## Oeuvres Courtes

*The Equality of the Human Races* Joseph-Anténor Firmin 2002 "This is the first paperback edition of the only English-language translation of the Haitian scholar Antnor Firmin's *The Equality of the Human Races*, a foundational text in critical anthropology first published in 1885 when anthropology was just emerging as a specialized field of study. Marginalized for its "radical" position that the human races were equal, Firmin's lucid and persuasive treatise was decades ahead of its time. Arguing that the equality of the races could be demonstrated through a positivist scientific approach, Firmin challenged racist writings and the dominant views of the day. Translated by Asselin Charles and framed by Carolyn Fluehr-Lobban's substantial introduction, this rediscovered text is an

important contribution to contemporary scholarship in anthropology, pan-African studies, and colonial and postcolonial studies."

**Colony and Mother City in Ancient Greece** A. J. Graham 1999 COLONY AND MOTHER CITY IN ANCIENT GREECE by A. B. GRAHAM. Preface: The first part of the book is to a description of Greek and tices

regarding the actual founding of a colony, about which there appear to have been general fixed principles. He then goes on to consider the subsequent relations between the colony its mother city. The author discusses the general principles which links were formed between city and colony, involving such questions as mutual citizenship and religious connections. He also considers the variations found in the relationships caused by such factors as distance and the power and ambitions of the mother city. As a synthesis which presents and discusses material widely spread in place and time, much of it previously accessible only to specialists, this book should become both the standard general treatment of the subject and the basis for future studies of this aspect of Greek colonization. *The Atheist's Bible: Diderot's 'Éléments de physiologie'*

Caroline Warman 2020-11-16

'Love is harder to explain than hunger, for a piece of fruit does not feel the desire to be eaten':

Denis Diderot's *Éléments de physiologie* presents a world in flux, turning on the

relationship between man,

matter and mind. In this late work, Diderot delves playfully into the relationship between

bodily sensation, emotion and perception, and asks his

readers what it means to be human in the absence of a soul.

*The Atheist's Bible* challenges prevailing scholarly views on Diderot's *Éléments*, asserting

its contemporary philosophical importance, and prompting its readers to inspect more closely

this little-known and little-studied work. In this timely

volume, Warman establishes

the place of Diderot's *Éléments*

in the trajectory of materialist

theories of nature and the mind

stretching back to Epicurus

and Lucretius, and explores the

fascinating reasons behind

scholarly neglect of this

seminal work. In turn, Warman

outlines the hitherto

unacknowledged dissemination

and reception of Diderot's

*Éléments*, demonstrating how

Diderot's *Éléments* was

circulated in manuscript-form

as early as the 1790s, thus

showing how the text came to

influence the next generations

of materialist thinkers. This

book is accompanied by a

digital edition of Jacques-André

Naigeon's *Mémoires*

*historiques et philosophiques*

*sur la vie et les ouvrages de*

Denis Diderot (1823), a work

which, Warman argues,

represents the first publication

of Diderot's *Éléments*, long

before its official publication

date of 1875. The Atheist's Bible constitutes a major contribution to the field of Diderot studies, and will be of further interest to scholars and students of materialist natural philosophy in the Age of Enlightenment and beyond.

### **The Afterlives of the Terror**

Ronen Steinberg 2019-09-15

The Afterlives of the Terror explores how those who experienced the mass violence of the French Revolution struggled to come to terms with it. Focusing on the Reign of Terror, Ronen Steinberg challenges the presumption that its aftermath was characterized by silence and enforced collective amnesia. Instead, he shows that there were painful, complex, and sometimes surprisingly honest debates about how to deal with its legacies. As The Afterlives of the Terror shows, revolutionary leaders, victims' families, and ordinary citizens argued about accountability, retribution, redress, and commemoration. Drawing on the concept of transitional justice and the scholarship on

the major traumas of the twentieth century, Steinberg explores how the French tried, but ultimately failed, to leave this difficult past behind. He argues that it was the same democratizing, radicalizing dynamic that led to the violence of the Terror, which also gave rise to an unprecedented interrogation of how society is affected by events of enormous brutality. In this sense, the modern question of what to do with difficult pasts is one of the unanticipated consequences of the eighteenth century's age of democratic revolutions. Thanks to generous funding from Michigan State University and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes, available on the Cornell University Press website and other Open Access repositories.

*Africa from the Sixteenth to the Eighteenth Century* Bethwell A.

Ogot 1992 The result of years of work by scholars from all

over the world, The UNESCO

General History of Africa

reflects how the different

peoples of Africa view their

civilizations and shows the

historical relationships

between the various parts of

the continent. Historical

connections with other

continents demonstrate

Africa's contribution to the

development of human

civilization. Each volume is

lavishly illustrated and

contains a comprehensive

bibliography. This fifth volume

of the acclaimed series covers

the history of the continent

from the beginning of the

sixteenth century to the close

of the eighteenth century in

which two themes emerge:

first, the continuing internal

evolution of the states and

cultures of Africa during this period second, the increasing involvement of Africa in external trade--with major but unforeseen consequences for the whole world. In North Africa, we see the Ottomans conquer Egypt. South of the Sahara, some of the larger, older states collapse, and new power bases emerge.

Traditional religions continue to coexist with both

Christianity (suffering

setbacks) and Islam (in the

ascendancy). Along the coast,

particularly of West Africa,

Europeans establish a trading

network which, with the

development of New World

plantation agriculture,

becomes the focus of the

international slave trade. The

immediate consequences of

this trade for Africa are

explored, and it is argued that

the long-term global

consequences include the

foundation of the present

world-economy with all its

built-in inequalities.

*Divine Names on the Spot II* F Porzia 2023-09-14 English  
summary: Names, images, and narratives are intimately related and frequently polysemous. As pieces of information on the gods, they convey fragments of knowledge and attempts to interpret the multifaceted complexity of the divine world. In what Robert Parker describes as an "archipelago", images and narratives are like compasses used to approach the mapping of the gods. The different contributions collected in this volume, dealing with the Greek and the Semitic worlds (the two main areas of the "Mapping Ancient Polytheisms" project), explore connections but also discrepancies between these different semantics, in order to highlight specificities and commonalities in the onomastic and iconographic languages. French description: Les noms, les images et les recits sont intimement lies et volontiers polysemiques. En

tant qu'elements d'information sur les dieux, ils vehiculent des fragments de connaissance et constituent autant de tentatives d'interpretation de la complexite multiforme du monde divin. Dans ce que Robert Parker decrit comme un archipel, les images et les recits sont comme des boussoles qui facilitent la cartographie des dieux. Les differentes contributions rassemblees dans ce volume, traitant des mondes grec et semitique (les deux principaux domaines abordes dans le projet Mapping Ancient Polytheisms), explorent les connexions mais aussi les divergences existant entre ces differentes semantiques, afin de mettre en evidence les specificites et les points communs entre langage onomastique et langage iconographique.
