Economics: The User's Guide Ha-Joon Chang 2015-10-20 From the internationally bestselling author and prizewinning economist—a highly original guide to the global economy. In his bestselling *23 Things They Don't Tell You About Capitalism*, Cambridge economist Ha-Joon Chang brilliantly debunked many of the predominant myths of neoclassical economics. Now, in an entertaining and accessible primer, he explains how the global economy actually works—in real-world terms. Writing with irreverent wit, a deep knowledge of history, and a disregard for conventional economic pieties, Chang offers insights that will never be found in the textbooks. Unlike many economists, who present only one view of their discipline, Chang introduces a wide range of economic theories, from classical to Keynesian, revealing how each has its strengths and weaknesses, and why there is no one way to explain economic behavior. Instead, by ignoring the received wisdom and exposing the myriad forces that shape our financial world, Chang gives us the tools we need to understand our increasingly global and interconnected world often driven by economics. From the future of the Euro, inequality in China, or the condition of the American manufacturing industry here in the United States—*Economics: The User's Guide* is a concise and expertly crafted guide to economic fundamentals that offers a clear and accurate picture of the global economy and how and why it affects our daily lives.

Designs for the Pluriverse Arturo Escobar 2018-03-09 In *Designs for the Pluriverse* Arturo Escobar presents a new vision of design theory and practice aimed at channeling design's world-making capacity toward ways of being and doing that are deeply attuned to justice and the Earth. Noting that most design—from consumer goods and digital technologies to built environments—currently serves capitalist ends, Escobar argues for the development of an “autonomous design” that eschews commercial and modernizing aims in favor of more collaborative and place-based approaches. Such design attends to questions of environment, experience, and politics while focusing on the production of human experience based on the radical interdependence of all beings. Mapping autonomous design's principles to the history of decolonial efforts of indigenous and Afro-descended people in Latin America, Escobar shows how refiguring current design practices could lead to the creation of more just and sustainable social orders.

Tiny Creatures Nicola Davies 2021-05-04 “Sutton's large-scale illustrations help children to visualize microorganisms and processes that are too small to see. . . . A handsome and rewarding picture book.” —Booklist (starred review) All around the world—in the sea, in the soil, in the air, and in your body—there are living things so tiny that millions could fit on an ant's antenna. They're busy doing all sorts of things, from giving you a cold and making yogurt to eroding mountains and helping to make the air we breathe.

Neil Patrick Harris Neil Patrick Harris 2015-09-15 “Neil Patrick Harris's *Choose Your Own Autobiography* is one of the best celeb memoirs I've ever read.”—The Phoenix News Seeking an exciting read that puts the “u” back in “autobiography”? Look no further than Neil Patrick Harris: *Choose Your Own Autobiography*! In this entertaining and innovative memoir, Neil Patrick Harris shares intimate and hilarious stories about everything from his early days in LA, life on the *How I Met Your Mother* set, secrets from backstage at award shows, and family life with David, Harper, and Gideon. In a fresh spin on the typical celebrity narrative, he lets you, the reader, choose which path you want him to follow. All this plus magic tricks, cocktail recipes, embarrassing pictures from his time as a child actor, and even a closing song!

Evaluating Evidence in Biological Anthropology Cathy Willermet 2019-11-14 A critical assessment of how evidence in biological anthropology is discovered, collected and interpreted.

All My Puny Sorrows Miriam Toews 2019-10-15 From the bestselling author of *Women Talking*, a “wrenchingly honest, darkly funny novel” (*Entertainment Weekly*). Elf and Yoli are sisters. While on the surface Elfrieda's life is enviable (she's a world-renowned pianist, glamorous, wealthy, and happily married) and Yolandi's a mess (she's divorced and broke, with two teenagers growing up too quickly), they are fiercely close—raised in a Mennonite household and sharing the hardship of Elf's desire to end her life. After Elf's latest attempt, Yoli must quickly determine how to keep her family from falling apart while facing a

profound question: what do you do for a loved one who truly wants to die? *All My Puny Sorrows* is a deeply personal story that is as much comedy as it is tragedy, a goodbye grin from the friend who taught you how to live.

Perfect Pairs Melissa Stewart 2014 A teacher's guide to using fiction and nonfiction picture books to teach life sciences.

