MasteringEnvironmentalScience should only be purchased when required by an instructor. xxxxxxxxxx For Introductory Environmental Science Courses (Non-Majors). Inspiring Students to Explore New Frontiers and Local Solutions *The Environment and You*, Second Edition, by Norm Christensen and new co-author Lissa Leege, gives today's generation of students reason to be hopeful about environmental challenges by emphasizing the role that science plays in environmental problem solving and solutions. The text offers a solid foundation in the science and demonstrates the role that science can play

in influencing personal, community and global environmental issues. The new edition has added New Frontiers discussions that emphasize the interaction between new scientific discoveries, ethics, and policy; and Where You Live activities that invite students to use primary data sources to explore environmental principles and issues in their local community. A new chapter organization also improves connections between chapters and integrates key concepts with relevant environmental issues.

One Step Ahead David Sally 2020-08-06 The world's best negotiators have moved beyond the conventional wisdom by utilizing cutting-edge studies and real-world results. It's time you did too. For over twenty years, David Sally has been teaching the art of negotiation at leading business schools and to executives at top companies. Now, using insights from social psychology and game theory, he delivers the proven, clear, actionable advice you need to stay one step ahead. By studying great examples, from Machiavelli to Wall Street, Xi Jinping and Barack Obama, he explores how the game's masters navigate the field strategically, craftily, even emotionally. The best know every negotiation is different and that your tactics are, in part, determined by your opponent. One Step Ahead will make sure that you have what it takes to come out on top, no matter who you are facing across the table.

A History of Literacy Education Robert J. Tierney 2021 "The scope and

nature of this account of the modern history of reading/literacy education (especially tied to the aspirational readers) are unique. Enlisting the metaphor of waves, it traces monumental shifts in theory, research and practice related to reading education and literacy that represent developments that verge on revolutionary changes. Each of these waves is accompanied with a discussion of the aspirational reader that sets the stage for contemplating these shifts and their significance. The discussions trace the research and theoretical developments in a fashion that exemplifies the origins of the shifts and their influences"--

**Concepts of Biology** Samantha Fowler 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.
