History of Law and Other Humanities. Views of the legal world across the time Valerio Massimo Minale 2019-07-09 The collection of essays presented here examines the links forged through the ages between the realm of law and the expressions of the humanistic culture. We collected thirty-five essays by international scholars and organized them into sections of ten chapters based around ten different themes. Two main perspectives emerged: in some articles the topic relates to the conventional approach of law and/in humanities (iconography, literature, architecture, cinema, music), other articles are about more traditional connections between fields of knowledge (in particular, philosophy, political experiences, didactics). We decided not to confine authors to one particular

methodological framework, preferring instead to promote historiographical openness. Our intention was to create a patchwork of different approaches, with each article drawing on a different area of culture to provide a new angle to the history being told. The variety of authorial nationalities gives the collection a multicultural character and the breadth of the chronological period it deals with from antiquity to the contemporary age adds further depth of insight. As the element that unites the collection is historiographical interpretation, we wanted to bring to the fore its historical depth. Thus for every chapter we organized the articles in chronological order according to the historical context covered. Looking at the final outcome, it was interesting to learn that more often than not the connection between law and humanities is

not simply a relation between a specific branch of the law and a single field of the humanities, but rather a relation that could be developed in many directions at once, involving different fields of knowledge, and of arts and popular culture. We are grateful to Luigi Lacchè for his contribution to this collection. His essay outlines the coordinates of the law and humanities world, laying out the instruments necessary for an understanding of the origins of a complex methodology and the different approaches that exist within it. This project is the result of discussions that took place during the XXIII Forum of the Association of Young Legal Historians held in Naples in the spring of 2017. The book was made possible thanks to the advice and support of Cristina Vano. The Editors

The Third Book Illustrated François Rabelais 2020-07-25 The Third Book of Enoch is Biblical apocryphal book in Hebrew. 3 Enoch purports to have been written in the 2nd century, but its origins can only be traced to the 5th century.

Other names for 3 Enoch include The Book of the Palaces, The Book of Rabbi Ishmael the High Priest and The Revelation of Metatron. Most commonly, the Book of Enoch refers to 1 Enoch, which survived completely only in Ge'ez. There is also a Second Book of Enoch, which has survived only in Old Slavonic.

Duelling Stories of the Sixteenth Century from the French of Brantôme Pierre de Bourdeille Brantôme (seigneur de) 1904 *Mediaeval Artes Praedicandi* Harry Caplan 1934 *Things That Keep Us Busy* Lars-Erik Janlert 2017-09-01 An investigation of interactivity, interfaces and their design, and the webs of complex interactions that result. We are surrounded by interactive devices, artifacts, and

systems. The general assumption is that interactivity is good—that it is a positive feature associated with being modern, efficient, fast, flexible, and in control. Yet there is no very precise idea of what interaction is and what interactivity means. In this book, Lars-Erik Janlert and Erik Stolterman investigate the elements of interaction and how they can be defined and measured. They focus on interaction with digital artifacts and systems but draw inspiration from the broader, everyday sense of the word. Viewing the topic from a design perspective, Janlert and Stolterman take as their starting point the interface, which is designed to implement the interaction. They explore how the interface has changed over time, from a surface with knobs and dials to clickable symbols to gestures to the absence of anything visible. Janlert and Stolterman examine properties and qualities of designed artifacts and systems, primarily those that are open for manipulation by designers, considering such topics as

complexity, clutter, control, and the emergence of an expressive-impressive style of interaction. They argue that only when we understand the basic concepts and terms of interactivity and interaction will we be able to discuss seriously its possible futures.

The Spiritual Franciscans David Burr
2015-09-30 Winner of the 2002 John Gilmary Shea Prize and the 2002 Howard R. Marraro Prize of the American Catholic Historical Association. When Saint Francis of Assisi died in 1226, he left behind an order already struggling to maintain its identity. As the Church called upon Franciscans to be bishops, professors, and inquisitors, their style of life began to change. Some in the order lamented this change and insisted on observing the strict poverty practiced by Francis himself. Others were more open to compromise. Over time, this division evolved into a genuine rift, as those who argued for strict poverty were marginalized within the order. In this book, David Burr offers the first

comprehensive history of the so-called Spiritual Franciscans, a protest movement within the Franciscan order. Burr shows that the movement existed more or less as a loyal opposition in the late thirteenth century, but by 1318 Pope John XXII and leaders of the order had combined to force it beyond the boundaries of legitimacy. At that point the loyal opposition turned into a heretical movement and recalcitrant friars were sent to the stake. Although much has been written about individual Spiritual Franciscan leaders, there has been no general history of the movement since 1932. Few people are equipped to tackle the voluminous documentary record and digest the sheer mass of research generated by Franciscan scholars in the last century. Burr, one of the world's leading authorities on the Franciscans, has given us a book that will define the field for years to come.