Choosing the Right College 2014-15 John Zmirak 2014-03-11 “By far the best college guide, for both its honesty and its insights.” —Thomas Sowell Over the past decade, *Choosing the Right College* has established itself as the indispensable resource for students—and parents—who want the unvarnished truth about America's top colleges and universities. It is the most in-depth, independently researched college guide on the market, using on-campus sources to turn up the best—and worst—aspects of nearly 150 schools. Just as important, *Choosing the Right College* covers the intellectual, political, and social conditions that really matter, including: · The integrity and rigor of the curriculum · Which courses and professors to take—and which to avoid · The prevalence of politics in the classroom and the state of free speech—all highlighted with ISI's unique “traffic light” · Living arrangements, safety, and other keys to student life · How to get a real education at any school Beyond all that, this brand-new edition of *Choosing the Right College* features a host of innovations, including: “So You're Looking For...,” top-five lists of colleges for all types of students; a quick list of each school's strengths and weaknesses; an insider's look at the pros and cons of online education; and more. This new edition of *Choosing the Right College* also provides the financial information families need in this age of soaring tuition. What are the most overpriced colleges—and which are relatively good values? What is the average student-debt load? To cap it all off, *Choosing the Right College* introduces the groundbreaking feature “Blue Collar Ivies”—in-depth reports on the best affordable colleges in all fifty states. *Choosing the Right College 2014-15* will completely change the way young people make a life-altering decision.

I See You Made an Effort Annabelle Gurwitsch 2014-03-06 “Annabelle Gurwitsch is the child prodigy of the literature on aging. The only downside of this book is that it is bound to deepen your laugh lines.”—Barbara Ehrenreich, author of *Nickel and Dimed* Actor and humorist Annabelle Gurwitsch returns with a wickedly funny book of essays about the indignities faced by femmes d'un certain âge. Whether she is falling in lust at the Genius Bar, coping with her best friend's assisted suicide, or navigating the extensive—and treacherously expensive—anti-aging offerings at the beauty counter, Gurwitsch confronts middle age with candor, wit, and a healthy dose of self-deprecation. Scorchingly honest, surreally and riotously funny, *I See You Made an Effort* is the ultimate coming-of-middle-age story and according to Bill Maher, “it should be required reading for anyone between the ages of 40 and death. Scratch that—even after death, it's a must read.”

On Such a Full Sea Chang-rae Lee 2014-01-07 “Watching a talented writer take a risk is one of the pleasures of devoted reading, and *On Such a Full Sea* provides all that and more. . . . With *On Such a Full Sea*, [Chang-rae Lee] has found a new way to explore his old preoccupation: the oft-told tale of the desperate, betraying, lonely human heart.”—Andrew Sean Greer, *The New York Times Book Review* “I've never been a fan of grand hyperbolic declarations in book reviews, but faced with *On Such a Full Sea*, I have no choice but to ask: Who is a greater novelist than Chang-rae Lee today?”—Porochista Khakpour, *The Los Angeles Times* From the beloved award-winning author of *Native Speaker*, *The Surrendered*, and *My Year Abroad*, a highly provocative, deeply affecting story of one woman's legendary quest in a shocking, future America. *On Such a Full Sea* takes Chang-rae Lee's elegance of prose, his masterly storytelling, and his long-standing interests in identity, culture, work, and love, and lifts them to a new plane. Stepping from the realistic and historical territories of his previous work, Lee brings us into a world created from scratch. Against a vividly imagined future America, Lee tells a stunning, surprising, and riveting story that will change the way readers think about the world they live in. In a future, long-declining America, society is strictly stratified by class. Long-abandoned urban neighborhoods have been repurposed as highwalled, self-

contained labor colonies. And the members of the labor class—descendants of those brought over en masse many years earlier from environmentally ruined provincial China—find purpose and identity in their work to provide pristine produce and fish to the small, elite, satellite charter villages that ring the labor settlement. In this world lives Fan, a female fish-tank diver, who leaves her home in the B-Mor settlement (once known as Baltimore), when the man she loves mysteriously disappears. Fan's journey to find him takes her out of the safety of B-Mor, through the anarchic Open Counties, where crime is rampant with scant governmental oversight, and to a faraway charter village, in a quest that will soon become legend to those she left behind.

