The Cambridge Companion to Stravinsky Jonathan Cross 2003-07-24 Stravinsky's work spanned the major part of the twentieth century and engaged with nearly all its principal compositional developments. This Companion reflects the breadth of Stravinsky's achievement and influence in essays by leading international scholars on a wide range of topics. It is divided into three parts dealing with the contexts within which Stravinsky worked (Russian, modernist and compositional), with his key compositions (Russian, neoclassical and serial), and with the reception of his ideas (through performance, analysis and criticism). The volume concludes with an interview with the leading Dutch composer Louis Andriessen and a major re-evaluation of 'Stravinsky and Us' by Richard Taruskin.

The Liverworts, Mosses and Ferns of Europe Wolfgang Frey 2006 This entirely new English edition, comprehensively revised and edited by T.L. Blockeel, has been translated from German, with some additional text, by the authors. In a single volume, this work provides users with the means of making at least a preliminary identification of any bryophyte or fern which they might encounter in Europe or Macaronesia.

**The Book of Job** Louis de Bernières 1999-01-01 Suffering in an unjust

world is the theme of this book. God punishes Job, a wealthy and pious man, after giving an assertion to Satan that his subject will never curse him. It goes on to explain why Job has suffered, raising ethical questions about the nature of divinity. The text is introduced by author Louis de Bernières

United Nations Reform Spencer Zifcak 2009-06-05 This book examines recent attempts at reform within the United Nations in the wake of the institutional crisis provoked by the invasion of Iraq. It contends that efforts at reform have foundered owing to fundamental and bitter political disagreements between the nations of the global North and South. Following profound discord in the Security Council in the lead up to the US-led invasion of Iraq in 2003, this book considers the ambitious programme of reform instigated by then serving UN Secretary-General Kofi Annan. The author of this highly topical work, Spencer Zifcak, subjects six of Annan's principal proposals for reform to scrutiny: the reform of the Security Council, the General Assembly, and the Human Rights Council, and suggested alterations to international law with respect to the use of force in international affairs, the 'responsibility to protect', and UN strategies to counter global terrorism. On the basis of these detailed case-studies, the book demonstrates why so few proposals for reform were eventually adopted. It argues that the principal reason for this failure was that nations of the North and South could not agree as to the merits of the reforms proposed, exposing the sharply differing visions held by member states for a future and improved United Nations. Founded upon extensive interviews with diplomats at the United Nations, the book provides a rare 'insider' account of UN politics and practice. It will be of vital interest to students, scholars and practitioners of International Relations, International Law, and International Institutions.

**Michel Foucault and Theology** James Bernauer 2017-03-02 Whilst Foucault's work has become a major strand of postmodern theology, the wider relevance of his work for theology still remains largely unexamined. Foucault both engages the Christian tradition and critically challenges its disciplinary regime. Michel Foucault and Theology brings together a selection of essays by leading Foucault scholars on a variety of themes within the history, thought and practice of theology. Revealing the diverse ways that the work of Michel Foucault (1926-1984) has been employed to rethink theology in terms of power, discourse, sexuality and the politics of knowledge, the authors examine power and sexuality in the church in late antiquity, (Castelli, Clark, Schuld), raise questions about the relationship between theology and politics (Bernauer, Leezenberg, Caputo), consider new challenges to the nature of theological knowledge in terms of Foucault's critical project (Flynn, Cutrofello, Beadoin, Pinto) and rethink theology in terms of Foucault's work on the history of sexuality (Carrette, Jordan, Mahon). This book demonstrates, for the first time, the influence and growing importance of Foucault's work for contemporary theology.

My Enemy, My Self Yoram Binur 1990 Yoram Binur, a respected Israeli journalist, had been working the Arab beat for several years. He decided to experience first-hand the harsh realities of Arabic life in Israel by posing as an Arab. His dramatic journey, during which he endured scorn, degradation, searches by abusive authorities, and constant fear, is portrayed in this captivating book.

**Affect in Language Learning** Jane Arnold 1999-01-14 The affective domain and the emotional factors which influence language learning have been of interest in the field of language teaching for a number of years. By proposing a holistic approach to the learning process, this volume takes the position that the language learning experience will be much more effective when both affect and cognition are considered. The eighteen chapters discuss issues such as memory, anxiety, self-esteem, facilitation, autonomy, classroom activities, and assessment from the perspective of affect. Affect in Language Learning will be of interest to teachers-in-preparation, teachers, teacher educators, curriculum designers, programme administrators and researchers and to those second language teaching professionals who wish to improve language teaching through a greater awareness of the role affect plays.

**Foreign Law in Civil Litigation** Sofie Geeroms 2004-01-29 This work provides an analysis of how foreign law should be pleaded and dealt with in the litigation process of another country. What weight should the trial court give to the relevant foreign law, and how should it decide what the

foreign law actually is? The way foreign law is procedurally treated in court indicates to a certain extent the degree of tolerance of a legal system towards foreign ideas. The book compares how these issues are handled in different national systems, with particular focus upon civil litigation rules in the US, UK, France, Germany, the Netherlands, and Belgium.

