Sustainable Branding Pantea Foroudi 2021-01-28 A sustainable brand should integrate environmental, social, economic and issues into its business operations. Sustainable Branding considers how broader perspectives on sustainability and corporate social responsibility can be applied to the practicalities of brand management. By

addressing a range of perspectives and their application to branding, the authors go beyond sustainable branding to question the role brands play in a wider sustainable society. Structured around three core parts - People, Planet and Prosperity - contributions from experts in the field consider the human dimensions of environmental change, identity and reputation, technology and innovation, waste management, public and brand engagement, environmental ecosystems and the circular economy. Combining theoretical insight and empirical research with practical application, each chapter includes real-life international cases and reflective questions to allow discussion, best-practice examples and actionable suggestions on how to implement sustainable branding activities. This book is perfect for academics,

postgraduate and final-year undergraduate students in sustainable branding, sustainable business, corporate social responsibility, brand management and communications. It provides a comprehensive treatment of the nature of relationships between environmental, economic, social, companies, brands, and stakeholders in different areas and regions of the world.

Working Adolescents: Rethinking Education For and On the Job Mary Ann Maslak 2022-03-12 This book offers a new approach to workforce education for youth. It provides meaningful and essential insight into educational systems and practices through cases of vocational and technical education in the People's Republic of China, the Republic of Italy, and the United States of America. The cases describe the history of the multi-faceted vocational systems and provide, in doing so, a springboard for this new work. A conceptual framework

comprised of the cognitive, psychological, and social building blocks of individual development explains the multifaceted dimensions of youth that contribute to the policies and practices of traditional adolescent educational models. The framework extends that base by drawing on a multidisciplinary collection of research from both sociology and business to create a new transdisciplinary model for educational practice. It highlights the important but often under-studied relationship between educational institutions and workplaces. The book culminates in an original model, Community Works, which advances both formal and non-formal educational programming and curricula. The model details a practical program for youth, including roles and responsibilities of all stakeholders, and a curricular map, information on lesson planning, varieties of instructional strategies, and tools for assessment and

evaluation for professionals.

speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . promote the role of formative assessment and formative feedback and its impact on shaping the student learning experience. Presented through the lens of contemporary perspectives, empirical evidence, and case studies across a broad range of subject disciplines, this new edition aims to encourage teaching and support staff to focus on the promotion of student learning through designing and embedding high-impact formative assessment processes and activities. Key content covers: the theoretical and philosophical aspects of formative assessment and formative feedback; the learning environment in which students undertake their learning activities, helping teachers develop appropriate formative assessment and provide effective formative feedback; the impact of formative assessment and formative feedback activities have on learning, teaching, and assessment design, as well as on the academic workload of tutors; the contemporary issues

and challenges currently driving research into formative assessment; the use of technology in formative assessment and how different tools and technologies allow for the provision of effective and efficient formative feedback; the benefits of understanding how students respond to formative assessment and formative feedback as an opportunity to review the effectiveness of the teaching and learning methods and techniques; the integral role of formative assessment and formative feedback plays in postgraduate research settings; and how innovations in formative assessment and feedback inform key developments in large-scale assessment change. Aimed at both experienced and early career practitioners in higher education, this text is ideal reading for educators who wish to see a movement away from a higher education system driven by summative assessment to one where a more holistic approach to education positions learning standards

rather than measurement and grades as central to effective assessment and, crucially, to return to a focus on student learners.

Integrating Transparency in Learning and Teaching (TILT): An Effective Tool for Providing Equitable Opportunity in Higher Education Akella, Devi
2022-04-15 Students of color and those of lower economic backgrounds and of underrepresented groups appear to face a disadvantage when they transition from high schools into colleges. These students tend to have lower academic preparation than white students, which leads to higher levels of stress and anxiety, as well as an increased placement in remedial courses, which negatively impacts their graduation rates. As institutions become aware of

these facts and take appropriate measures to improve educational experiences, they must implement Transparency in Learning and Teaching (TILT) initiatives in order to provide equal access to education. Integrating Transparency in Learning and Teaching (TILT): An Effective Tool for Providing Equitable Opportunity in Higher Education provides information on Transparency in Learning and Teaching (TILT) concepts and how they can be used in course development to improve student learning and performance. It focuses on bringing positive learning experiences to college students, especially first-generation students, which can lead to higher levels of academic success. Learner Interactions in Massive Private Online Courses Di Sun 2022-08-11 By employing learning analytics