The Human Cosmos Jo Marchant 2020-09-01 A Best Book of 2020 NPR A Best Book of 2020 The Economist A Top Ten Best Science Book of 2020 Smithsonian A Best Science & Technology Book of 2020 Library Journal A Must-Read Book to Escape the Chaos of 2020 Newsweek Starred review Booklist Starred review Publishers Weekly An historically unprecedented disconnect between humanity and the heavens has opened. Jo Marchant's book can begin to heal it. For at least 20,000 years, we have led not just an earthly existence but a cosmic one. Celestial cycles drove every aspect of our daily lives. Our innate relationship with the stars shaped who we are—our art, religious beliefs, social status, scientific advances, and even our biology. But over the last few centuries we have separated ourselves from the universe that surrounds us. It's a disconnect with a dire cost. Our relationship to the stars and planets has moved from one of awe, wonder and superstition to one where technology is king—the cosmos is now explored through data on our screens, not by the naked eye observing the natural world. Indeed, in most countries modern light pollution obscures much of the night sky from view. Jo Marchant's spellbinding parade of the ways different cultures celebrated the majesty and mysteries of the night sky is a journey to the most awe inspiring view you can ever see—looking up on a clear dark night. That experience and the thoughts it has engendered have radically shaped human civilization across millennia. The cosmos is the source of our greatest creativity in art, in science, in life. To show us how, Jo Marchant takes us to the Hall of the Bulls in the caves at Lascaux in France, and to the summer solstice at a 5,000-year-old tomb at New Grange in Ireland. We discover Chumash cosmology and visit medieval monks grappling with the nature of time and Tahitian sailors navigating by the stars. We discover how light reveals the chemical composition of the sun, and we are with Einstein as he works out that space and time are one and the same. A four-billion-year-old meteor inspires a search for extraterrestrial life. The cosmically liberating, summary revelation is that star-gazing made us human.

Teaching STEM Literacy Juliana Texley 2017-12-01 Teaching STEM Literacy is comprised of ready-made, open-ended lessons reviewed and tested by teachers, which help educators integrate STEM learning into the early childhood classroom. Lessons are linked to the Next Generation Science Standards, and encourage creative ideas for three-dimensional STEM learning that are developmentally appropriate and exemplified through children's literature. The three-dimensional STEM learning—content, concepts, and practices—comes in twelve, ready-made open-ended teaching units that make it easy to teach science and inquiry to young children. This book uses the 5E framework (engagement, exploration, explanation, elaboration, and evaluation) to cultivate children's skills of observation, questioning, and data collection by combining discovery, problem solving, and engineering solutions to authentic questions that young children might ask. Juliana Texley holds a master's in biology and chemistry, and a PhD in curriculum development/science education from Wayne State University, and has over thirty years of teaching experience. She is a graduate-level adjunct professor specializing in educational technology and assessment, science, and science teaching at Central Michigan University and Lesley University in Massachusetts. Texley has been a National Science Teachers Association (NSTA) member for thirty years, and served as president from 2014-2015. She is on the board for Young Voices for the Planet and led the development and evaluation of online learning programs for JASON Learning. Ruth M. Ruud has over thirty-five years of teaching experience ranging from early childhood to undergraduate studies. She has a master's degree in education with additional coursework in all areas of science. A former Delta Education FOSS (Full Option Science System) consultant, Ruth currently works as an adjunct professor teaching physical geography courses at Cleveland State University. She served as president of the Pennsylvania Science Teachers Association and has chaired a number of committees of the National Science Teachers Association (NSTA), is a member of the NSTA Recommends committee, and is the head reviewer for the

NSTA Shell Science Lab Challenge.

The NeuroMuscular System: From Earth to Space Life Science Dieter Blottner 2014-11-25 The book provides fundamental new insights in the structure and function of the healthy NeuroMuscular system. Recent findings suggest that the musculoskeletal system that supports movement control on Earth is controlled by unique principles of structural, biochemical and molecular characteristics. Mechanical loading by working against normal gravity helps to support principal structures in bone, muscle and associated subcellular scaffold components. Disuse or immobilization of the body in bed rest on Earth or in microgravity in Space result in considerable loss of bone, muscle and force with downregulation of neuromuscular activity resulting in impaired performance control. The goal is to develop exercise prescriptions to maintain postural control in normal life, aging and rehabilitation on Earth as well as for an adequate human performance management in Space.

