Madness and Civilization Michel Foucault 2013-01-30 Michel Foucault examines the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity.

All Marketers are Liars Seth Godin 2005 Touareg, which is virtually the same car. We believe that \$225 Pumas will make our feet feel better-and look cooler-than \$20 no-names . . . And believing it makes it true. Successful marketers don't talk about features or even benefits. Instead, they tell a story. A story we want to believe. This is a book about doing what consumers demand-painting vivid pictures that they choose to believe. Every organization-from nonprofits to car companies, from political campaigns to wineglass blowers-must understand that the rules have changed (again). In an economy where the richest have an infinite number of choices (and no time to make them), every organization is a marketer and all marketing is about telling stories. This is a powerful book for anyone who wants to create things people truly want as opposed to commodities that people merely need.

The Fabrication of Leonardo da Vinci's Trattato della pittura (2 vols.) Past (Im)Perfect Continuous Alice Balestrino 2021-06-25 Past (Im)perfect Continuous. Trans-Cultural Articulations of the Postmemory of WWII presents an international and interdisciplinary approach to the comprehension of the postmemory of WWII, accounting for a number of different intellectual trajectories that investigate WWII and the Holocaust as paradigms for other traumas within a global and multidirectional context. Indeed, by exceeding the geographical boundaries of nations and states and overcoming contextual specificities, postmemory foregrounds continuous, active, connective, transcultural, and always imperfect representations of violence that engage with the alterity of other histories and other subjects. 75 years after the end of WWII, this volume is primarily concerned with the convergence between postmemory and underexamined aspects of the history and aftermath of WWII, as well as with several sociopolitical anxieties and representational preoccupations. Drawing from different disciplines, the critical and visual works gathered in this volume interrogate the referential power of postmemory, considering its transcultural interplay with various forms, media, frames of reference, conceptual registers, and narrative structures.

RSPB Spotlight Bats Nancy Jennings 2018-10-04 RSPB Spotlight: Bats is packed with eye-catching, informative colour photographs and features succinct, detailed text written by a knowledgeable naturalist. Thanks to their speed, size and nocturnal habitats, bats are among the most interesting, and least understood, mammals that frequent our homes and gardens. From their ability to make sounds that are above the range of human hearing, to their reliance on echolocation to navigate objects and find prey, their unique behaviour means that bats are seldom seen or heard. With nearly 1,400 species worldwide, bats make up around 25 per cent of all mammal species. Spotlight Bats features all 17 species that live and breed in the British Isles, as well as an array of the most fascinating bats from around the world, including some of the more charismatic species such as vampire bats and fishing bats. Nancy Jennings uses up-to-

date research to provide insights into the lives of these elusive mammals, covering the biology, diversity, evolution and ecology of bats, as well as their interactions with humans and folklore. The Spotlight series introduces readers to the lives and behaviours of our favourite animals with eye-catching colour photography and informative expert text.

Tropisms Nathalie Sarraute 2015-11-09 Nathalie Sarraute's stunning debut—vignettes of "inner movements"—foreshadowed the rise of the nouveau roman. Hailed as a masterpiece by Jean Genet, Marguerite Duras, and Jean-Paul Sartre, Tropisms is considered one of the defining texts of the nouveau roman movement. Nathalie Sarraute has defined her work as the “movements that are hidden under the commonplace, harmless instances of our everyday lives.” Like figures in a grainy photograph, Sarraute’s characters are blurred and shadowy, while her narrative never develops beyond a stressed moment. Instead, Sarraute brilliantly finds and elaborates subtle details—when a relationship changes, when we fall slightly deeper into love, or when something innocent tilts to the smallest degree toward suspicion. *The Cambridge Introduction to the Old Norse-Icelandic Saga* Margaret Clunies Ross 2010-10-28 The medieval Norse-Icelandic saga is one of the most important European vernacular literary genres of the Middle Ages. This Introduction to the saga genre outlines its origins and development, its literary character, its material existence in manuscripts and printed editions, and its changing reception from the Middle Ages to the present time. Its multiple sub-genres - including family sagas, mythical-heroic sagas and sagas of knights - are described and discussed in detail, and the world of medieval Icelanders is powerfully evoked. The first general study of the Old Norse-Icelandic saga to be written in English for some decades, the Introduction is based on up-to-date scholarship and engages with current debates in the field. With suggestions for further reading, detailed information about the Icelandic literary canon, and a map of medieval Iceland, this book is aimed at students of medieval literature and assumes no prior knowledge of Scandinavian languages.

