The Routledge Handbook of English Language and Digital Humanities Svenja Adolphs 2020-04-16 The Routledge Handbook of English Language and Digital Humanities serves as a reference point for key developments related to the ways in which the digital turn has shaped the study of the English language and of how the resulting methodological approaches have permeated other disciplines. It draws on modern linguistics and discourse analysis for its analytical methods and applies these approaches to the exploration and theorisation of issues within the humanities. Divided into three sections, this handbook covers: sources and corpora; analytical approaches; English language at the interface with other areas of research in the digital humanities. In covering these areas, more traditional approaches and methodologies in the humanities are recast and research challenges are re-framed through the lens of the digital. The essays in this volume highlight the opportunities for new questions to be asked and long-standing questions to be reconsidered when drawing on the digital in humanities research. This is a ground-breaking collection of essays offering incisive and essential reading for anyone with an interest in the English language and digital humanities.

Computational Interaction Antti Oulasvirta 2018-01-10 This book presents computational interaction as an approach to explaining and enhancing the interaction between humans and information technology. Computational interaction applies abstraction, automation, and analysis to inform our understanding of the structure of interaction and also to inform the design of the software that drives new and exciting human-computer interfaces. The methods of computational interaction allow, for example, designers to identify user interfaces that are optimal against some objective criteria. They also allow software engineers to build interactive systems that adapt their behaviour to better suit individual capacities and preferences. Embedded in an iterative design process, computational interaction has the potential to complement human strengths and provide methods for generating inspiring and elegant designs. Computational interaction does not exclude the messy and complicated behaviour of humans, rather it embraces it by, for example, using models that are sensitive to uncertainty and that capture subtle variations between individual users. It also promotes the idea that there are many aspects of interaction that can be augmented by algorithms. This book introduces computational interaction design to the reader by exploring a wide range of computational interaction techniques,

strategies and methods. It explains how techniques such as optimisation, economic modelling, machine learning, control theory, formal methods, cognitive models and statistical language processing can be used to model interaction and design more expressive, efficient and versatile interaction.

How to Be a Brilliant SENCO Helen Curran 2019-06-18 Helen Curran's invaluable book aims to support new and experienced SENCOs with the task of developing and leading special educational needs provision and inclusive practice, through the exploration of practical strategies and approaches. This book takes a pragmatic approach to the issues which have historically been associated with the role of the SENCO; namely a lack of time, a lack of resources and often a lack of seniority. The book seeks to provide SENCOs with tried and tested ideas and strategies to support both the operational and strategic aspects of the role, to help SENCOs develop their role as a leader in school. The book covers the following areas: The SENCO role in policy and practice The SENCO as a leader Developing relationships with pupils and parents Challenges and opportunities within the role of SENCO A must read for any SENCO, this book draws upon case studies and real life examples, considering the ways in which SENCOs can shape and develop the status of not only their role, but also SEN and inclusive provision in their setting.

Disability as Diversity in Higher Education Eunyoung Kim 2017-02-03 Addressing disability not as a form of student impairment—as it is typically perceived at the postsecondary level—but rather as an important dimension of student diversity and identity, this book explores

how disability can be more effectively incorporated into college environments. Chapters propose new perspectives, empirical research, and case studies to provide the necessary foundation for understanding the role of disability within campus climate and integrating students with disabilities into academic and social settings. Contextualizing disability through the lens of intersectionality, *Disability as Diversity in Higher Education* illustrates how higher education institutions can use policies and practices to enhance inclusion and student success.

Working with English Grammar Louise Cummings 2018-06-30 This clear and concise introduction offers students of linguistics and English language a comprehensive overview of English grammar, including word structure, major and minor word classes, phrases, clauses and sentences. Based on twenty years' teaching practice, Louise Cummings adopts a unique approach of using three real-world contexts - first language acquisition, language disorders and non-standard dialects - as a pedagogical tool to make grammatical concepts meaningful to students and to improve engagement and understanding. In seven accessible chapters, students are encouraged to develop the analytical skills they require to give a comprehensive description of the grammar of the English language. A range of supportive learning aids is used, including: • Learning objectives and section 'key points' summaries • Varied examples from world Englishes and print media • Homework assignments, exercises and revision questions • Targeted further reading suggestions and 'special topics' boxes • A glossary of 300 entries • An extensive range of online resources for instructors and students, including a test bank of 140 multiple-choice questions, useful links and an answer key.

Transformative Approaches to New Technologies and Student Diversity in Futures Oriented Classrooms Leonie Rowan 2012-01-13 In this book we outline an optimistic, aspirational and unashamedly ambitious agenda for schooling. We make cautious use of the concept of 'future proofing' to signal the commitment of the various authors to re-thinking the purposes, content and processes of schooling with a view to ensuring that all children, from all backgrounds are prepared by their education to make a positive contribution to the futures that are ahead of them. The book focuses on issues relating to technology and social justice to re-examine the traditional relationship between schools and technology, between schools and diverse learners, and between schools, children and knowledge. Drawing from examples from around the world, the book explores practical ways that diverse schools have worked to celebrate diverse understandings of what it means to be a learner, a citizen, a worker in these changed and changing times and the ways different technologies can support this agenda.

Becoming Confident Teachers Claire McGuinness 2011-07-26 Becoming Confident Teachers examines the teaching role of information professionals at a time of transition and change in higher education. While instruction is now generally accepted as a core library function in the 21st century, librarians often lack sufficient training in pedagogy and instructional design; consequently finding their teaching responsibilities to be stressful and challenging. By exploring the requirements and responsibilities of the role, this book guides teaching librarians to a position where they feel confident that they have acquired the basic body of knowledge and procedures to handle any kind of instructional requests that come their way, and to be proactive in developing and promoting teaching and learning initiatives. In addition, this book suggests strategies and methods for self-development and fostering a "teacher identity, giving teaching librarians a greater sense of purpose and direction, and the ability to clearly communicate their role to non-library colleagues and within the public sphere. Specifically examines the causes of stress among teaching librarians, zeroing in on recognisable scenarios, which are known to 'zap' confidence and increase teacher anxiety among librarians An up-to-date and easily digestible take on the role and responsibilities of the teaching librarian Identifies the major trends that are transforming the teaching function within professional academic librarianship

Handbook of Research on Teaching in Multicultural and Multilingual Contexts Charamba, Erasmos 2022-06-24 Several factors have resulted in increased intra- and inter-state migration. This has led to an increase in the enrollment of students with diverse linguistics backgrounds, placing more academic demands on educators. Linguistic diversity presents both opportunities and challenges for educators across the educational spectrum. Language ideologies profoundly shape and constrain the use of language as a resource for learning in multilingual or linguistically diverse classrooms. While English has become the world language, most communities remain, and are becoming more and more multicultural, multilingual, and diverse. The Handbook of Research on Teaching in Multicultural and Multilingual Contexts moves beyond the constraints of current language ideologies and enables the use of a wide range of resources from local semiotic repertoires. It examines the phenomenon of language use, language teaching, multiculturalism, and multilingualism in different learning areas, giving practitioners a voice to spotlight their efforts in order to keep their teaching afloat in culturally and linguistically diverse situations. Covering topics such as Indigenous languages, multilingual deaf communities, and intercultural competence, this major reference work is an essential resource for educators of both K-12 and higher education, pre-service teachers, educational psychologists, linguists, education administrators and policymakers, government officials, researchers, and academicians.
