The Origins of Contemporary France: The ancient régime Hippolyte Taine 1876

WHO Expert Consultation on Rabies World Health Organization 2013 "Although there is debate about the estimated health burden of rabies, the estimates of direct mortality and the DALYs due to rabies are among the highest of the neglected tropical diseases. Poor surveillance, underreporting in many developing countries, frequent misdiagnosis of rabies, and an absence of coordination among all the sectors involved are likely to lead to underestimation of the scale of the disease It is clear, however, that rabies disproportionately affects poor rural communities, and particularly children. Most of the expenditure for post-exposure prophylaxis is borne by those who can least afford it. As a result of growing dog and human populations, the burden of human deaths from rabies and the economic costs will continue to escalate in the absence of concerted efforts and investment for control. Since the first WHO Expert Consultation on Rabies in 2004, WHO and its network of collaborating centres on rabies, specialized national institutions, members of the WHO Expert Advisory Panel on Rabies and partners such as the Gates Foundation, the Global Alliance for Rabies Control and the Partnership for Rabies Prevention, have been advocating the feasibility of rabies elimination regionally and globally and promoting research into sustainable cost-effective strategies. Those joint efforts have begun to break the cycle of rabies neglect, and rabies is becoming recognized as a priority for investment. This Consultation concluded that human dog-transmitted rabies is readily amenable to control, regional elimination in the medium term and even global elimination in the long term. A resolution on major neglected tropical diseases, including rabies, prepared for submission to the World Health Assembly in May 2013 aims at securing Member States' commitment to the control, elimination or eradication of these diseases. Endorsement of the resolution would open the door for exciting advances in rabies prevention and control."--Publisher's description.

The Reign of King Stephen David Crouch 2014-06-06 At last: an authoritative, up to date account of the troubled reign of King Stephen, by a leading scholar of the Anglo-Norman world. David Crouch covers every

aspect of the period - the king and the empress, the aristocracy, the Church, government and the nation at large. He also looks at the wider dimensions of the story, in Scotland, Wales, Normandy and elsewhere. The result (weaving its discussions around a vigorous narrative core) is a work of major scholarship. A must for specialist and amateur medievalists alike.

The Sentimental Theater of the French Revolution Cecilia Feilla 2016-03-03 Smoothly blending performance theory, literary analysis, and historical insights, Cecilia Feilla explores the mutually dependent discourses of feeling and politics and their impact on the theatre and theatre audiences during the French Revolution. Remarkably, the most frequently performed and popular plays from 1789 to 1799 were not the political action pieces that have been the subject of much literary and historical criticism, but rather sentimental dramas and comedies, many of which originated on the stages of the Old Regime. Feilla suggests that theatre provided an important bridge from affective communities of sentimentality to active political communities of the nation, arguing that the performance of virtue on stage served to foster the passage from private emotion to public virtue and allowed groups such as women, children, and the poor who were excluded from direct political participation to imagine a new and inclusive social and political structure. Providing close readings of texts by, among others, Denis Diderot, Collot d'Herbois, and Voltaire, Feilla maps the ways in which continuities and innovations in the theatre from 1760 to 1800 set the stage for the nineteenth century. Her book revitalizes and enriches our understanding of the significance of sentimental drama, showing that it was central to the way that drama both shaped and was shaped by political culture.

Enemies of the Enlightenment Darrin M. McMahon 2002 "Drawing on a wide range of primary sources, Darrin M. McMahon shows that well before the French Revolution, enemies of the Enlightenment were warning that the secular thrust of modern philosophy would give way to horrors of an unprecedented kind. Greeting 1789, in turn, as the realization of their worst fears, they fought the Revolution from its onset, profoundly affecting its subsequent course. The radicalization - and violence - of the Revolution was as much the product of militant resistance as any inherent logic."--BOOK JACKET.

The Classical Foundations of Population Thought Yves Charbit 2010-08-25 Whereas the history of demography as a social science has been amply explored, that of the construction of the concept of population has been neglected. Specialists systematically ignore a noteworthy paradox: strictly speaking, the great intellectual figures of the past dealt with in this book have not produced demographic theories or doctrines as such, but they have certainly given some thought to population at both levels. First, the central epistemological and methodological orientation of the book is presented. Ideas on population, far from being part of the harmonious advancement of knowledge are the product of their context, that is evidently demographic, but also economic, political and above all intellectual. Then the ideas on population of Plato, Bodin, the French mercantilists, Quesnay and the physiocrats are examined under this light. The last chapter addresses the implicit philosophical, economic and political issues of population thought.

Women and Business since 1500 Béatrice Craig 2015-12-01 This volume surveys the role women have played in various types of business as owners, co-owners and decision-making managers in European and North American societies since the sixteenth century. Drawing on up-to-date scholarship, it identifies the economic, social, legal and cultural factors that have facilitated or restricted women's participation in business. It pays particular attention to the ways in which gender norms, and their evolution, shaped not only those women's experience of business, but the ways they were perceived by contemporaries, documented in sources and, partly as a consequence, viewed by historians.