The Order of Things Michel Foucault 2005-08-18 When one defines "order" as a sorting of priorities, it becomes beautifully clear as to what Foucault is doing here. With virtuoso showmanship, he weaves an intensely complex history of thought. He dips into literature, art, economics and even biology in *The Order of Things*, possibly one of the most significant, yet most overlooked, works of the twentieth century. Eclipsed by his later work on power and discourse, nonetheless it was *The Order of Things* that established Foucault's reputation as an intellectual giant. Pirouetting around the outer edge of language, Foucault unsettles the surface of literary writing. In describing the limitations of our usual taxonomies, he opens the door onto a whole new system of thought, one ripe with what he calls "exotic charm". Intellectual pyrotechnics from the master of critical thinking, this book is crucial reading for those who wish to gain insight into that odd beast called Postmodernism, and a must for any fan of Foucault.

Ethics and Sport in Europe Dominique Bodin 2011-01-01 Defending ethics in sport is vital in order to combat the problems of corruption, violence, drugs, extremism and other forms of discrimination it is currently facing. Sport reflects nothing more and nothing less than the societies in which it takes place. However, if sport is to continue to bring benefits for individuals and societies, it cannot afford to neglect its ethical values or ignore these scourges. The major role of the Council of Europe and the Enlarged Partial Agreement on Sport (EPAS) in addressing the new challenges to sports ethics was confirmed by the 11th Council of Europe Conference of Ministers responsible for Sport, held in Athens on 11 and 12 December 2008. A political impetus was given on 16 June 2010 by the Committee of Ministers, with the adoption of an

updated version of the Code of Sports Ethics (Recommendation CM/Rec(2010)9), emphasising the requisite co-ordination between governments and sports organisations. The EPAS prepared the ministerial conference and stepped up its work in an international conference organised with the University of Rennes, which was attended by political leaders, athletes, researchers and officials from the voluntary sector. The key experiences described in the conference and the thoughts that it prompted are described in this publication. All the writers share the concern that the end result should be practical action - particularly in terms of the setting of standards - that falls within the remit of the EPAS and promotes the Council of Europe's core values.

Roman de Troie Benoit (de Sainte-Maure.) 1904

On Being a Pagan Alain De Benoist 2018-04-23 What is paganism? In this penetrating and tightly argued manifesto, French philosopher Alain de Benoist seeks to answer this question with passionate intellectual vigor and a tremendous erudition. Arising out of the "monotheism vs. polytheism" debate that reverberated through Parisian intellectual circles in the late 1970s, this is neither a survey of ancient, pre-Christian religions, nor is it an argument on behalf of any modern neo-pagan sect. *On Being a Pagan* draws on Nietzsche, Heidegger, ancient philosophy and mythology, and biblical hermeneutics to articulate a pagan theology based on a common Indo-European foundation. In keeping with the critical tradition which harkens back to the Greek philosopher Celsus, Benoist contrasts the heroic pagan worldview with Christianity's attempts to hobble everything that is beautiful and strong. He compares the cyclical pagan conception of time to the de-mythologizing, linear understanding of history favored by the prophets. Most disturbingly, he traces the roots of modern totalitarianism and intolerance--of both the left and the right--to the leveling ideology of ancient Judeo-Christian monotheism, with its underlying rejection of diversity and difference. Originally published to wide critical acclaim in 1981, Benoist's text is as relevant today as it was when it first appeared--and perhaps even more so for the English-speaking world. This newly revised translation now features an extensive interview with the author, and includes his reflections (both positive and negative) on the various groups and individuals that have attempted to resurrect the pagan spirit. Rather than simply dissecting the 2,000-year Christian interregnum, Benoist's greater purpose is to point the way forward to a world that could have been, and which may only now be in the first stages of being reborn.

Discipline and Punish Michel Foucault 2012-04-18 A brilliant work from the most influential philosopher since Sartre. In this indispensable work, a brilliant thinker suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

The Memoirs of Naim Bey 2018-10-07 Aram Andonian did a service to humanity by tracking down Naim Bey and recording his story. During the genocide, Naim Bey, a Turk, had been the chief secretary of the Deportations Committee of Aleppo. By virtue of this station, Naim Bey had access to documents, telegrams, and decrees related to the orders to exterminate the Armenians.

State of the World's Children 2017 United Nations 2018-02 As the debate about whether the internet is safe for children rages, *The State of the World's Children 2017: Children in a Digital World* discusses how digital access can be a game changer for children or yet another dividing line. The report represents the first comprehensive look from UNICEF at the different ways digital technology is affecting children, identifying dangers as well as opportunities. It makes a clear call to governments, the digital technology sector and telecom industries to level the digital playing field for children by creating policies, practices and products that can help children harness digital opportunities and protect them from harm.

