Lire l'Histoire générale des Antilles de J.-B. Du Tertre Christina Kullberg 2020-09-25

Cette étude propose d'examiner les ramifications historiques de l'exotisme à partir d'une lecture critique de l'Histoire générale des Antilles (1654/1667-71) écrite par le missionnaire dominicain, Jean-Baptiste Du Tertre. En procédant d'une analyse littéraire, notre étude suggère une reconfiguration de l'exotisme basée à la fois sur la théorisation contemporaine et sur

le contexte historique et l'esthétique de l'époque. Notre travail se veut donc à la fois théorique en offrant une analyse critique des différentes orientations de l'exotisme ; et historique, en présentant une lecture approfondie d'une œuvre dont l'importance est considérable aussi bien pour l'histoire de la littérature française et antillaise que pour l'histoire de l'anthropologie. À cet égard, cette étude fournira aussi une exploration de la toute première colonisation française des îles et de la manière dont elle a été représentée. This book examines the historical ramifications of the concept of exoticism through a literary analysis of *Histoire générale des Antilles* (1654/1667-71) written by Dominican missionary Jean-Baptiste Du Tertre. The study gives a thorough account of the early French colonization of the islands and the ways in which this violent process of cultural encounters was represented. It argues for the necessity to reconfigure the notion of exoticism, both by revisiting contemporary theorization and by contextualizing it in regard to the history and aesthetics of the times. The study is thus both theoretical, in proceeding by a critical reading of different orientations of exoticism, and historical in offering an in-depth study of an author and a period that have received little attention despite their impact on French Caribbean literature and on the history of anthropology.

A History of the French in London Debra Kelly 2013 This book examines, for the first time, the history of the social, cultural, political and economic presence of the French in London, and explores the multiple ways in which this presence has contributed to the life of the city. The capital has often provided a place of refuge, from the Huguenots in the 17th century, through the period of the French Revolution, to various exile communities during the 19th century, and on to the Free French in the Second World War. It also considers the generation of French citizens who settled in post-war London, and goes on to provide insights into the contemporary French presence by assessing the motives and lives of French people seeking new opportunities in the late 20th and early 21st

centuries. It analyses the impact that the French have had historically, and continue to have, on London life in the arts, gastronomy, business, industry and education, manifest in diverse places and institutions from the religious to the political via the educational, to the commercial and creative industries.

Cuvier's History of the Natural Sciences

Georges Cuvier 2019-10-24 Here, for the first time in English, is Georges Cuvier's extraordinary "History of the Natural Sciences from Its Origin to the Present Day." Based on a series of public lectures presented by Cuvier from 1829 to 1832, this first of a five-volume series, translated from the original French and heavily annotated with commentary, is a detailed chronological survey of the natural sciences spanning more than three millennia. It is truly astonishing in its detail and scope. Cuvier was fluent in many languages, English, German, Spanish, and certainly Latin, in addition to French. He was therefore well prepared to investigate and interpret firsthand the scientific literature of Europe as a whole. The work is an affirmation of Cuvier's vast encyclopedic knowledge, his complete command of the scientific and historical literature, and his incomparable memory. This history is remarkable also for providing in one place a large set of useful references to a vast ancient literature that is not easily found anywhere else. This huge body of information provides us furthermore with unique insight into Cuvier's concept of the natural sciences, and to the vast breadth and progress of this human endeavor. With this work, Cuvier fills an important gap in philosophical thought between the time of Carl Linnaeus and Charles Darwin.
