Sustainable Food Supply Chains Riccardo Accorsi 2019-06-12 Sustainable Food Supply Chains: Planning, Design, and Control through Interdisciplinary Methodologies provides integrated and practicable solutions that aid planners and entrepreneurs in the design and optimization of food production-distribution systems and operations and drives change toward sustainable food ecosystems. With synthesized coverage of the academic literature, this book integrates the quantitative models and tools that address each step of food supply chain operations to provide readers with easy access to support-decision quantitative and practicable methods. Broken into three parts, the book begins with an introduction and problem statement. The second part presents quantitative models and tools as an integrated framework for the food supply chain system and operations design. The book concludes with the presentation of case studies and applications focused on specific food chains. Sustainable Food Supply Chains: Planning, Design, and Control through Interdisciplinary Methodologies will be an indispensable resource for food scientists, practitioners and graduate students studying food systems and other related disciplines. Contains quantitative models and tools that address the interconnected areas of the food supply chain Synthesizes academic literature related to sustainable food supply chains Deals with interdisciplinary fields of research (Industrial Systems Engineering, Food Science, Packaging Science, Decision Science, Logistics and Facility Management, Supply Chain Management, Agriculture and Land-use Planning) that dominate food supply chain systems and operations Includes case studies and applications

The Palais Bulles of Pierre Cardin Jean-Pascal Hesse 2012 On the cliffs of the French Riviera, le Palais Bulles (the Bubble Palace) is a futuristic yet timeless living sculpture. Innovative French couturier Pierre Cardin acquired this conceptual home as a showplace for his collections. This book explores the incredible

architectural achievement and celebrates the adventurous decorative spirit that the legendary fashion designer has brought to life within its walls.

Models in Geomorphology Michael J. Woldenberg 2020-05-10 This book, first published in 1985, arises from the 14th Binghamton Geomorphology Symposium. The chapters here illustrate the use of models in various areas of research in geomorphology. **Crazy Night** Tennessee Williams 2016-06-07 From the renowned American playwright Tennessee Williams, a glimpse of college life on the eve of graduation. It's the last day of the academic year, and the students of a small, mid-western university are preparing for a bacchanalian celebration called Crazy Night. Our chaperone for the evening is Phil, a freshman on the verge of flunking out, who roves the fraternities in search of beer, women, and the meaning of life. It's just after the Great Crash, with Prohibition in sobering effect—a bleak time for college graduates and drop-outs, who have one more night to do everything, before they enter a world that offers them nothing. "Crazy Night" by Tennessee Williams is one of 20 short stories within Mulholland Books's Strand Originals series, featuring thrilling stories by the most legendary authors in the Strand Magazine archives. Badawi Mohed Altrad 2016-09-06 "Poetically depicts a Bedouin boy's extended coming of age and the uneasy navigation of his transition from provincial Syria to the West." —Publishers Weekly Published to wide critical acclaim in France, Badawi is Mohed Altrad's heartrending debut novel, inspired by the author's own narrative arc from Bedouin orphan to engineer and finally billionaire businessman. In the Syrian desert, a young boy watches as his mother dies. She was a repudiated woman, abandoned by the boy's powerful father, leaving Maïouf to his scornful grandmother. She wants Maïouf to carry on Bedouin tradition as a shepherd. But from the first time he sneaks off to the white-

walled schoolhouse to watch the other children learn, Maïouf envisions a different future for himself. This is one extraordinary child's story of fighting for an education—and a life—he was never supposed to have, from a tiny desert village to the city of Raqqa, from the university halls of Montpellier on to the oil fields of Abu Dhabi. With each step forward, Maïouf feels the love of his youth—a steadfast young Syrian woman named Fadia—and the shifting, haunted sands of his native village pulling him back toward the past he thought he had left behind. "In this tale of a boy caught between worlds, Altrad brings a sparse, lyrical quality to his prose that at times verges on the poetic." —Los Angeles Review of Books

The Scientific Nature of Geomorphology

Colin E. Thorn 1996

Geomorphology and Natural Hazards

M. Morisawa 2013-10-22 The theme of this proceedings volume is the latest research on geomorphic characteristics and processes associated with natural hazards. Presentations cover a gamut of types of disasters throughout the world, describing research and applications of studies in the U.S. and other countries. The book begins with a collection of papers giving a basic background and philosophy of approaching an understanding of natural disasters. These are followed by papers on natural hazards in coastal areas, mountainous regions, landslides, flooding and the detrimental effects of permafrost. The book should prove valuable in gaining an insight of natural hazards and their geomorphic relations, which is imperative for prudent environmental planning in coping with disasters.