Echoes of the Epic David P. Schenck 1998 This volume is a collection of fourteen original essays and one poem in honor of the prominent medievalist Gerard J. Brault, upon the occasion of his retirement from teaching at the Pennsylvania State University. World-renowned for his contributions to the French medieval epic (in particular "La Chanson de Roland") and French-Canadian cultural studies, Professor Brault is affectionately remembered as "Mr. Song of Roland" by his colleagues for his unique interpretation of Roland as a triumphant christian hero, rather than a tragic feudal warrior. Among the friend, former students, colleagues, and admirers who contributed to this festschrift are; William Calin (preface), Jeanette

Beer, Keight Busby, Kimberlee Campbell, Robert Francis Cook, Bernard Guidot, Edward Heinemann, Catherine Jones, Hans-Erich Keller, Donald Maddox, Andre de Mandach, Emanuel Mickel, Rupert Pickens, Jean Subrenat, Joan Williamson, Jacques Ribard, and the editors, David and Mary Jane Schenck. All essays center on aspects of "La Chanson de Roland" and the French medieval epic in general.

Project for a Revolution in New York Alain Robbe-Grillet 2012-09-04 Part prophecy and part erotic fantasy, this classic tale of otherworldly depravity features New York itself—or a foreigner's nightmare of New York—as its true protagonist. Set in the towers and tunnels of the quintessential American city, Alain Robbe-Grillet's novel turns this urban space into a maze where politics bleeds into perversion, revolution into sadism, activist into criminal, vice into art—and back again. Following the logic of a movie half-glimpsed through a haze of drugs and alcohol, *Project for a Revolution in New York* is a Sadean reverie that bears an alarming resemblance to the New York, and the United States, that have actually come into being.

Food Safety and Informal Markets Kristina Roesel 2014-10-03 Animal products are vital components of the diets and livelihoods of people across sub-Saharan Africa. They are frequently traded in local, unregulated markets and this can pose significant health risks. This volume presents an accessible overview of these issues in the context of food safety, zoonoses and public health, while at the same time maintaining fair and equitable livelihoods for poorer people across the continent. The book includes a review of the key issues and 25 case studies of the meat, milk, egg and fish food sectors drawn from a wide range of countries in East, West and Southern Africa, as part of the "Safe Food, Fair Food" project. It describes a realistic analysis of food safety risk by developing a methodology of 'participatory food safety risk assessment', involving small-scale producers and consumers in the process of data collection in a data-poor environment often found in developing countries. This approach aims to ensure market access for poor producers, while adopting a realistic and pragmatic strategy for reducing the risk of food-borne diseases for consumers.

Deception Philip Roth 2022-09-21 A dazzling novel about a man and woman married to other people—and the riveting conversations that take place before and after they make love—from the acclaimed Pulitzer Prize-winning author of *American Pastoral*. "This swift, elegant, disturbing novel...stands at the extreme of contemporary fiction." —The New York Times Book Review With the lover everyday life recedes," Roth writes—and exhibiting all his skill as a brilliant observer of human passion, he presents in *Deception* the tightly enclosed world of adulterous intimacy with a directness that has no equal in American fiction. At the center of *Deception* are two adulterers in their hiding place. He is a middle-aged American writer named Philip, living in London, and she is an articulate, intelligent, well-educated Englishwoman compromised by a humiliating marriage to which, in her thirties, she is already nervously half-resigned. The book's action consists of conversation—mainly the lovers talking to each other before and after making love. That dialogue—sharp, rich, playful, inquiring, "moving," as Hermione Lee writes, "on a scale of pain from furious bafflement to stoic gaiety"—is nearly all there is to this book, and all there needs to be.

Pastiches Et Melanges by Marcel Proust Marcel Proust 2018-08-06 This is the first translation into English in its entirety of Marcel Proust's *Pastiches et Mélanges*, published by Gaston Gallimard in 1919. The first part, *Pastiches*, contains nine literary parodies about a fraudster, Henri Lemoine, who claimed to

be able to manufacture diamonds. The pastiches are in the manner of Balzac, Flaubert, Sainte-Beuve, Henri de Régnier, Michelet, Émile Faguet, Renan and the Goncourt brothers. The second part, *Mélanges*, consists of four sections: the destruction of cathedrals in the First World War, the separation of church and state, a drama about madness, and Proust's love of reading. Proust is best known for writing *À la recherche du temps perdu* (variously translated as *Remembrance of Things Past* and *In Search of Lost Time*), widely considered to be the greatest novel of the twentieth century. Days of Reading Marcel Proust 2008-08-07 In these inspiring essays about why we read, Proust explores all the pleasures and trials that we take from books, as well as explaining the beauty of Ruskin and his work, and the joys of losing yourself in literature as a child. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

The Sex of Knowing Michèle Le Doeuff 2013-10-18 Michèle Le Doeuff is a leading French philosopher, and one of the most important feminist thinkers writing today. *The Sex of Knowing*, Le Doeuff's most significant work to date, provides a comprehensive account of her views. This is the first English translation of her inspiring book. Le Doeuff's target is the continuing tendency to think that men are more rational, more analytic than women, a tendency that persists in spite of our thinking we know better. She argues that the conceptual links between masculinity and rationality are deeply rooted in the public imagination and institutions of learning, and continue to have devastating effects on what women are able to achieve. To shed light on the depth and persistence of the problem, Le Doeuff leads us on provocative archeological journey through the great texts and authors of the past and present from Plato and Descartes to Evelyn Fox Keller and Kate Millett in search of the origins and extent of a set of contemporary reflexes that hold misogynistic thinking in place both in the larger society, and within science and philosophy. An ambitious and highly persuasive book, *The Sex of Knowing* received widespread critical attention in the French press. Lorraine Code and Kathryn Hamer's superb translation is sure to have a similar impact on English speaking audiences everywhere.

