Appropriations for 2015 United States. Congress. House. Committee on Appropriations. Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies 2014
Mali International Monetary Fund. African Dept. 2015-12-17 This Selected Issues paper examines growth, structural transformation, and diversification in Mali. At present, the majority of Mali's population is employed in low-productivity agriculture, and the secondary sector is underdeveloped. Further structural transformation and diversification of output and exports could thus yield significant growth dividends, but will be challenging in the context of a rapid projected increase in the workforce over coming decades, much of which would need to be absorbed by the agricultural sector. Policies could focus on easing the constraints to structural transformation in key areas such as education and the business climate, as well as devising a clear strategy for tackling the

challenges posed by rapid population growth. **Code of Federal Regulations** 2014 Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. *Structural Changes and their Econometric Modeling* Vladik Kreinovich 2018-11-24 This book focuses on structural changes and economic modeling. It presents papers describing how to model structural changes, as well as those introducing improvements to the existing before-structural-changes models, making it easier to later on combine these models with techniques describing structural changes. The book also includes related theoretical developments and practical applications of the resulting techniques to economic problems. Most traditional mathematical models of economic processes describe how the corresponding quantities change with time. However, in addition to such relatively smooth numerical changes,

economical phenomena often undergo more drastic structural change. Describing such structural changes is not easy, but it is vital if we want to have a more adequate description of economic phenomena – and thus, more accurate and more reliable predictions and a better understanding on how best to influence the economic situation.

Handbook of Research on New Literacies

Julie Coiro 2014-04-04 Situated at the intersection of two of the most important areas in educational research today — literacy and technology — this handbook draws on the potential of each while carving out important

new territory. It provides leadership for this newly emerging field, directing scholars to the major issues, theoretical perspectives, and interdisciplinary research pertaining to new literacies. Reviews of research are organized into six sections: Methodologies Knowledge and Inquiry Communication Popular Culture, Community, and Citizenship: Everyday Literacies Instructional Practices and Assessment Multiple Perspectives on New Literacies Research FEATURES Brings together a diverse international team of editors and chapter authors Provides an extensive collection of research reviews in a critical area of educational research Makes visible the multiple perspectives and theoretical frames that currently drive work in new literacies Establishes important space for the emerging field of new literacies research Includes a unique Commentary section: The final section of the Handbook reprints five central research studies. Each is reviewed by two prominent

researchers from their individual, and different, theoretical position. This provides the field with a sense of how diverse lenses can be brought to bear on research as well as the benefits that accrue from doing so. It also provides models of critical review for new scholars and demonstrates how one might bring multiple perspectives to the study of an area as complex as new literacies research. The Handbook of Research on New Literacies is intended for the literacy research community, broadly conceived, including scholars and students from the traditional reading and writing research communities in education and educational psychology as well as those from information science, cognitive science, psychology, sociolinguistics, computer mediated communication, and other related areas that find literacy to be an important area of investigation. *Reparations and Reparatory Justice* Sundiata Keita Cha-Jua 2024-04-09 Changes at the global, federal, state, and municipal level are pushing

Big Data-Enabled Nursing Connie W. Delaney
2017-11-02 Historically, nursing, in all of its missions of research/scholarship, education and practice, has not had access to large patient databases. Nursing consequently adopted qualitative methodologies with small sample sizes, clinical trials and lab research.

Historically, large data methods were limited to traditional biostatistical analyses. In the United States, large payer data has been amassed and structures/organizations have been created to welcome scientists to explore these large data to advance knowledge discovery. Health systems electronic health records (EHRs) have now matured to generate massive databases with longitudinal trending. This text reflects how the learning health system infrastructure is maturing, and being advanced by health information exchanges (HIEs) with multiple

organizations blending their data, or enabling distributed computing. It educates the readers on the evolution of knowledge discovery methods that span qualitative as well as quantitative data mining, including the expanse of data visualization capacities, are enabling sophisticated discovery. New opportunities for nursing and call for new skills in research methodologies are being further enabled by new partnerships spanning all sectors.

Image Guided Prostate Cancer Treatments

Robert L. Bard 2013-11-18 Image-Guided Prostate Cancer Treatments is a comprehensive reference and practical guide on the technology and application of ultrasound and MRI in the male pelvis, with special attention to the prostate. The book is organized into three main

sections, the first of which is devoted to general aspects of imaging and image-guided treatments. The second section provides a systematic overview of the application of ultrasound and MRI to the diagnosis and treatment of diseases of the lower urinary tract. Performance of the ultrasound and MRI studies is explained, and the normal and abnormal pathological anatomy is reviewed. Correlation with the ultrasound in the same plane is provided to assist in understanding the MRI sequences. Biopsy and interventional procedures, ultrasound-MRI fusion techniques, and image-guided therapies, including focused ultrasound, photodynamic therapy, microwave and laser ablation, are all fully covered. The third section focuses on securing treatment effectiveness and the use of follow-up imaging to ensure therapeutic success and detect tumor recurrence at an early stage, which is vital given that prompt focal treatment of recurrence is very successful. Here, particular attention is

paid to the role of Doppler ultrasound and DCE-MRI technologies. This book, containing a wealth of high-quality illustrations based on high-end equipment, will acquaint beginners with the basics of prostate ultrasound and MRI, while more advanced practitioners will learn new skills, means of avoiding pitfalls, and ways of effectively relating the imaging and image-guided treatments to the clinical situation. The information provided will permit a tailored approach in dealing with specific pathologic issues.