Thresholds in Geomorphology

Donald R. Coates 2020-05-10 This book, first published in 1980, is a timely and comprehensive appraisal of thresholds in geomorphology. The papers, arising from the 9th Binghamton Geomorphology Symposium, form the cornerstone of a subject that is increasingly important in geomorphology. This book analyses the historical background to thresholds and geomorphology, as well as fluvial landforms, hydrogeologic regimes and other processes, and the impact of man.

Soils and Landscape Evolution

P. L. K. Knuepfer 1990 The investigation of how landforms develop and of rates of processes has traditionally relied on the study of surfaces and sediments. Soils that have developed on geomorphic surfaces have the potential to record more accurately the history of landscape development. Historically, however, soils have been largely ignored by most geomorphologists in favour of concentration on stratigraphic and sedimentologic relationships (i.e. the deposits) or morphometric (i.e. the form of the landscape) studies. Only recently have most geomorphologists and geologists begun to appreciate the importance and utility of soils in studies of landforms. This book focuses on the relationship between soils and landforms and landscapes, mostly in non-glaciated areas, thus filling a major gap in the geomorphology literature. It is directed both at geomorphologists (including geologists and geographers) and pedologists.

Between Europe and Asia Mark Bassin 2015-07-17 Between Europe and Asia analyzes the origins and development of Eurasianism, an intellectual movement that proclaimed the existence of Eurasia, a separate civilization coinciding with the former Russian Empire. The essays in the volume explore the historical roots, the heyday of the movement in the 1920s, and the afterlife of the movement in the Soviet and post-Soviet periods. The first study to offer a

multifaceted account of Eurasianism in the twentieth century and to touch on the movement's intellectual entanglements with history, politics, literature, or geography, this book also explores Eurasianism's influences beyond Russia. The Eurasianists blended their search for a primordial essence of Russian culture with radicalism of Europe's interwar period. In reaction to the devastation and dislocation of the wars and revolutions, they celebrated the Orthodox Church and the Asian connections of Russian culture, while rejecting Western individualism and democracy. The movement sought to articulate a non-European, non-Western modernity, and to underscore Russia's role in the colonial world. As the authors demonstrate, Eurasianism was akin to many fascist movements in interwar Europe, and became one of the sources of the rhetoric of nationalist mobilization in Vladimir Putin's Russia. This book presents the rich history of the concept of Eurasianism, and how it developed over time to achieve its present form.

A Journey Through Qualitative Research

Stéphanie Gaudet 2018-02-12 This hands-on guide takes students from start-to-finish through the research process while showcasing the complexities and interrelationships of different methods, schools of thought, and associated analytical strategies. Encouraging students to think of qualitative research as a flexible, cyclical process rather than a linear one, this book offers a panoramic strategy and dynamic approach to qualitative research that accommodates the fluid nature of research and accounts for lessons learned through lived experience. With an emphasis on the analysis stage—within case, across case, and the dialogue between these insights and existing literature—it uses concrete applications to show how your methodological decisions translate into practice. It covers: Forming, defending, and evaluating research questions Choosing a research approach Ensuring ethically sound research Collecting quality data Analyzing data in layers Reporting research results Through a conversational tone that unpacks key vocabulary and acts as a companion supervisor, this book equips you to traverse every step of the qualitative research journey.

The Real Book - Volume II (Songbook) Hal

Leonard Corp. 2006-02-01 (Fake Book). The Real Books are the best-selling jazz books of all time. Since the 1970s, musicians have trusted these volumes to get them through every gig, night after night. The problem is that the books were illegally produced and distributed without any copyrights or royalties paid to the master composers who created these musical canons. Hal Leonard is very proud to present the first legitimate and legal editions of these books ever produced. You won't even notice the difference...the covers look the same, the engravings look the same, the songlist is nearly identical, and the price remains fair even on a musician's salary! But every conscientious musician will appreciate that these books are now produced legally and ethically, benefitting the songwriters that we owe for some of the greatest music ever written! 400 songs, including: Air Mail Special * Birdland * Bye Bye Blackbird * Caravan * Doxy * Fly Me to the Moon (In Other Words) * Georgia * Girl Talk * In Walked Bud * I Remember You * I Thought About You * The Jody Grind * Just the Way You Are * Killer Joe * Little Sunflower * Mercy, Mercy, Mercy * Moanin' * The Nearness of You * Now's the Time * Old Devil Moon * Phase Dance * St. Thomas * Speak Low * Stardust * Tangerine * Tenor Madness * Watch What Happens * Whisper Not * Willow Weep for Me * Yardbird Suite * and more.