methodology and big data in Learning Management Systems (LMSs), this volume conducts data-driven research to identify and compare learner interaction patterns in Massive Private Online Courses (MPOCs). The uncertainties about the temporal and sequential patterns of online interaction, and the lack of specific knowledge and methods to investigate details of LMSs' dynamic interaction traces have affected the improvement of online learning effectiveness. While most research focuses on Massive Open Online Courses (MOOCs), little is investigating the learners' interaction behaviors in MPOCs. This book attempts to fill in the gaps by including research in the past decades, big data in education presenting micro-level interaction traces, analytics-based learner interaction in massive private open courses, and a case study. Aiming to bring greater efficiency and deeper engagement to individual learners, instructors, and administrators, the title

provides a reference to those who need to evaluate their learning and teaching strategies in online learning. It will be particularly useful to students and researchers in the field of Education. This research was funded by Liaoning Social Science Planning Fund Program in China, grant number [L21BSH002].

Adoption of LMS in Higher Educational Institutions of the Middle East

Rashid A. Khan 2020-07-28 This book discusses the adoption of

learning management systems (LMS) in higher education institutions. It presents influential predictors that may impact instructors' behavioral intention to adopt learning management systems in the context of Arab culture, as well as a unique model of technology acceptance that draws on and combines previous technology adoption models (i.e., a modified unified theory of acceptance and use of technology model - UTAUT2). Moreover, this study extends the UTAUT2 model by including Hofstede's (1980) cultural dimensions, and technology awareness as the moderators of the model. It also describes the explanatory technique approach used to collect quantitative data from the instructors at higher education institutions in Saudi Arabia and were analyzed with structural equation modeling using SPSS/Amos software. The findings revealed that facilitating conditions were the strongest predictor of behavioral intention to adopt an LMS, followed by

performance expectancy and hedonic motivation, technology awareness, and cultural dimensions exerted a moderating influence on instructors' behavioral intention to use LMS in their teaching. By including new constructs, this becomes the first study of its kind exploring instructors' use of LMS in Higher Educational Institutions of Saudi Arabia and other countries of the Middle East. It offers practical insights for a broad range of researchers and professionals at higher education institutions and serves as a reference guide for designers of learning management systems (e.g., blackboard systems), policymakers, and the Ministry of Education staff.

The volume begins with discussions of philosophical and theoretical models of PBL and is followed by case studies from contributors from a range of learning contexts and geographic regions which demonstrate these models in practice, with a focus on the implementation of technology in such instances. The book also introduces resources for aligning projects with government standards in the classroom but also frameworks for researching and assessing PBL. This comprehensive collection is essential reading for students and researchers in language learning and teaching, language education, curriculum design, and applied linguistics.

The eCoaching Continuum for Educators Marcia Rock 2019-09-23 In this book, eCoaching pioneer Marcia Rock draws on best-practice research and decades of experience to offer a blueprint for professional development that maximizes teacher and student growth. The eCoaching Continuum for Educators provides teachers, administrators, and other school professionals a step-by-step guide to the four connected, coordinated components of technology-enabled professional development: (1) studying theory and practice to build knowledge of specific content and pedagogy; (2) observing theory and practice to aid in the transfer of new knowledge to classroom practice; (3) one-on-one coaching to give teachers the feedback they need to improve classroom practice; and (4) group coaching to build capacity for identifying and solving problems of professional practice. Rock offers a practical approach for putting

professional development where it can do the most good—in the classroom. You'll learn Why technology is so well suited for authentic, job-embedded professional development How to cultivate a culture in which the eCoaching continuum can have the greatest impact Which technologies are the most useful for carrying out eCoaching in a variety of settings How to capture and evaluate the impact of eCoaching on teachers and students The eCoaching Continuum for Educators integrates best practice in coaching for professional development with a detailed account of how teachers and other school professionals can use today's technologies to improve their practice and ensure their students are fully engaged and learning.
