cells. By

1924, with the publication of Edmund Vincent Cowdry's *General Cytology*, the discipline had stretched beyond the bounds of purely microscopic observation to include the chemical, physical, and genetic analysis of cells. Inspired by Cowdry's classic, watershed work, this book collects contributions from cell biologists, historians, and philosophers of science to explore the history and current status of cell biology. Despite extraordinary advances in describing both the structure and function of cells, cell biology tends to be overshadowed by molecular biology, a field that developed contemporaneously. This book remedies that unjust disparity through an investigation of cell biology's evolution and its role in pushing forward the boundaries of biological understanding. Contributors show that modern concepts of cell organization, mechanistic explanations, epigenetics, molecular thinking, and even computational approaches all can be placed on the

continuum of cell studies from cytology to cell biology and beyond. The first book in the series *Convening Science: Discovery at the Marine Biological Laboratory*, *Visions of Cell Biology* sheds new light on a century of cellular discovery.

impact on Canadian history. The book is a must-read for anyone interested in the history of Canada and its exploration. **Painted Bodies** Carol Beckwith 2012-09-18 The seminal volume on body painting and adornment by the world's preeminent photographers of African

culture. Following the international masterpiece *Africa Adorned*, Carol Beckwith and Angela Fisher have focused on the traditions of body painting spanning the vastly unique cultures of the African continent. In a contemporary world so fascinated with tattoos and piercings, Beckwith and Fisher document the origins of these fashionable adornments as passed down through African tribal culture. Featured are portraits of the richly colored, detailed, and exquisite body paintings of the Surma, Karo, Maasai, Himba, and Hamar peoples, among others. Drawing from expeditions in the field and firsthand experiences with African peoples and cultures over the past thirty years and with more than 250 spectacular photographs, this is the definitive work on the expressiveness and imagination of African cultural painting of the human body.

*Still Life in Ditch* Fausto Paravidino 2013 Drama. Translated from the Italian by

Ilaria Papini. Building on a classic noir premise--the discovery of an unidentified dead girl, dumped on the side of a road--Fausto Paravidino's **STILL LIFE IN DITCH**, masterfully translated by Ilaria Papini, creates something boldly original: a riveting murder mystery constructed entirely of vivid monologues. As the plot unfolds through the intricate interplay of voices, we are not only swept towards a powerhouse climax but--even more impressively--taken deep into the minds of a half-dozen living, breathing unforgettable characters.--Harold Schechter

DIVDIVWhen two students are found dead in their small Florida hometown, an aging brother and sister are forced to confront their own dark past while on the hunt for a murderer/divDIV As a successful news photographer, Francis Brimm has lived a life

of adventure, traveling the world and accumulating little baggage--either material or personal. Now nearing retirement, he has decided to move back to his Florida hometown, where his sister, Muriel, by her own admission, has led a much less fulfilling existence. As children of an alcoholic father and an icy, withholding mother, the siblings have found that the wounds of childhood remain well into adulthood. The scars of their past come into stark relief when Francis and Muriel find the bones of two children, both students of the nearby school for the blind. In the search for the killer, they are both forced to reexamine the long-ago trauma that shaped their lives./divDIV Suspenseful and psychologically astute, **School for the Blind** is a masterwork of literary fiction by bestselling author Dennis McFarland./divDIV/div/div [The New Materialism](#) Geoff Pfeifer 2015-02-11 Alain Badiou and Slavoj Žižek have become two of the dominant voices in contemporary

philosophy and critical theory. In this book, Geoff Pfeifer offers an in-depth look at their respective views. Using Louis Althusser's materialism as a starting point—which, as Pfeifer shows, was built partially as a response to the Marxism of the Parti Communiste Français and partially in dialogue with other philosophical movements and intellectual currents of its times—the book looks at the differing ways in which both Badiou's and Žižek's work attempt to respond to issues that arise within the Althusserian edifice. Pfeifer argues here that, ultimately, Žižek's materialism succeeds in responding to these issues in ways that Badiou's does not. In building this argument, Pfeifer engages not only with the work of Althusser, Badiou, and Žižek and their intellectual backgrounds, but also with much of the contemporary scholarship surrounding these thinkers. As such, Pfeifer's book is an important addition to the ongoing debates within contemporary critical theory.

**John Waters** James Egan  
2011-09-13 The films of John Waters (b. 1946) are some of the most powerful send-ups of conventional film forms and expectations since Luis Bu-uel and Salvador Dali's *Un Chien Andalou*. In attempting to reinvigorate the experience of movie-going with his shock comedy, Waters has been willing to take the chance of offending nearly everyone. His characters have great dignity and resourcefulness, taking what's different or unacceptable or grotesque about themselves, heightening it and turning it into a handmade personal style. The interviews collected here span Waters's career from 1965 to 2010 and include a new one exclusive to this edition. Waters began making films in his hometown of Baltimore in 1964. Demonstrating an innate talent at capturing the hideous and crude and elevating it to art, he reached international acclaim with his outrageous shock comedy *Pink Flamingos*. This landmark film redefined cinema and became a cult

classic. Appearing in this and many of Waters's early films, his star Divine would consistently challenge gender definitions. With Polyester, Waters entered the mainstream. The film starred Divine as an unhappy housewife who romances a former teen idol played by Tab Hunter. Waters's commercial breakthrough, Hairspray, told the story of Baltimore's televised sock-hop program, The Corny Collins Show, and how one brave girl (Ricki Lake) used her platform as a dancer to end segregation in her town. From Serial Mom and Pecker to Cecil B. Demented, Waters continued to infiltrate the mainstream with his unique approach to filmmaking. As a visual artist, he was given a retrospective at the New Museum of Contemporary Art in 2004, which was shown at galleries around the world.

