Oeuvres Courtes

Encyclopedia of Modern

French Thought Christopher John Murray 2013-01-11 In this wide-ranging guide to twentieth-century French thought, leading scholars offer an authoritative multi-disciplinary analysis of one of the most distinctive and influential traditions in modern thought. Unlike any other existing work, this important work covers not only philosophy, but also all the other major disciplines, including literary theory, sociology, linguistics, political thought, theology, and more.

Polish-Jewish Literature in the Interwar Years

Eugenia Prokop-Janiec 2003-04-01 Foremost among a recent wave of Polish books on Jewish issues, this groundbreaking work rectifies long-held misconceptions about Polish Jewish writers. Popular notion has it that Polish Jewish

writers, unlike their counterparts in Western, Northern, and Central Europe, wrote solely in Yiddish or Hebrew. Yet between the two world wars Poland produced an elite group of assimilated Jews who wrote exclusively in Polish. Theirs was not an easy lot. Torn between love of Poland and its literature and their own Jewish identity, they straddled a fine line between two cultural worlds-at once advocating acculturation while prey to virulent anti-Semitism. This pioneering, award-winning volume examines the emergence and development of these writers, their personal plight, and the profound effect they had upon Polish letters and poetry. Meticulously researched, it explores the role of language as a bridge, attitudes toward Polish writing, impact of the ghetto, and the transformation of Polish into a force for its Jewish populace.

Finally, it pays homage to fine literary voices silenced by the Holocaust.

Metamathematics and the Philosophical Tradition William Boos 2018-12-17

Metamathematics and the Philosophical Tradition is the first work to explore in such historical depth the relationship between fundamental philosophical quandaries regarding self-reference and meta-mathematical notions of consistency and incompleteness. Using the insights of twentieth-century logicians from Gödel through

Hilbert and their successors, this volume revisits the writings of Aristotle, the ancient skeptics, Anselm, and enlightenment and seventeenth and eighteenth century philosophers Leibniz, Berkeley, Hume, Pascal, Descartes, and Kant to identify ways in which these both encode and evade problems of a priori definition and self-reference. The final chapters critique and extend more recent insights of late 20th-century logicians and quantum physicists, and offer new applications of the completeness theorem as a means of exploring "metatheoretical ascent" and the limitations of scientific certainty. Broadly syncretic in range, Metamathematics and the Philosophical Tradition addresses central and recurring problems within epistemology. The volume's elegant, condensed writing style renders accessible its wealth of citations and allusions from varied traditions and in several languages. Its arguments will be of special interest to historians and

philosophers of science and mathematics, particularly scholars of classical skepticism, the Enlightenment, Kant, ethics, and mathematical logic. *The Mexican Dream* J. M. G. Le Clézio 1993-12 A widely respected French novelist with a long history of interest in pre-Columbian Mexico, Le Clezio imagined how the thought of early Indian civilizations might have evolved if not for the interruption of European conquest. A powerful evocation of the imaginings that made and unmade an ancient culture. Map.

Circulations in the Global History of Art Thomas DaCosta Kaufmann 2016-03-03 The project of global art history calls for balanced treatment of artifacts and a unified approach. This volume emphasizes questions of transcultural encounters and exchanges as circulations. It

presents a strategy that highlights the processes and connections among cultures, and also responds to the dynamics at work in the current globalized art world. The editors' introduction provides an account of the historical background to this approach to global art history, stresses the inseparable bond of theory and practice, and suggests a reevaluation of materialist historicism as an underlying premise. Individual contributions to the book provide an overview of current reflection and research on issues of circulation in relation to global art history and the globalization of art past and present. They offer a variety of methods and approaches to the treatment of different periods, regions, and objects, surveying both questions of historiography and methodology and presenting individual case studies. An 'Afterword' by James Elkins gives a critique of the present project. The book thus deliberately leaves discussion open, inviting future responses

to the large questions it poses.

Enemies of the

Enlightenment Darrin M.

McMahon 2002 "Drawing on a wide range of primary sources, Darrin M. McMahon shows that well before the French Revolution, enemies of the Enlightenment were warning that the secular thrust of modern philosophy would give way to horrors of an unprecedented kind. Greeting

1789, in turn, as the realization of their worst fears, they fought the Revolution from its onset, profoundly affecting its subsequent course. The radicalization - and violence - of the Revolution was as much the product of militant resistance as any inherent logic."--BOOK JACKET.

Les dessins de champignons de

Claude Aubriet Xavier Carteret

2010 In 1730, noted painter and miniaturist Claude Aubriet created ninety-seven color plates that depicted a wide-range of mushrooms. Because of their high quality, the paintings were used by numerous scientists from the period, including Carl Linnaeus. In this book, Xavier Carteret and Aline Hamonou-Mahieu reproduce Aubriet's stunning images, describing the rarity of color illustrations of mushrooms before the end of the eighteenth century. They reveal that these drawings reflected the period's lack of understanding of fungi, when the structure, reproduction, and general existence of mushrooms remained a

mystery. A welcome volume for mycologists and for fans of Aubriet, this book underlines the decisive role scientific illustration has played throughout history.

Multilevel Synthesis Daniel Courgeau 2007-05-03 This book presents a historical panorama of the evolution of demographic thought from its eighteenth-century origins up to the present day. The book uses this to demonstrate how the multilevel approach can resolve some of the contradictions that have become apparent and achieve a synthesis of the different approaches employed. This is both a textbook and an assessment of the multilevel analysis that broadens the scope of demography with its approach.