The Science of Skinny Cookbook Dee McCaffrey 2014-12-23 In The Science of Skinny, organic chemist and nutritionist Dee McCaffrey shared the revolutionary eating plan she developed by applying what she'd learned in the lab to what she put on her plate. In the process, she lost more than 100 pounds -- and has kept them off for twenty years. Her secret? Eating natural whole foods and avoiding artificial sweeteners and chemical additives. Now The Science of Skinny Cookbook offers 100 family-friendly recipes for a delicious, realistic way of eating -- not dieting -- for life.

Boost Your STEAM Program with Great Literature and Activities Liz Knowles 2018-06-01 You've created a STEAM program in your library, but how do you work literacy into the curriculum? With this collection of resource recommendations, direction for program development, and activities, you'll have students reading proficiently in no time. Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem solving by allowing students to create their own solutions to a problem through trial and error. In order to enhance literacy development in the STEAM program, however, they need resources for integrating literature into the curriculum. In this collection of resources for doing just that, veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources, selected based on research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas. Titles are complemented by discussion questions and problem-solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning. In addition to promoting literacy, these resources will help to develop creativity, lateral thinking skills, and confidence in students.

Classic Science Fiction and Fantasy Stories Stephen Brennan 2014-08-05 The stories of Mary Shelley, H. G. Wells, and Jules Verne paved the way for the fantastic science fiction literature that we all enjoy today. However, full appreciation of these contemporary works is impossible without an understanding of their literary roots. Classic Science Fiction and Fantasy Stories is a wonderful collection, comprising excerpts and short stories from some of the most beloved writers of all time. While many readers have only a cursory knowledge of these works, having either heard about them or skimmed through them, they will now be able to have this entire collection in the palm of their hands. Included in this comprehensive collection are famous writers spanning multiple centuries, including: • Edgar Allan Poe • H. G. Wells • Mark Twain • Sir Arthur Conan Doyle • Jules Verne • Jack London • Mary Shelley • And many more Classic Science Fiction and Fantasy Stories offers not only a front-row seat to the creation of the famous science fiction and fantasy genres, but also insight on where the great sci-fi minds of today got their inspiration. With the help of Stephen Brennan, this collection is one that all fans of George A. Romero, Max Brooks, and Stephen King should have on their bookshelves. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

The Genetic Age Matthew Cobb 2022-09-01 A TIMES ENVIRONMENT AND SCIENCE BOOK OF THE

YEAR 2022 'The ideal guide to what is not just a fiendishly complex area of science but also an ethical minefield' Mail on Sunday A new gene editing technology, invented just seven years ago, has turned humanity into gods. Enabling us to manipulate the genes in virtually any organism with exquisite precision, CRISPR has given scientists a degree of control that was undreamt of even in science fiction. But CRISPR is just the latest, giant leap in a long journey to master genetics. The Genetic Age shows the astonishing, world-changing potential of the new genetics and the possible threats it poses, sifting between fantasy and the reality when it comes to both benefits and dangers. By placing each phase of discovery, anticipation and fear in the context of over fifty years of attempts to master the natural world, Matthew Cobb, the Baillie-Gifford-shortlisted author of *The Idea of the Brain*, weaves the stories of science, history and culture to shed new light on our future. With the powers now at our disposal, it is a future that is almost impossible to imagine - but it is one we will create ourselves.

You're Leaving When? Annabelle Gurwitch 2022-03-08 Finalist for the Thurber Prize for American Humor "In this surprisingly upbeat memoir, Annabelle Gurwitch writes about the financial curveballs that can hit you in midlife . . . Somehow, Ms. Gurwitch manages to find humor in these setbacks. Ultimately, this is a story about harnessing resilience and learning how life's disappointments can teach you about the things that matter most." —Tara Parker-Pope, *The New York Times* From the *New York Times* bestselling author of *I See You Made an Effort* comes a timely and hilarious chronicle of downward mobility, financial and emotional. With signature "sharp wit" (NPR), Annabelle Gurwitch gives irreverent and empathetic voice to a generation hurtling into their next chapter with no safety net and proves that our no-frills new normal doesn't mean a deficit of humor. In these essays, Gurwitch embraces homesharing, welcoming a housing-insecure young couple and a bunny rabbit into her home. The mother of a college student in recovery who sheds the gender binary, she relearns to parent, one pronoun at a time. She wades into the dating pool in a Miss Havisham-inspired line of lingerie and flunks the magic of tidying up. *You're Leaving When?* is for anybody who thought they had a semblance of security but wound up with a fragile economy and a blankie. Gurwitch offers stories of resilience, adaptability, low-rent redemption, and the kindness of strangers. Even in a muted Zoom.

