The Self and Its Pleasures Carolyn J. Dean 2016-11-01 Why did France spawn the radical poststructuralist rejection of the humanist concept of 'man' as a rational, knowing subject? In this innovative cultural history, Carolyn J. Dean sheds light on the origins of poststructuralist thought, paying particular attention to the reinterpretation of the self by Jacques Lacan, Georges Bataille, and other French thinkers. Arguing that the widely shared belief that the boundaries between self and other had disappeared during the Great War helps explain the genesis of the new concept of the self, Dean examines an array of evidence from medical texts and literary works alike. *The Self and Its Pleasures* offers a pathbreaking understanding of the boundaries between theory and history.

Collected Works of Paul Valéry, Volume 6 Paul Valéry 1989-07-21

Although not autobiographical in any usual sense, Valéry's novel is profoundly personal. Monsieur Teste reflects Valéry's preoccupation with the phenomenon of a mind detached from sensibility, yet he is also an ordinary fictional character. This volume includes "Snapshots of Monsieur Teste," excerpts from Valéry's Cahiers.

On the Postcolony Achille Mbembe 2001-06-17 Refreshing a stale debate about power in the postcolonial state, this book addresses a topic debated across the humanities and social sciences: how to define, discuss, and address power and the subjective experience of ordinary people in the face of power?

The Origin of Language Merritt Ruhlen 2023 "What can the classification of languages tell us about human origins and human prehistory? This book presents a popular account of the origin of language. It is intended for an audience with no prior knowledge of comparative linguistics, genetics or archaeology. The present volume is a reprint of the 2009 second edition of the book, and includes the text of the first edition (1994) with minor modifications, as well as the scientific evidence for monogenesis, and a Postscript recounting developments in the field since the original publication of the book"--

Some Dream for Fools Faïza Guène 2010-08-09 A novel of a twentysomething, Algerian-born woman living on the edge in France, from "one of the hottest literary talents of multicultural Europe" (Sunday Telegraph). When Ahlème's mother was killed in a village massacre, she left Algeria for France with her father and brother and never returned. Now, more than a decade later, she is practically French, yet in many ways she remains an outsider. Ahlème's dreams for a better life have been displaced by the harsh realities she faces every day. Her father is unable to work after an accident at his construction site and her brother boils over with adolescent energy, teetering dangerously close to choosing a life of crime. As a temporary resident, Ahlème could at any moment be sent back to a village and a life that are now more foreign than Paris. In *Some Dream for Fools*, Faïza Guène explores the disparity between the expectations and limitations of immigrant life in the West and tells a remarkable story of one woman's courage to dream. "With a keen eye for detail and a sharp narrative tone, [Guène] gives voice to a hurt too long unrecognized. . . . [She] takes us into another world—a world that no nation today can afford to ignore." —The Christian Science Monitor

Kiffe Kiffe Tomorrow Faïza Guène 2006-07-03 A "touching, furious, sharp, and very funny" novel of an immigrant teenage girl finding her own identity in France (Booklist). The Paradise projects are only a few metro stops from Paris, but it feels like a different world. Doria's father, aka the Beard, has headed back to their hometown in Morocco, leaving her and her mom to cope with their mektoub, their destiny, alone. They have a little help—from a social worker sent by the city, a psychiatrist sent by the school, and a thug friend who recites Rimbaud. It seems like fate has dealt them an impossible hand, but Doria might still make a new life—"with bravado, humor, and a healthy dose of rage" (St. Petersburg Times). "[A] sassy, spunky tale . . . Doria has what it takes to storm any barricade." —The Hartford Courant "[Doria is] as likable as Holden Caulfield or Prep's Lee Fiora. Readers will cheer. Highly recommended." —Library Journal, starred review "A promising addition to the world's literary voices." —The Miami Herald "Moving and irreverent, sad and funny, full of rage and intelligence. Her voice is fresh, and her book a delight." —Laila Lalami, bestselling author of *The Moor's Account*

Judaeo-Christian Intellectual Culture in the Seventeenth Century A.P. Coudert 1999-06-30 MURIEL MCCARTHY This volume originated from a seminar organised by Richard H. Popkin in Marsh's Library on July 7-8, 1994. It was one of the most stimulating events held in the Library in recent years. Although we have hosted many special seminars on such subjects as rare books, the Huguenots, and Irish church history, this was the first time that a seminar was held which was specifically related to the books in our own collection. It seems surprising that this type of seminar has never been held before although the reason is obvious. Since there is no printed catalogue of the Library scholars are not aware of its contents. In fact the collection of books by late seventeenth and early eighteenth century European authors on, for example, such subjects as biblical criticism, political and religious controversy, is one of the richest parts of the Library's collections. Some years ago we were informed that of the 25,000 books in Marsh's at least 5,000 English books or books printed in England were printed between 1640 and 1700.