Modern Dogma and the Rhetoric of Assent Wayne C. Booth 1974-10-15 When should I change my mind? What can I

believe and what must I doubt? In this new "philosophy of good reasons" Wayne C. Booth exposes five dogmas of modernism that have too often inhibited efforts to answer these questions. Modern dogmas teach that "you cannot reason about values" and that "the job of thought is to doubt whatever can be doubted," and they leave those who accept them crippled in their efforts to think and talk together about whatever concerns them most. They have willed upon us a "befouled rhetorical climate" in which people are driven to two self-destructive extremes—defenders of reason becoming confined to ever narrower notions of logical or experimental proof and defenders of "values" becoming more and more irresponsible in trying to defend the heart, the gut, or the gonads. Booth traces the consequences of modernist assumptions through a wide range of inquiry and action: in politics, art, music, literature, and in personal efforts to find "identity" or a "self." In casting doubt on

systematic doubt, the author finds that the dogmas are being questioned in almost every modern discipline. Suggesting that they be replaced with a rhetoric of "systematic assent," Booth discovers a vast, neglected reservoir of "good reasons"—many of them known to classical students of rhetoric, some still to be explored. These "good reasons" are here restored to intellectual respectability, suggesting the possibility of widespread new inquiry, in all fields, into the question, "When should I change my mind?"

Postcolonial Ecologies

Elizabeth DeLoughrey

2011-04-20 The first edited collection to bring ecocritical studies into a necessary dialogue with postcolonial literature, this volume offers rich and suggestive ways to explore the relationship between humans and nature

around the globe, drawing from texts from Africa and the Caribbean, as well as the Pacific Islands and South Asia. Turning to contemporary works by both well- and little-known postcolonial writers, the diverse contributions highlight the literary imagination as crucial to representing what Eduoard Glissant calls the "aesthetics of the earth." The essays are organized around a group of thematic concerns that engage culture and cultivation, arboriculture and deforestation, the lives of animals, and the relationship between the military and the tourist industry. With chapters that address works by J. M. Coetzee, Kiran Desai, Derek Walcott, Alejo Carpentier, Zakes Mda, and many others, *Postcolonial Ecologies* makes a remarkable contribution to rethinking the role of the humanities in addressing global environmental issues.

La Figlia Di Lorio: Tragedia

Pastorale Gabriele D'Annunzio

2023-07-18 This poetic and lyrical play by the Italian writer Gabriele D'Annunzio tells the story of the tragic love affair between Lorio, a young shepherd, and his beloved daughter. Set in the mountains of southern Italy, the play explores themes of love, death, and sacrifice, and features some of D'Annunzio's most beautiful and evocative writing. The play is considered a masterpiece of Italian literature and a classic of the pastoral genre. Ivory Coast History on Politics, Art, Culture, Ethnic Groups and Migration

Emmanuel Alvin 2016-11-07

Ivory Coast History on Politics, Art, Culture, Ethnic groups and migration. The economic situation continues to deteriorate through the 1990s, with students, civil servants and soldiers protesting on different occasions because of inflation and diminishing value of scholarships and wages. President Houphouët-Boigny dies in December 1993, and this leads to a competition for power within the PDCI between prime minister

Alassane Ouattara and parliamentary spokesman Henri Konan Bédié, who is appointed interim president until election are held in 1995. Bédié receives support from the Baoulé-dominated PDCI leadership, Ouattara is appointed vice president of the International Monetary Fund and moves to Washington DC in the meantime, Ouattara's supporters are removed from positions of power in PDCI, and this group breaks out of the party and creates the new party RDR..Read the entire Book.

Religion and Culture in Early Modern Europe, 1500-1800
Kasper von Greyerz 2008 In the pre-industrial societies of early modern Europe, religion was a vessel of fundamental importance in making sense of personal and collective social, cultural and spiritual exercises. This text presents Kaspar von Greyerz's important overview and interpretation of the religions and cultures of Early Modern Europe.

Discovery and Explanation in Biology and Medicine

Kenneth F. Schaffner 1993
Kenneth F. Schaffner compares the practice of biological and

medical research and shows how traditional topics in philosophy of science—such as the nature of theories and of explanation—can illuminate the life sciences. While Schaffner pays some attention to the conceptual questions of evolutionary biology, his chief focus is on the examples that immunology, human genetics, neuroscience, and internal medicine provide for examinations of the way scientists develop, examine, test, and apply theories. Although traditional philosophy of science has regarded scientific discovery—the questions of creativity in science—as a subject for psychological rather than philosophical study, Schaffner argues that recent work in cognitive science and artificial intelligence enables researchers to rationally analyze the nature of discovery. As a philosopher of science who holds an M.D., he has examined biomedical work from the inside and uses detailed examples from the entire range of the life sciences

to support the semantic approach to scientific theories, addressing whether there are "laws" in the life sciences as there are in the physical sciences. Schaffner's novel use of philosophical tools to deal with scientific research in all of its complexity provides a distinctive angle on basic questions of scientific evaluation and explanation.

Arnaud 2020-09-03 In this

book, an international team of experts draws upon a rich range of Latin and Greek texts to explore the roles played by individuals at ports in activities and institutions that were

central to the maritime commerce of the Roman Mediterranean. In particular, they focus upon some of the interpretative issues that arise in dealing with this kind of epigraphic evidence, the archaeological contexts of the texts, social institutions and social groups in ports, legal issues relating to harbours, case studies relating to specific ports, and mercantile connections and shippers. While much attention is inevitably focused upon the richer epigraphic collections of Ostia and Ephesos, the papers draw upon inscriptions from a very wide range of ports across the Mediterranean. The volume will be invaluable for all scholars and students of Roman history.