Global Continental Changes Julia Branson 1996 Palaeohydrology is the study of changes in the waters of the Earth prior to continuous monitoring. Knowledge of these changes is important for the understanding of past and present environmental changes and of the form of the present-day environment. The evolution of the hydrological cycle in response to climatic change produces a chain of environmental and human consequences -- factors that are becoming more relevant as climate change is predicted. Evidence of past environmental changes may be used to validate models with which to predict future change -- thus the study of rates, mechanisms and processes of Late Quaternary hydrological changes is of critical

importance. This volume is designed for all who are interested in the hydrological impacts of climatic change and the contribution that palaeohydrology can make to the study of these changes.

Fiefs and Vassals Susan Reynolds 1996 Fiefs and Vassals has changed our view of the medieval world. It offers a fundamental challenge to orthodox conceptions of feudalism. Susan Reynolds argues that the concepts of the fief and of vassalage, as understood by historians of medieval Europe, were constructed by post-medieval scholars from the works of medieval academic lawyers and that they provide a bad guide to the realities of medieval society. This is a radical new examination of relations between rulers, nobles, and free men, the distillation of wide-ranging research by a leading medieval historian. It has revolutionized the way we think of the Middle Ages.

The Reign of King Stephen David Crouch 2014-06-06 At last: an authoritative, up to date account of the troubled reign of King Stephen, by a leading scholar of the Anglo-Norman world.

David Crouch covers every aspect of the period - the king and the empress, the aristocracy, the Church, government and the nation at large. He also looks at the wider dimensions of the story, in Scotland, Wales, Normandy and elsewhere. The result (weaving its discussions around a vigorous narrative core) is a work of major scholarship. A must for specialist and amateur medievalists alike.

Women and Power at the French Court,

1483-1563 Susan Broomhall 2018 Women and Power at the French Court, 1483--1563 explores the ways in which a range of women " as consorts, regents, mistresses, factional power players, attendants at court, or as objects of courtly patronage " wielded power in order to advance individual, familial, and factional agendas at the early sixteenth-century French court. Spring-boarding from the burgeoning scholarship of gender, the political, and power in early modern Europe, the collection provides a perspective from the French court, from the reigns of Charles VIII to Henri II, a time when the French court was a renowned center of culture and at which women played important roles. Crossdisciplinary in its perspectives, these essays by historians, art and literary scholars investigate the dynamic operations of gendered power in political acts, recognized status as queens and regents, ritualized behaviors such as gift-giving, educational coteries, and through social networking, literary and artistic

patronage, female authorship, and epistolary strategies.

Terra 2008 Leslie Rainer 2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

My Life (Revised and Updated) Isadora Duncan 2013-05-27 A remarkable account of a wildly artistic life, finally restored to its unexpurgated form, with a revealing new introduction by Joan Acocella. The visionary choreographer and dancer Isadora Duncan (1877-1927) not only revolutionized dance in the twentieth century but blazed a path for other visionaries who would follow in her wake. While many biographies have explored Duncan's crucial role as one of the founders of modern dance, no other book has proved as critical—as both historical record and vivid evocation of a riveting life—as her autobiography. From her early enchantment with classical music and poetry to her great successes abroad, to her sensational love affairs and headline-grabbing personal tragedies, Duncan's story is a dramatic one. My Life still stands alone as “a great document,

revealing the truth of her life as she understood it, without reticence or apology or compromise” (New York Herald Tribune). Now, in this fully restored edition, with its risqué recollections and fervent idealism, My Life can be appreciated by a new generation.

A Companion to Documentary Film History

Joshua Malitsky 2021-04-28 This volume offers a new and expanded history of the documentary form across a range of times and contexts,

featuring original essays by leading historians in the field In a contemporary media culture suffused with competing truth claims, documentary media have become one of the most significant means through which we think in depth about the past. The authors provide fresh insights on the mode's reception, geographies, authorship, multimedia contexts, and movements, and address documentary's many

aesthetic, industrial, historiographical, and social dimensions. This authoritative volume: Offers both historical specificity and conceptual flexibility in approaching nonfiction and documentary media Explores documentary's multiple, complex geographic and geopolitical frameworks Covers a diversity of national and historical contexts, including Revolution-era Soviet Union, post-World War Two Canada and Europe, and contemporary China Establishes new connections and interpretive contexts for key individual films and film movements, using new primary sources Interrogates established assumptions about documentary authorship, audiences, and documentary's historical connection to other media practices. A Companion to Documentary Film History is an ideal text for undergraduate and graduate courses covering documentary or nonfiction film and media, an excellent supplement for courses on national or regional media histories, and an important new resource for all film and media

studies scholars, particularly those in nonfiction media.

Art Deco and Other Figures Bryan Catley 2003
This important book, now available in a revised edition, contains the most complete range of art deco figures ever published. It is based partly on the original importers catalogues and partly on the wide range of pieces handled by the author Bryan Catley - the leading specialist in the subject. Between the wars an entirely modern style of decorative sculpture emerged which was

a complete break with the heavy romantic late nineteenth century schools, and was totally in sympathy with the vibrant young society of the 1920s. The use of bronze and ivory for a great number of these sensual figures in no way obscures the fact that many are of exceptionally high quality; add to this their sense of movement and rhythm and one realises that the large sums they now command is a reflection of a discriminative international collectors market.