There Goes Gravity Lisa Robinson 2015-04-07 From a legendary music journalist with four decades of unprecedented access, an insider's behind-the-scenes look at the major personalities of rock and roll. Lisa Robinson has interviewed the biggest names in music—including Led Zeppelin, the Rolling Stones, John Lennon, Patti Smith, U2, Eminem, Lady Gaga, Jay Z, and Kanye West. She visited the teenage Michael Jackson many times at his Encino home. She spent hours talking to John Lennon at his Dakota apartment—and in recording studios just weeks before his murder. She introduced David Bowie to Lou Reed at a private dinner in a Manhattan restaurant, helped the Clash and Elvis Costello get their record deals, was with the Rolling Stones on their jet during a frightening storm, and was mid-flight with Led Zeppelin when their tour manager pulled out a gun. A pioneering female journalist in an exclusive boys' club, Lisa Robinson is a preeminent authority on the personalities and influences that have shaped the music world; she has been recognized as rock journalism's ultimate insider. A keenly observed and lovingly recounted look back on years spent with countless musicians backstage, after-hours, and on the road, *There Goes Gravity* documents a lifetime of riveting stories, told together here for the first time.

The Migraine Relief Plan Stephanie Weaver 2017-02-14 A "must-have guide" to reducing symptoms related to migraine, vertigo, and Meniere's disease, including over 75 trigger-free recipes (Mark Hyman, MD, director of the Cleveland Clinic Center for Functional Medicine). In *The Migraine Relief Plan*, certified health and wellness coach Stephanie Weaver outlines a new, step-by-step lifestyle approach to reducing migraine frequency and severity. Using the latest research, extensive testing, and her own experience with a migraine diagnosis, Weaver has designed an accessible plan to help those living with migraine, headaches, or Meniere's disease. Over the course of eight weeks, the plan gradually transitions readers into a healthier lifestyle, including key behaviors such as regular sleep, trigger-free eating, gentle exercise, and relaxation techniques. The book also collects resources—shopping lists, meal plans, symptom tracking charts, and kitchen-tested recipes for breakfast, lunch, snacks, and dinner—to provide the necessary tools for success. *The Migraine Relief Plan* encourages readers to eat within the guidelines while still helping them follow personal dietary choices, like vegan or Paleo, and navigate challenges, such as parties, work,

and travel. An essential resource for anyone who lives with head pain—or their loved ones—this book will inspire you to rethink your attitude toward health and wellness.

Proceedings of the XVI International symposium Symorg 2018 Nevenka Žarkić-Joksimović 2018-06-12
Nursing Informatics for the Advanced Practice Nurse Susan McBride, PhD, RN-BC, CPHIMS 2015-12-03
 Designed specifically for graduate-level nursing informatics courses, this is the first text to focus on using technology with an interprofessional team to improve patient care and safety. It delivers an expansive and innovative approach to devising practical methods of optimizing technology to foster quality of patient care and support population health initiatives. Based on the requirements of the DNP Essential IV Core Competency for Informatics and aligning with federal policy health initiatives, the book describes models of information technology the authors have successfully used in health IT, as well as data and analytics used in business, for-profit industry, and not-for-profit health care association settings, which they have adapted for nursing practice in order to foster optimal patient outcomes. The authors espouse a hybrid approach to teaching with a merged competency and concept-based curriculum. With an emphasis on the benefits of an interprofessional team, the book describes the most effective approaches to health care delivery using health information technology. It describes a nursing informatics model that is comprised of three core domains: point-of-care technology, data management and analytics, and patient safety and quality. The book also includes information on point-of-care applications, population health, data management and integrity, and privacy and security. New and emerging technologies explored include genomics, nanotechnology, artificial intelligence, and data mining. Case studies and critical thinking exercises support the concept-based curriculum and facilitate out-of-the-box thinking. Supplemental materials for instructors include PowerPoint slides and a test bank. While targeted primarily for the nursing arena, the text is also of value in medicine, health information management, occupational therapy, and physical therapy. Key Features: Addresses DNP Essential IV Core Competency for Informatics Focuses specifically on using nursing informatics expertise to improve population health, quality, and safety Advocates an interprofessional team approach to optimizing health IT in all practice settings Stimulates critical thinking skills that can be applied to all aspects of IT health care delivery Discusses newest approaches to interprofessional education for IT health care delivery