Louis Althusser and the Traditions of French Marxism William Lewis 2005-10-17

Throughout the course of the twentieth century communism has enjoyed direct competition with all other governmental and economic systems. Often, communist countries produced their own special brand of party intellectual. These

figures rightly occupied their place within their own national context and within the context of the International. Some communist intellectuals, through the high level of erudition exhibited in their writing, have received a wider reception, despite their direct linkage to party politics e.g. Antonio Gramsci, Georg Lukacs, and, Victor Serge are good examples. After 1956, when Khrushchev exposed Stalin's atrocities to the Twentieth Congress of the Communist Party of the Soviet Union and, as a result, to the entire world, Marxist philosophy was widely discredited. It had been assumed that Stalin's excesses were somehow encouraged or supported through Marx's thought. When, in the mid 1960s, Louis Althusser first offered his re-readings of Marx's philosophy it, and communist political practice, were in ruin. However Althusser was in a unique cultural and historical position. Thinking and writing concomitant with the

structuralists and poststructuralists in France and also having access to certain theoretical tools while, simultaneously, committing himself entirely to Marxist thought-Althusser was, conceivably the last of his tradition. He was a Marxist philosopher who, unlike Sartre at the end of his life, did not abandon communism to, for instance existentialism. In Louis Althusser and the Traditions of French Marxism William Lewis gives readers a striking example of intellectual biography and critical theory. His approach, considering the work and life of Althusser within French Marxism and French intellectual culture, fills a void in contemporary scholarship. But, much more importantly, Lewis is able to show how Althusser's thought is the result of and a response to specific French intellectual and political traditions of reading Marx. It is through this combination of concerns that Louis Althusser and the Traditions of French Marxism offers us a contemporary and

poignant Althusser whose ideas, under the weight of Lewis's pen, can help us better understand what resources it may hold for philosophy, political thought, and cultural thought today.

**The Organization of Science and Technology in France**

**1808-1914** Robert Fox

2008-12-11 The papers in this volume represent the first attempt at a coherent analysis of the institutional structure of French science and technology in the nineteenth century. They treat both research and education and cover the main developments in the period from the establishment of the Napoleonic University in 1808 to the outbreak of the First World War. The papers reflect the intense interest in the social history of French science since the Revolution and convey a vivid impression of different modes of thought in a particularly active field of research. The contributions stress and develop more clearly than in any previous study, the theme of structural change in a complex interlocking network of institutions. Far from being an unresponsive monolith, France's system of scientific research and education proved

capable of significant modification and expansion, especially in the later nineteenth century. To an extent that has not been fully recognised by historians, the French did respond to the changing demands of an industrialising economy and to the intellectual, economic and political challenge of the new Germany - a point that needs to be taken into account in discussions of the supposed decline of French science in the nineteenth century.

*Frontiers of Fundamental Physics* M. Barone 2012-12-06  
The Olympia conference Frontiers of Fundamental Physics was a gathering of about hundred scientists who carry on their research in conceptually important areas of physical science (they do "fundamental physics"). Most of them were physicists, but also historians and philosophers of science were well represented. An important fraction of the participants could be considered "heretical"

because they disagreed with the validity of one or several fundamental assumptions of modern physics. Common to all participants was an excellent scientific level coupled with a remarkable intellectual honesty: we are proud to present to the readers this certainly unique book.

Alternative ways of considering fundamental matters should of course be vitally important for the progress of science, unless one wanted to admit that physics at the end of the XXth century has already obtained the final truth, a very unlikely possibility even if one accepted the doubtful idea of the existence of a "final" truth. The merits of the Olympia conference should therefore not be judged a priori in a positive or in a negative way depending on one's refusal or acceptance, respectively, but considered after reading the actual of basic principles of contemporary science, new proposals and evidences there presented. They seem very important to us.

*Les catégories et leur histoire*

Otto Bruun 2005 Le livre d'Aristote, les Categories, fut pendant longtemps le premier texte lu par ceux qui étudiaient la philosophie, ainsi que le texte de base pour la logique et la métaphysique occidentales. Aucun autre ouvrage n'a eu une influence comparable sur l'histoire de la philosophie: Plotin, Porphyre, Boèce, les Pères de l'Église, les logiciens byzantins, arabes, latins... tous ont commenté cette théorie des catégories. C'est dans le but de proposer une étude exhaustive de cette longue tradition, autant que dans sa continuité, qu'un Colloque a été organisé sous la direction de J. Barnes et A. de Libera, Les Categories entre l'Antiquité et le Moyen Âge dans les traditions grecque, latine et orientale. Le présent volume en publie les actes, enrichis d'une longue introduction de J. Barnes, et qui esquissent l'histoire des Categories d'Aristote et de la théorie aristotélicienne des catégories.

Conflict in the Southern Cone

George Rauch 1999-07-30 In examining the history of a 19th-century boundary dispute between Chile and Argentina, Dr. Rauch offers insights into the motivations and processes of governments vis-à-vis the rationale and support of national military power. As he shows, a military establishment brings enormous costs to developing economies, leads to the formation of military elites, and has profound implications for a geographical region. Following a discussion of Spanish colonization in the southern cone of Latin America, Rauch moves to the intercountry dispute; each country's search for allies;

internal development  
difficulties; economic progress  
and military investment;  
internal development of the  
armed forces in each country;  
and their relative prowess,  
which ultimately resulted in  
Argentina's armed forces being  
the best trained and equipped  
in the region. Of considerable  
interest to scholars and  
researchers of Latin American,  
military, and developmental  
studies.