Geography of Sub-Saharan Africa Samuel Aryeetey-Attoh 2003 This book is a study of the multi-faceted aspects of the physical and human geography of Sub-Saharan Africa. An introductory book, it is designed for those readers with little or no knowledge of geography to a variety of contemporary ideas, theories, and concepts in African geography, and their applicability to "real world" situations. Using extensive maps, photographs, and illustrations, this book covers such topics as the physical-environmental, socio-cultural, and developmental aspects of Sub-Saharan Africa, as well as the region's prospects for global integration. For anyone interested in African geography and its socio-political climate.

Categories of the Impolitical Roberto Esposito 2015 The notion of the "impolitical" developed in this volume draws its meaning from the exhaustion of modernity's political categories, which have become incapable of giving voice to any genuinely radical perspective. The impolitical is not the opposite of the political but rather its outer limit: the border from which we might glimpse a trajectory away from all forms of political theology and the depoliticizing tendencies of a completed modernity. The book's reconstruction of the impolitical lineage--which is anything but uniform--begins with the extreme conclusions reached by Carl Schmitt and Romano Guardini in their reflections on the political and then moves through a series of encounters between several great twentieth-century texts: from Hannah Arendt's *On Revolution* to Hermann Broch's *The Death of Virgil*, to Elias Canetti's *Crowds and Power*; from Simone Weil's *The Need for Roots* to Georges Bataille's *Sovereignty* to Ernst Junger's *An der Zeitmauer*. The trail forged by this analysis offers a defiant counterpoint to the modern political lexicon, but at the same time a contribution to our understanding of its categories.

Egypt and the Limits of Hellenism Ian S. Moyer 2011-07-07 In a series of studies, Ian Moyer explores the ancient history and modern historiography of relations between Egypt and Greece from the fifth century BCE to the early Roman empire. Beginning with Herodotus, he analyzes key encounters between Greeks and Egyptian priests, the bearers of Egypt's ancient traditions. Four moments unfold as rich micro-histories of cross-cultural interaction: Herodotus' interviews with priests at Thebes; Manetho's composition of an Egyptian history in Greek; the struggles of Egyptian priests on Delos; and a Greek physician's quest for magic in Egypt. In writing these histories, the author moves beyond Orientalizing representations of the Other and colonial metanarratives of the civilizing process to reveal interactions between Greeks and Egyptians as transactional processes in which the traditions, discourses and pragmatic interests of both sides shaped the outcome. The result is a dialogical history of cultural and intellectual exchanges between the great civilizations of Greece and Egypt.

Agroecological Crop Protection Jean-Philippe Deguine 2017-12-22 This book is devoted to Agroecological Crop Protection, which is the declension of the principles of agroecology to crop protection. It presents the concepts of this innovative approach, case studies and lessons and generic keys for agroecological transition. The book is intended for a wide audience, including scientists, experimenters, teachers, farmers, students. It represents a new tool, proposing concrete keys of action on the basis of feedbacks validated scientifically. Beyond the examples presented, it is therefore of general scope and proposes recommendations for all temperate and tropical cropping systems. It contributes to the training and teaching modules in this field and it is an updated information support for professionals and a teaching aid for students (agronomy, crop protection, biodiversity management, agroecology).

Gwen Raverat Frances Spalding 2010-11-30 'The best of these Darwins is that they are cut out of rock - three taps is enough to convince one how immense is their solidarity.' So wrote Virginia Woolf affectionately of Gwen Raverat, the granddaughter of Charles Darwin. In this first full biography, Frances Spalding looks beyond the artist Gwen Raverat's childhood memoir; *Period Piece*, and creates a fascinating and moving portrait of Charles Darwin's granddaughter. She explores her Darwin inheritance; her conflicts when she moves beyond her home environment to enter the Slade School of Art; her encounter with post-Impressionism; and her friendships with Stanley Spencer, Rupert Brooke and members of the Bloomsbury set. At each stage, Gwen's artistic creativity is interwoven with her relationships and circumstances. She helps revive the medium of wood-engraving and with her husband, Jacques Raverat, celebrates the South of France in the art they produce while living in Venice. Drawing on a huge cache of unpublished papers, Spalding brings us a life lived with bravery, humour; realism and integrity, surrounded by a remarkable cast of relatives, friends and associates.

Economic, Social and Demographic Thought in the XIXth Century Yves Charbit 2009-03-31 According to current understanding, Malthus was hostile to an excess of population because it caused social sufferings, while Marx was favourable to demographic growth in so far as a large proletariat was a factor aggravating the contradictions of capitalism. This is unfortunately an oversimplification. Both raised the same crucial question: when considered as an economic variable, how does population fit into the analysis of economic growth? Even though they started from the same analytical standpoint, Marx established a very different diagnosis from that of Malthus and built a social doctrine no less divergent. The book also discusses the theoretical and doctrinal contribution of the liberal economists, writing at the onset of the industrial revolution in France (1840-1870), and those of their contemporary, Pierre-Joseph Proudhon, who shared with Marx the denunciation of the capitalist system. By paying careful attention to the social, economic, and political context, this book goes beyond the shortcomings of the classification between pro- and anti-populationism. It sheds new light over nineteenth century controversies over population in France, a case study for Europe.