Bark Lorrie Moore 2014-02-25 A new collection of stories by one of America's most beloved and admired short-story writers, her first in fifteen years, since *Birds of America* ("Fluid, cracked, mordant, colloquial . . . Will stand by itself as one of our funniest, most telling anatomies of human love and vulnerability." —*The New York Times Book Review*, cover). These eight masterly stories reveal Lorrie Moore at her most mature and in a perfect configuration of craft, mind, and bewitched spirit, as she explores the passage of time and summons up its inevitable sorrows and hilarious pitfalls to reveal her own exquisite, singular wisdom. In "Debarking," a newly divorced man tries to keep his wits about him as the United States prepares to invade Iraq, and against this ominous moment, we see—in all its irresistible wit and darkness—the perils of divorce and what can follow in its wake . . . In "Foes," a political argument goes grotesquely awry as the events of 9/11 unexpectedly manifest themselves at a fund-raising dinner in Georgetown . . . In "The Juniper Tree," a teacher visited by the ghost of her recently deceased friend is forced to sing "The Star-Spangled Banner" in a kind of nightmare reunion . . . And in "Wings," we watch the inevitable unraveling of two once-hopeful musicians, neither of whom held fast to their dreams nor struck out along other paths, as Moore deftly depicts the intricacies of dead-ends-ville and the workings of regret . . . Here are people beset, burdened, buoyed; protected by raising teenage children; dating after divorce; facing the serious illness of a longtime friend; setting forth on a romantic assignation abroad, having it interrupted mid-trip, and coming to understand the larger ramifications and the impossibility of the connection . . . stories that show people coping with large dislocation in their lives, with risking a new path to answer the desire to be in relation—to someone . . . Gimlet-eyed social observation, the public and private absurdities of American life, dramatic irony, and enduring half-cracked love wend their way through each of these narratives in a heartrending mash-up of the tragic and the laugh-out-loud—the hallmark of life in Lorrie-Moore-land. This eBook edition includes a Reading Group Guide.

Buddhist Biology David P. Barash 2014 Compares teachings of Buddhism with principles of modern biology, revealing many significant points of compatibility.

Internet of Things, Threats, Landscape, and Countermeasures Stavros Shiaeles 2021-04-29 Internet of Things (IoT) is an ecosystem comprised of heterogeneous connected devices that communicate to deliver capabilities making our living, cities, transport, energy, and other areas more intelligent. This book delves into the different cyber-security domains and their challenges due to the massive amount and the heterogeneity of devices. This book introduces readers to the inherent concepts of IoT. It offers case studies showing how IoT counteracts the cyber-security concerns for domains. It provides suggestions on how to mitigate cyber threats by compiling a catalogue of threats that currently comprise the contemporary threat landscape. It then examines different security measures that can be applied to system installations or operational environment and discusses how these measures may alter the threat exploitability level and/or the level of the technical impact. Professionals, graduate students, researchers, academicians, and institutions that are interested in acquiring knowledge in the areas of IoT and cyber-security, will find this book of interest.