**Stravinsky** Stephen Walsh 2020-07-15 Widely regarded the greatest composer of the twentieth century, Igor Stravinsky was central to the development of modernism in art. Deeply influential and wonderfully productive, he is remembered for dozens of masterworks, from *The Firebird* and *The Rite of Spring* to *The Rake's Progress*, but no dependable biography of him exists. Previous studies have relied too heavily on his own unreliable memoirs and conversations, and until now no biographer has possessed both the musical knowledge to evaluate his art and the linguistic proficiency needed to explore the documentary background of his life--a life whose span extended from tsarist Russia to Switzerland, France, and ultimately the United States. In this revealing volume, the first of two, Stephen Walsh follows Stravinsky from his birth in 1882 to 1934. He traces the composer's early Russian years in new and fascinating detail, laying bare the complicated relationships within his family and showing how he first displayed his extraordinary talents within the provincial musical circle around his teacher, Nikolay Rimsky-Korsakov. Stravinsky's brilliantly creative involvement with the Ballets Russes is illuminated by a sharp sense of the internal artistic politics that animated the group. Portraying Stravinsky's circumstances as an émigré in France trying to make his living as a conductor and pianist as well as a composer while beset by emotional and financial demands, Walsh reveals the true roots of his notorious obsession with money during the 1920s and describes with sympathy the nature of his long affair with Vera Sudeykina. While always respecting Stravinsky's own insistence that life and art be kept distinct, Stravinsky makes clear precisely how the development of his music was connected to his life and to the intellectual environment in which he found himself. But at the same time it demonstrates the composer's remarkably pragmatic psychology, which led him to consider the welfare of his art to be of paramount importance, before which everything else had to give way. Hence, for example, his questionable attitude toward Hitler and Mussolini, and his reputation as a touchy, unpredictable man as famous for his enmities as for his friendships. Stephen Walsh, long established as an expert on Stravinsky's music, has drawn upon a vast array of material, much of it unpublished or unavailable in English, to bring the man himself, in all his color and genius, to glowing life. Written with elegance and energy, comprehensive, balanced, and original, Stravinsky is essential reading

for anyone interested in the adventure of art in our time. Praise from the British press for Stephen Walsh's *The Music of Stravinsky* "One of the finest general studies of the composer." --Wilfrid Mellers, composer, *Times Literary Supplement* "The beautiful prose of *The Music of Stravinsky* is itself a fund of arresting images. For those who already love Stravinsky's music, Walsh's essays on each work will bring a smile of recognition and joy at new kernels of insight. For those unfamiliar with many of the works he discusses, Walsh's commentaries are likely to whet appetites for performances of the works." --John Shepherd, *Notes* "This book sent me scurrying back to the scores and made me want to recommend it to other people. Above all, it is a good read." --Anthony Pople, *Music and Letters*

The War for Gaul Julius Caesar 2021-07-13 "Imagine a book about an unnecessary war written by the ruthless general of an occupying army - a vivid and dramatic propaganda piece that forces the reader to identify with the conquerors and that is designed, like the war itself, to fuel the limitless political ambitions of the author. Could such a campaign autobiography ever be a great work of literature - perhaps even one of the greatest? It would be easy to think not, but such a book exists -and it helped transform Julius Caesar from a politician on the make into the Caesar of legend. This remarkable new translation of Caesar's famous but underappreciated *War for Gaul* captures, like never before in English, the gripping and powerfully concise style of the future emperor's dispatches from the front lines in what are today France, Belgium, Germany, and Switzerland. While letting Caesar tell his battle stories in his own way, distinguished classicist James O'Donnell also fills in the rest of the story in a substantial introduction and notes that together explain why *Gaul* is the "best bad man's book ever written"--A great book in which a genuinely bad person offers a bald-faced, amoral description of just how bad he has been. Complete with a chronology, a map of Gaul, suggestions for further reading, and an index, this feature-rich edition captures the forceful austerity of a troubling yet magnificent classic - a book that, as O'Donnell says, 'gets war exactly right and morals exactly wrong.'" -- Front jacket flap

**Human Zoos** Musée du quai Branly 2011 *Human Zoos* offers a fascinating, sobering and macabre tour of man's exploitation of man--that is, Western man's exploitation of non-Western men and women--as recorded throughout the early history of photography, from the 1860s to the 1930s and the invention of "humane exhibiting" of nonwhite persons. Freak shows, the circuses of Buffalo Bill and P.T. Barnum and European colonial exhibitions provided the occasions for most of these images, several of which were incorporated into posters, postcards and other ephemera, designed with an improbable jauntiness. *Human Zoos* traces the evolution of such paradigmatic conceptions as "specimen," "savage" and "native" for the designation of peoples as various as Native Americans, Asians and Africans from all corners of the continent. As horrific and compelling as it is brilliantly researched and compiled, this volume unflinchingly surveys the very recent history of the West's arrogant abuse of those deemed to fall outside its brutal terms of civilization.

*Goodbye, Children* Louis Malle 1988 Provides the screenplay of Louis Malle's film about the friendship between a young Catholic boy and his Jewish friend, who is sent off to the Nazi death camps.

*Food Composition Data* H. Greenfield 2012-11-02 About twenty years ago, there was a recognition in Europe that real benefits would flow from coordinating the manner in which food composition tables were produced in the various countries of Europe. Subsequent development of computerised nutritional data bases has further highlighted the potential advantages of working together. Such cooperation could lead to improved quality and compatibility of the various European nutrient data bases and the values within them. This realisation was one of the driving forces behind the development of the Eurofoods initiative in the 1980's when those people in Europe interested in data on food composition began working together. This initiative received further impetus with the establishment of the Eurofoods-Enfant Concerted Action Project within the framework of the FLAIR (Food-Linked Agro-Industrial Research) Programme of the Commission of the European Communities. It was quickly recognised that the draft guidelines for the production, management and use of food composition data which had been prepared under the aegis of INFOODS (International Network of Food Data Systems, a project of the United Nations University), would be especially applicable to the objectives of the Concerted Action. The guidelines have been written by two recognised experts. Many people associated with FLAIR Eurofoods-Enfant have added constructive criticism and advice to that offered previously by those associated with INFOODS. Thus the guidelines are backed by a consensus in the community of those responsible for the production and use of food composition tables and nutrient data bases.