2023-05-16 Michael "River" Corbett Has been in a locked psych unit and heavily drugged since the murder of his pregnant wife. He can't remember what truly happened that night, only waking on the ground outside his burning house, his clothes reeking of gas, an empty can beside him. Found not guilty by reason of insanity, he's been locked up ever since. But now someone is trying to kill him, so he has to break out of the mental ward. A hunted fugitive, all River wants is the truth. Cassandra "Jax" Jackson She knows she's putting her career on the line when she encounters this desperate stranger hiding out in

the house that came with her new job, and doesn't turn him in. But there's something in River's that convinces her to believe him. As the incoming police chief of Blackberry Vermont, she has a pretty conflict of interest. But when she looks at River, she doesn't see a crazed killer on the run; she sees a fellow cop in trouble, and for the life of her, she can't stop herself from helping him. Dawn Jones The daughter of criminally insane cult leader Mordecai Young, Jax's young friend is haunted by voices she doesn't want to hear and apparitions she doesn't want to see. But she can no longer ignore the "gift" her twisted father passed to her before he died—because unless she listens to what the dead are telling her, Jax might be doomed to join them.

Weathering and Landscape Evolution A.

Turkington 2005-08-04 In recognition of the fundamental control exerted by weathering on landscape evolution and topographic development, the 35th Binghamton Geomorphology Symposium was convened under the theme of Weathering and Landscape Evolution. The papers and posters presented at the conference imparted the state-of-the-art in weathering geomorphology, tackled the issue of scale linkage in geomorphic studies and offered a vehicle for interdisciplinary communication on research into weathering and landscape evolution. The papers included in this book are encapsulated here under the general themes of weathering mantles, weathering and relative dating, weathering and denudation, weathering processes and controls and the 'big picture'. * Contains 15 papers on the techniques and methodologies of research * Provides an up-to-date overview of various aspects of weathering and landscape evolution complemented by a number of excellent case studies * Contains a wealth of basic field data and relevant information

Tectonic Geomorphology John Tilton Hack 1984

Biogeomorphology, Terrestrial and Freshwater Systems C.R. Hupp 2012-12-02

Biogeomorphology, a relatively new term, refers

to relations between the biota and geomorphic form and process. Ecology is the study of organisms in relation to their physical and biotic environment. Thus, ecogeomorphology could have been an equally acceptable name for this publication which stresses the ecological aspects of the larger field of biology. Most of the articles relate vegetation to fluvial geomorphology, erosion, and sedimentation. However, articles showing the significance of animal ecological studies and their bearing on geomorphic form and process are also included. Geographically the papers range from arid areas in the American Southwest and Israel to the new world tropics. Most articles, however, are concerned with temperate areas of North America and Western Europe. This is among the first books to approach the role that biota and ecology play in geomorphic processes and should be on the shelf of every landscape ecologist.

Young Chekhov Anton Chekhov 2015-09-29 Young Chekhov contains a trilogy of plays by the Russian writer Anton Chekhov, written as he emerged as the greatest playwright of the late nineteenth century. The three works, *Platanov*, *Ivanov* and *The Seagull*, in contemporary adaptations by David Hare, will be staged at the Chichester Festival Theatre in the summer of 2015.

Groundwater as a Geomorphic Agent R.G. LaFleur 2020-05-11 This book, first published in 1984, has both a geomorphic and a hydrologic message. It examines and analyses the role of groundwater in landscapes in a series of articles by authors of diverse backgrounds and experience.

MAX Phases Michel W. Barsoum 2013-11-13 In this comprehensive yet compact monograph, Michel W. Barsoum, one of the pioneers in the field and the leading figure in MAX phase research, summarizes and explains, from both an experimental and a theoretical viewpoint, all the features that are necessary to understand and apply these new materials. The book covers

elastic, electrical, thermal, chemical and mechanical properties in different temperature regimes. By bringing together, in a unified, self-contained manner, all the information on MAX phases hitherto only found scattered in the journal literature, this one-stop resource offers researchers and developers alike an insight into these fascinating materials.

A Short History of Geomorphology Keith J. Tinkler 2020-05-10 This book, first published in 1985, is a comprehensive guide to the main ideas in the history of geomorphology. It traces the development of thinking on landforms, with material ranging from the ancient world to the present day. The main areas covered are the Renaissance, the explosive growth of the Natural Sciences in the nineteenth century and the impact of the Second World War. The papers and theories of specialists like James Hutton, John Playfair and W.M. Davies are presented and discussed and the final chapters reflect on future change, based on the past and speculation on possible developments. Balance is maintained between the dual importance and dominance of English and North American contributions to the subject, and quite substantial research was undertaken to provide a more complete approach to some areas hitherto neglected.

К Истории Славистики В Неславянских Странах, Russe Giovanna Brogi Bercoff 2005 This volume, published nineteen years after the "Contributions on the History of Slavic Studies in Non-Slavic Countries" ("Beitragen zur Geschichte der Slawistik in nichtslawischen Landern", Vienna, 1985, Schriften der Balkankommission, Linguistische Abteilung, Bd. 30), is witness to the changing concept of "Slavic Studies" as well as the reforms in methods and interests in regard to the Slavic world in a period in which Europe finds itself in massive transformation. In addition to traditional disciplines such as linguistics, literature and history, areas such as sociology, the fine arts and theatre and other interdisciplinary subjects are also dealt with. Although some of the contributions in the earlier volume have not been continued or have only been partially brought up to date, several countries that were not included are now represented with the first attempt at a synthesis: Greece, Italy, Sweden, Switzerland, Lithuanian, Estonia and Rumania.