The Demon-Haunted World Carl Sagan 2011-07-06 A prescient warning of a future we now inhabit, where fake news stories and Internet conspiracy theories play to a disaffected American populace "A glorious book . . . A spirited defense of science . . . From the first page to the last, this book is a manifesto for clear thought."—Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don't understand the difference between the myths of pseudoscience and the testable hypotheses of science? Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. Casting a wide net through history and culture, Sagan examines and authoritatively debunks such celebrated fallacies of the past as witchcraft, faith healing, demons, and UFOs. And yet, disturbingly, in today's so-called information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms. Praise for *The Demon-Haunted World* "Powerful . . . A stirring defense of informed rationality. . . Rich in surprising information and beautiful writing."—The Washington Post Book World "Compelling."—USA Today "A clear vision of what good science means and why it makes a difference. . . A testimonial to the power of science and a warning of the dangers of unrestrained credulity."—The Sciences "Passionate."—San Francisco Examiner-Chronicle

Can't and Won't Lydia Davis 2014-04-08 A new collection of short stories from the woman Rick Moody has called "the best prose stylist in America" Her stories may be literal one-liners: the entirety of "Bloomington" reads, "Now that I have been here for a little while, I can say with confidence that I have never been here before." Or they may be lengthier investigations of the havoc wreaked by the most mundane disruptions to routine: in "A Small Story About a Small Box of Chocolates," a professor receives a gift of thirty-two small chocolates and is paralyzed by the multitude of options she imagines for their consumption. The stories may appear in the form of letters of complaint; they may be extracted from Flaubert's correspondence; or they may be inspired by the author's own dreams, or the dreams of friends. What does not vary throughout *Can't and Won't*, Lydia Davis's fifth collection of stories, is the power of her finely honed prose. Davis is sharply observant; she is wry or witty or poignant. Above all, she is refreshing. Davis writes with bracing candor and sly humor about the quotidian, revealing the mysterious, the foreign, the alienating, and the pleasurable within the predictable patterns of daily life.

Nora Webster Colm Toibin 2014-10-07 From one of contemporary literature's bestselling, critically acclaimed, and beloved authors: a "luminous" novel (Jennifer Egan, *The New York Times Book Review*) about a fiercely compelling young widow navigating grief, fear, and longing, and finding her own voice—"heartrendingly transcendent" (*The New York Times*, Janet Maslin). Set in Wexford, Ireland, Colm Tóibín's magnificent seventh novel introduces the formidable, memorable, and deeply moving Nora Webster. Widowed at forty, with four children and not enough money, Nora has lost the love of her life, Maurice, the man who rescued her from the stifling world to which she was born. And now she fears she may be sucked back into it. Wounded, selfish, strong-willed, clinging to secrecy in a tiny community where everyone knows your business, Nora is drowning in her own sorrow and blind to the suffering of her young

sons, who have lost their father. Yet she has moments of stunning insight and empathy, and when she begins to sing again, after decades, she finds solace, engagement, a haven—herself. Nora Webster "may actually be a perfect work of fiction" (*Los Angeles Times*), by a "beautiful and daring" writer (*The New York Times Book Review*) at the zenith of his career, able to "sneak up on readers and capture their imaginations" (*USA TODAY*). "Miraculous...Tóibín portrays Nora with tremendous sympathy and understanding" (Ron Charles, *The Washington Post*).

The Betrayers David Bezmozgis 2014-09-23 Winner of the National Jewish Book Award A Wall Street Journal Best Book of 2014 A New Yorker Favorite Book of 2014 New York Times Book Review Editor's Choice These incandescent pages give us one fraught, momentous day in the life of Baruch Kotler, a Soviet Jewish dissident who now finds himself a disgraced Israeli politician. When he refuses to back down from a contrary but principled stand regarding the settlements in the West Bank, his political opponents expose his affair with a mistress decades his junior, and the besieged couple escapes to Yalta, the faded Crimean resort of Kotler's youth. There, shockingly, Kotler encounters the former friend whose denunciation sent him to the Gulag almost forty years earlier. In a whirling twenty-four hours, Kotler must face the ultimate reckoning, both with those who have betrayed him and with those whom he has betrayed, including a teenage daughter, a son facing his own moral dilemma in the Israeli army, and the wife who once campaigned to secure his freedom and stood by him through so much. Stubborn, wry, and self-knowing, Baruch Kotler is one of the great creations of contemporary fiction. An aging man grasping at a final passion, he is drawn inexorably into a crucible that is both personal and biblical in scope. In prose that is elegant, sly, precise, and devastating in its awareness of the human heart, David Bezmozgis has rendered a story for the ages, an inquest into the nature of fate and consequence, love and forgiveness. *The Betrayers* is a high-wire act, a powerful tale of morality and sacrifice that will haunt readers long after they turn the final page.