My Life (Revised and Updated) Isadora Duncan 2013-05-27 A remarkable account of a wildly artistic life, finally restored to its unexpurgated form, with a revealing new introduction by Joan Acocella. The visionary choreographer and dancer Isadora Duncan (1877-1927) not only revolutionized dance in the twentieth century but blazed a path for other visionaries who would follow in her wake. While many biographies have explored Duncan's crucial role as one of the founders of modern dance, no other book has proved as critical—as both historical record and vivid evocation of a riveting life—as her autobiography. From her early enchantment with classical music and poetry to her great successes abroad, to her sensational love

affairs and headline-grabbing personal tragedies, Duncan's story is a dramatic one. *My Life* still stands alone as “a great document, revealing the truth of her life as she understood it, without reticence or apology or compromise” (New York Herald Tribune). Now, in this fully restored edition, with its risqué recollections and fervent idealism, *My Life* can be appreciated by a new generation.

The Emergence of Personal Data Protection as a Fundamental Right of the EU Gloria González Fuster 2014-04-28 This book explores the coming into being in European Union (EU) law of the fundamental right to personal data protection. Approaching legal evolution through the lens of law as text, it unearths the steps that led to the emergence of this new right. It throws light on the right's significance, and reveals the intricacies of its relationship with privacy. The right to personal data protection is now officially recognised as an EU fundamental right. As such, it is expected to play a critical role in the future European personal data protection legal landscape, seemingly displacing the right to privacy. This volume is based on the premise that an accurate understanding of the right's emergence is crucial to ensure its correct interpretation and development. Key questions addressed include: How did the new right surface in EU law? How could the EU Charter of Fundamental Rights claim to render ‘more visible’ an invisible right? And how did EU law allow for the creation of a new right while ensuring consistency with existing legal instruments and case law? The book first investigates the roots of personal data protection, studying the redefinition of privacy in the United States in the 1960s, as well as pioneering developments in European countries and in international organisations. It then analyses the EU's involvement since the 1970s up to the introduction of legislative proposals in 2012. It grants particular attention to changes triggered in law by language and, specifically, by the coexistence of languages and legal systems that determine meaning in EU law. Embracing simultaneously EU law's multilingualism and the challenging notion of the untranslatability of words, this work opens up an inspiring way of understanding legal change. This book will appeal to legal scholars, policy makers, legal practitioners, privacy and personal data protection activists, and philosophers of law, as well as, more generally, anyone interested in how law works.

The Curtain Milan Kundera 2023-07-18 “An elegant, personalized integration of anecdote, analysis, scholarship, memory and speculation. . . . Not since Henry James, perhaps, has a fiction writer examined the process of writing with such insight, authority and range of reference and allusion.” —Russell Banks, New York Times Book Review “A magic curtain, woven of legends, hung before the world. Cervantes sent Don Quixote journeying and tore through the curtain. The world opened before the knight-errant in all the comical nakedness of its prose.” In this thought-provoking, endlessly enlightening, and entertaining essay on the art of the novel, renowned author Milan Kundera suggests that “the curtain” represents a ready-made perception of the world that each of us has—a pre-interpreted world. The job of the novelist, he argues, is to rip through the curtain and reveal what it hides. Here an incomparable literary artist cleverly sketches out his personal view of the history and value of the novel in Western civilization. In doing so, he celebrates a prose form that possesses the unique ability to transcend national and language boundaries in order to reveal some previously unknown aspect of human existence.

Moral Education Émile Durkheim 2012-04-30 The great French sociologist and philosopher Emile Durkheim is best known for his classic book *Suicide* (1897), a landmark in social psychology. Among his other major works is this study in the sociology of education, which features 18 lectures by an influential theorist who discusses his ideas on the school as the appropriate setting for moral education. The first element in developing a moral being, he maintains, is instilling a sense of discipline, followed by a willingness to behave in terms of the group's collective interest, and a sense of autonomy. Durkheim also examines discipline and the psychology of the child, discipline of the school and the use of punishment, altruism in the child, the influence of the school environment, and the teaching of science, aesthetics, and history. Perceptive and provocative, this volume abounds in valuable insights for teachers and others involved in education.