Though more comprehensive than the first volume, the second volume is a torso and not the testament of a finite period or the inventory of a "Museum of Slavic Studies". In its imperfection but ambitiousness, it displays the astonishing vitality of a discipline that doesn't forsake its origins, but incorporates all the humanities and social sciences, not holding any aspect of the history of knowledge and its study as superfluous.

MOUNTAIN GEOMORPHOLOGY Phil Owens 2014-02-04 Mountains represent one of the most inspiring and attractive natural features on the surface of the earth. Visually, they dominate the landscape. However, the increasing realization of the fragility of mountain areas because of changes in land use, management and climate, combined with an understanding of their importance for water and other natural resources, has resulted in a growing interest in mountain environments in recent years. Hence, Mountain Geomorphology represents a timely and unique contribution to the literature. Written by a team of international experts, this book is divided into three sections, which consider historical, functional and applied mountain geomorphology from both global and local perspectives. Historical mountain geomorphology focuses on the evolution of landforms. Functional mountain geomorphology emphasises the interaction between processes and landforms, while applied mountain geomorphology concerns the interrelationships between geomorphological processes and society. Mountain Geomorphology is a valuable source of information for students studying mountain geomorphology, and also for academics and research scientists interested in mountain environments.

The Modernist City James Holston 1989-09-08 The utopian design and organization of Brasília—the modernist new capital of Brazil—were meant to transform Brazilian society. In this sophisticated, pioneering study of Brasília from its inception in 1957 to the present, James Holston analyzes this attempt to change society by building a new kind of city and the ways in which the paradoxes of constructing an imagined future subvert its utopian premises. Integrating anthropology with methods of analysis from architecture, urban

studies, social history, and critical theory, Holston presents a critique of modernism based on a powerfully innovative ethnography of the city.

Space and Time in Geomorphology Colin E.

Thorn 2020-05-10 This book, first published in 1982, is a collection of articles aimed at advancing the field of geomorphology. It starts from the position that a meaningful grasp of landscape evolution would depend upon an understanding of the present spatial distribution of processes and process rates; comparison of spatial versus temporal change; and careful appraisal of the character and composition of the stratigraphic record. Each article uses a data set to address between threshold variability in either a spatial or temporal context, and often both.

Agnès Geoffray Jean-Charles Vergne 2020 Agnès Geoffray est photographe mais une partie significative de l'iconographie qu'elle emploie s'effectue sans la photographie, par la récupération d'images d'archives dont elle n'est pas l'auteur, qui alimentent un travail d'ajustement, de montage, de retouche et de recontextualisation. Il y a donc des images qui, parfois, proviennent de ses propres prises de vues ; il y a des images qu'elle trouve et qu'elle utilise telles quelles ou en leur apportant de très subtiles modifications ; il y a des images agencées en montages cinématographiques. Il y a, aussi, des images manquantes, des œuvres sans images - principalement constituées de textes qui se substituent aux images.

Fundamentals of Geomorphology Richard John Huggett 2011-03-15 This extensively revised, restructured, and updated edition continues to present an engaging and comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. *Fundamentals of Geomorphology* begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss: structure: structural landforms associated with plate tectonics and those associated with volcanoes, impact craters, and folds, faults, and joints process and form: landforms resulting from, or

influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land-surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. *Fundamentals of Geomorphology* provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.

Czechoslovak Diplomacy and the Gulag Milada Polišenská 2016-12-01 After the entry of the Red Army into Czechoslovak territory in 1945, Red Army authorities began to arrest and deport Czechoslovak citizens to labor camps in the Soviet Union. The regions most affected were Eastern and South Slovakia and Prague. The Czechoslovak authorities repeatedly requested a halt to the deportations and that the deported Czechoslovaks be returned immediately. It took a long time before these protests generated any response. *Czechoslovak Diplomacy and the Gulag* focuses on the diplomatic and political aspects of the deportations. The author explains the steps taken by the Czechoslovak Government in the repatriation agenda from 1945 to 1953 and reconstructs the negotiations with the Soviets. The research tries to answer the question of why and how the Russians deported the civilian population from Czechoslovakia which was their allied country already during the war. Key words: 1. World War, 1939-1945—Deportations from Czechoslovakia.

2. Forced labor—Soviet Union—History. 3. Labor camps—Soviet Union—History. 4. Czechs—Soviet Union—History. 5. Slovaks—Soviet Union—History. 6. Czechoslovakia—Foreign relations—Soviet Union. 7.