Guided Inquiry Goes Global Lee FitzGerald
2018-12-07 This book places guided inquiry in the context of curricular and technological change and provides guidelines for building the long-term culture and capacity for effective inquiry learning in schools. Across the world's education systems, many schools are moving to inquiry learning. However, making inquiry

learning work requires effective collaboration in schools and resolving the conflict between teaching 21st-century skills while also adhering to content-heavy syllabuses and meeting accountability standards. In *Guided Inquiry Goes Global: Evidence-Based Practice In Action*, author Lee FitzGerald—a teacher librarian with 25 years' experience, in both primary and secondary schools, and who has experimented with the developing practice for more than 10 years—places guided inquiry (GI) in an international context of curricular and technological change. She provides an essential and succinct background on GI; explains where it fits in the curriculum; and provides practical guidance in creating GI tasks, operating GI tasks in real-world teaching situations, and overcoming barriers to successful implementation of guided inquiry. You'll gain insight into the evidence for the effectiveness of GI, understand how students interpret and use the GI process, grasp the critical teaching role of

the teacher librarian in GI, and appreciate the value of collaboration in making GI work for you and your students. The final chapters of the book identify ways of dealing with common "roadblocks" along the path to acceptance of GI that were developed from interviews with practicing teacher librarians in Australia, France, Sweden, and the United States.

United Arab Emirates International Monetary Fund. Middle East and Central Asia Dept. 2016-07-27 This 2016 Article IV Consultation highlights that non-oil economic activity in the United Arab Emirates slowed to 3.7 percent in 2015. Negative effects on overall growth were partially offset by the increase in oil production. Despite the strong fiscal policy response to adjust to lower oil prices, the fiscal balance turned to a deficit of 2.1 percent of GDP, while the current account surplus declined to 3.3 percent of GDP. Banks remained well capitalized and liquid, though pressures on profitability are emerging as asset quality weakens owing to the

economic slowdown and rising funding costs. Economic activity is expected to moderate further in 2016, before improving over the medium term.

Nonprofit Management Michael J. Worth 2018-08-24 Michael J. Worth's student-friendly best-seller, *Nonprofit Management: Principles and Practice*, Fifth Edition, provides a broad, insightful overview of key topics affecting governance and management of nonprofit organizations. Worth covers the scope and structure of the nonprofit sector, leadership of nonprofits, managing the nonprofit organization, fundraising, earned income strategies, financial management, nonprofit lobbying and advocacy, managing international and global organizations, and social entrepreneurship. Written specifically for students, this applied text balances research, theory, and practitioner literature with current cases, timely examples, and the most recent data available. New to the Fifth Edition New cases related to accountability

and governance highlight new approaches to recent controversies and risks to nonprofits. Cases include the Wounded Warriors Project, Sweet Briar College, 4-H, Housing First, the Chan-Zuckerberg Initiative, the National Audubon Society, and an expanded study of governance issues at the Hershey Trust. Expanded discussions of risk management offer new insights on developing strategy, building capacity, and managing risk. New social networks and social media content provides students with practical strategies for using social media when fundraising and marketing. A new comprehensive case on the Girl Scouts of the USA recounts reforms undertaken by this iconic organization and current challenges it faces. The chapter on financial management has been substantially revised to reflect new requirements for nonprofit financial statements issued by the Financial Accounting Standards Board in 2016, as well as an expanded discussion of audits. An updated chapter on

fundraising includes information on the Tax Cuts and Jobs Act passed in December 2017, which has implications for charitable giving. New references at the end of every chapter guide readers to relevant cases in the Appendix, making it easy for instructors to incorporate the cases into classroom discussions.

Confronting Corruption in Business Alan T. Belasen 2015-12-07 *Confronting Corruption in Business* focuses on the contextual issues that trigger corruption to give the reader a more thorough understanding of destructive leadership. It provides students with a unique, critical perspective on issues of leadership, corruption, and policy in different countries, industries, and companies. While there isn't a universally agreed upon definition of corruption in social sciences, it generally refers to efforts to secure wealth or power through misusing public power for private gain. This kind of destructive leadership is typically treated as an anomaly, but this book closes the gap in our understanding by

highlighting the wider consequences of this behavior within business, and on an international level. Armed with this understanding, one also learns how to mitigate its causes and consequences. Edited by leading experts, the book includes contributions from scholars with international expertise on leadership, strategy, political science, finance, organizational change, and public policy. It is the first book to focus on corruption on the country level and within business, and students in international business, management, ethics, and leadership classes will find it a valuable read.