A Research Agenda For DSM V David J. Kupfer 2008-08-13 In the ongoing quest to improve our psychiatric diagnostic system, we are now searching for new approaches to understanding the etiological and pathophysiological mechanisms that can improve the validity of our diagnoses and the consequent power of our preventive and treatment interventions -- venturing beyond the current DSM paradigm and DSM-IV framework. This thought-provoking volume -- produced as a partnership between the American Psychiatric Association, the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse -- represents a far-reaching attempt to stimulate research and discussion in the field in preparation for the eventual start of the DSM-V process, still several years hence. The book Explores a variety of basic nomenclature issues, including the desirability of rating the quality and quantity of information available to support the different disorders in the DSM in order to indicate the disparity of empirical support across the diagnostic system. Offers a neuroscience research agenda to guide development of a pathophysiologically based classification for DSM-V, which reviews genetic, brain imaging, postmortem, and animal model research and

includes strategic insights for a new research agenda. Presents highlights of recent progress in developmental neuroscience, genetics, psychology, psychopathology, and epidemiology, using a bioecological perspective to focus on the first two decades of life, when rapid changes in behavior, emotion and cognition occur. Discusses how to address two important gaps in the current DSM-IV: (1) the categorical method of diagnosing personality disorders and their relationship with Axis I disorders, and (2) the limited provision for the diagnosis of relational disorders -- suggesting a research agenda for personality disorders that considers replacing the current categorical approach with a dimensional classification of personality. Reevaluates the relationship between mental disorders and disability, asserting that research into disability and impairment would benefit from the diagnosis of mental disorders be uncoupled from a requirement for impairment or disability to foster a more vigorous research agenda on the etiologies, courses, and treatment of mental disorders as well as disabilities and to avert unintended consequences of delayed diagnosis and treatment. Examines the importance of culture in psychopathology and the main cultural variables at play in the diagnostic process, stating that training present and future professionals in the need to include cultural factors in the diagnostic process is a logical step in any attempt to develop comprehensive research programs in psychology, psychiatry, and related disciplines. This fascinating work, with contributions from an international group of research investigators, reaches into the core of psychiatry, providing invaluable background and insights for all psychology and psychiatry professionals -- food for thought and further research that will be relevant for years to come.

The Advanced Theory of Language as Choice and Chance Gustav Herdan 2012-12-06 In trying to give an account of the statistical properties of language, one is faced with the problem of having to find the common thread which would show the many and multifarious forms of language statistic- embodied in scattered papers written by linguists, philosophers, mathematicians, engineers, each using his own professional idiom - as belonging to one great whole: quantitative linguistics. This means that the investigator has to find the system of this branch of science which would enable him to arrange the vast material in an orderly fashion, and present it as an organic whole. Such a system is conceived in this book, as comprising the following disciplines as the four main branches of literary statistics: Statistical Linguistics, Stylostatistics, Optimal Systems of Language Structure, and Linguistic Duality (Parts I-IV). The Introduction is meant to define the position of the book with regard to both, linguistics and statistics.

The Surnames of Ireland Edward MacLysaght 1988-12-01 Ireland was one of the earliest countries to evolve a system of hereditary surnames. More than 4,000 Gaelic, Norman and Anglo-Irish surnames are listed in this book, giving a wealth of information on the background and location of Irish families. Edward MacLysaght was a leading authority on Irish names and family history. He served as Chief Herald and Genealogical Officer of the Irish Office of Arms. He was also Keeper of Manuscripts of the National Library of Ireland and was Chairman of the Manuscripts Commission. This book, which was first published in 1957 and now is in its sixth edition, is being reprinted for the fourth time and remains the definitive record of Irish surnames, their genealogy and their origins.

Waiting For The Wild Beasts To Vote Ahmadou Kourouma 2011-01-25 Ahmadou Kourouma's remarkable novel is narrated by Bingo, a West African sora - storyteller and king's fool. Over the course of five nights he tells the life story of Koyaga, President and Dictator of the Gulf Coast. Orphaned at the age of seven, Koyaga grows up to be a terrible hunter; he fights mythical beasts, and is a shape-shifter, capable of

changing himself into beasts and birds. He fights in the French colonial armies, in Vietnam and Algeria, but on his return he mounts a coup and becomes ruler and dictator of the Gulf Coast. For thirty years he runs a corrupt but 'clean' state, surviving repeated assassination attempts and gaining support and investment from abroad. But when the 'First World' decides it no longer want to support dictatorships and call for democracy, he needs another ruse to maintain himself in power... Part magic, part history, part savage satire, *Waiting for the Wild Beasts to Vote* is nothing less than a history of post-colonial Africa itself.

Narrative Discourse Gérard Genette 1983 Genette uses Proust's *Remembrance of Things Past* as a work to identify and name the basic constituents and techniques of narrative. Genette illustrates the examples by referring to other literary works. His systemic theory of narrative deals with the structure of fiction, including fictional devices that go unnoticed and whose implications fulfill the Western narrative tradition.