SONNY S BLUES James Baldwin 1970

Holding Up The Sky Together Ronald Bishop 2017-11-30 Even as kindness toward individuals with intellectual disabilities has increased, encountering an individual and his or her family whose lives revolve around the daily challenges that come with them is atypical, or is experienced and narrated as such, particularly by the media. Even when there is progress, making such a leap provides rhetorical cover, or at least a distraction, while intolerance regroups. And for some, it becomes less about showing love and compassion than about being able to pat oneself on the back when an interaction with a person like our son Neil is over. But it's why they don't know, or are curious but reluctant to engage, or just flat out lack empathy, that compelled us to write this book. Contributing to their misimpressions and misanthropy are portrayals of individuals with intellectual disabilities in the mass media, scant though they are. We should always be skeptical of those in my line of work who argue that the onslaught of information we take in from a widened array of sources can magically change our behavior - the so-called "hypodermic needle" theory of media effects. But these messages do help us craft our realities and develop and share our own narratives about folks with intellectual disabilities. *Holding Up the Sky Together* is admittedly a hybrid: part memoir, part academic analysis—a professor with more than 30 published articles and four books, all of which revolve around media analysis, looks inward. But our fervent hope is to inject a bit more realism into the national dialogue about intellectual disabilities. We are grateful for increased awareness and tolerance, for Special Olympics, and for shows like *Born This Way*. But there is so much more to be done.

The Professor Is In Karen Kelsky 2015-08-04 The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help

readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish - Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

Access to Life Science Shauna M. Adams Ed.D. 2014-04-29 The investigations are designed to be used by teachers, family child care providers and others who work with and care for young children. There are 2 series of investigation sample books: • One series is designed for preschool and kindergarten age children and, with minor adjustments, can be appropriate for children in the primary grades. • The second series is designed for infants and toddlers. Each investigation contains a series of engaging, open-ended experiences that inspire curiosity and inquiry as young children investigate important science topics.

To Siri with Love Judith Newman 2017-08-22 A NEW YORK TIMES NOTABLE BOOK OF 2017 From the author of the viral New York Times op-ed column "To Siri with Love" comes a collection of touching, hilarious, and illuminating stories about life with a thirteen-year-old boy with autism that hold insights and revelations for us all. When Judith Newman shared the story of how Apple's electronic personal assistant, Siri, helped Gus, her son who has autism, she received widespread media attention and an outpouring of affection from readers around the world. Basking in the afterglow of media attention, Gus told anyone who would listen, "I'm a movie star." Judith's story of her son and his bond with Siri was an unusual tribute to technology. While many worry that our electronic gadgets are dumbing us down, she revealed how they can give voice to others, including children with autism like Gus—a boy who has trouble looking people in the eye, hops when he's happy, and connects with inanimate objects on an empathetic level. To Siri with Love is a collection of funny, poignant, and uplifting stories about living with an extraordinary child who has helped a parent see and experience the world differently. From the charming (Gus weeping with sympathy over the buses that would lie unused while the bus drivers were on strike) to the painful (paying \$22,000 for a behaviorist in Manhattan to teach Gus to use a urinal) to the humorous (Gus's insistence on getting naked during all meals, whether at home or not, because he does not want to get his clothes dirty) to the profound (how an automated "assistant" helped a boy learn how to communicate with the rest of the world), the stories in To Siri with Love open our eyes to the magic and challenges of a life beyond the ordinary.

Stuff Matters Mark Miodownik 2014 A world-leading materials scientist presents an engrossing collection of stories that explain the science and history of materials, from the plastic in our appliances to the elastic in our underpants, revealing the miracles of engineering that seep into our everyday lives. 25,000 first printing.

Life Science for Second Grade Thomas Bell 2014-08-08 If your child is struggling with science, then this book is for you; the short book covers the topic and also contains science experiments to work with, and over 40 quiz questions. This subject comes from the book "Second Grade Science (For Homeschool or Extra Practice)"; it more thoroughly covers more third grade topics to help your child get a better understanding of second grade math. If you purchased that book, or plan to purchase that book, do not purchase this, as the problems are the same.

Climate Change and Cities Cynthia Rosenzweig 2018-03-29 The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing

climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.