Wisconsin State Highway 23, Fond Du Lac to Plymouth, Fond Du Lac and Sheboygan Counties, Wisconsin 2014 Wisconsin Highway 23 is part of the National Highway System (NHS) and is a rural principal arterial that connects Fond du Lac and Sheboygan in east central Wisconsin. Both west and east ends of the project are located in growing urban areas of Fond du Lac and Plymouth. Nearly 20 miles in length, this highway corridor serves high traffic volumes near the urban areas and lower traffic

volumes in rural areas. This combined Limited Scope Final Environmental Impact Statement and Record of Decision (LS SFEIS/ROD) evaluates the No- Build Alternative, several Build Alternatives, and a series of corridor preservation alternatives for future transportation improvements, and selects an alternative. The Preferred Build Alternative is the Selected Alternative and reconstructs WIS 23 to a 4-lane divided highway on the existing alignment and creates interchanges, connector roads, and a trail. Corridor roads as well as the UW 151/WIS 23 interchange.

QuantCrit Nichole M. Garcia 2023-05-29 Critical race theory (CRT) in education centers, examines and seeks to transform the relationship that undergirds race, racism, and power. CRT scholars have applied a critical race framework to advance research methodologies in the form of qualitative interventions. Informed by this work, this book reconsiders the possibilities of CRT applications to quantitative

methodologies through 'QuantCrit'. This volume posits the question: How can quantitative methods, long critiqued for their inability to capture the nuance of everyday experience, support and further a critical race agenda in educational research? It provides a starting point for how QuantCrit principles are employed by interdisciplinary contributions in race and quantitative studies. The contributors to the book examine the legacy and genealogy of QuantCrit traditions across disciplines to uncover a rich lineage of methodological possibilities for disrupting racism in research. They argue that quantitative approaches cannot be adopted for racial justice aims without an ontological reckoning that considers historical, social, political, and economic power relations. Only then can quantitative approach be re-imagined and rectified. This book will be of interest to researchers and advanced students of Education, Sociology, Social Work, Politics, and Racial and Ethnic Studies. It was originally

published as a special issue of the journal, *Race Ethnicity and Education*.

Children and Peace Nikola Balvin 2019-10-20
This open access book brings together discourse on children and peace from the 15th International Symposium on the Contributions of Psychology to Peace, covering issues pertinent to children and peace and approaches to making their world safer, fairer and more sustainable. The book is divided into nine sections that examine traditional themes (social construction and deconstruction of diversity, intergenerational transitions and memories of war, and multiculturalism), as well as contemporary issues such as Europe's "migration crisis", radicalization and violent extremism, and violence in families, schools and communities. Chapters contextualize each issue within specific social ecological frameworks in order to reflect on the multiplicity of influences that affect different outcomes and to discuss how the findings can be applied in different

contexts. The volume also provides solutions and hope through its focus on youth empowerment and peacebuilding programs for children and families. This forward-thinking volume offers a multitude of views, approaches, and strategies for research and activism drawn from peace psychology scholars and United Nations researchers and practitioners. This book's multi-layered emphasis on context, structural determinants of peace and conflict, and use of research for action towards social cohesion for children and youth has not been brought together in other peace psychology literature to the same extent. *Children and Peace: From Research to Action* will be a useful resource for peace psychology academics and students, as well as social and developmental psychology academics and students, peace and development practitioners and activists, policy makers who need to make decisions about the matters covered in the book, child rights advocates and members of multilateral organizations such as

the UN.

Reshaping Graduate Education Through Innovation and Experiential Learning Jenkins, Toby S. 2020-10-16 Discussions on the importance and impact of pedagogical practice on students as whole persons are often concentrated on the P-12 or undergraduate learning experience. In higher education, many institutions do an outstanding job of complicating the undergraduate classroom to include civic engagement, community-based learning, education abroad, social action, and project-based learning. But, what about the graduate classroom? While there are indeed numerous graduate programs that push students to interact with strong, meaningful, difficult, and sometimes harsh facts, scholarship, and ideologies, the instructional methods have largely remained stagnant. New methods of constructing deep and meaningful learning in graduate education is essential for the transformation and continued evolution of

graduate school instruction. *Reshaping Graduate Education Through Innovation and Experiential Learning* is a crucial reference book that offers practice-based reflections on efforts to infuse creativity, social action, engaged learning, or other creative interventions into the graduate classroom. The book includes personal narratives that are grounded in pedagogical perspectives from graduate school instructors who share their experiences with innovative and transformative teaching practices. The goal of the book is to encourage graduate school professors to engage social justice education as something to be experienced and practiced in their courses and not just as a concept to be studied. As such, the book covers topics such as self-directed learning, counseling, and community mapping. It is ideal for graduate-level instructors in the field of education and other related social science areas, as well as junior faculty as they establish a teaching practice or veteran faculty seeking creative

transformation.

Transforming the Workforce for Children Birth Through Age 8

National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This

report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for

Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Report: Oman 2016 Oxford Business Group 2016-01-12 Oman's GDP grew 4.6% between 2013 and 2014 according to the Oman Central Bank, with hydrocarbons the main driver of the economy at almost 50% of GDP. Although the dip in oil prices has put pressure on government revenues, authorities are pressing ahead with spending plans for the sector, particularly in the downstream segment. The country's infrastructure expansion plans are also moving forward, particularly at the country's three ports as the country seeks to leverage its strategic position on the Strait of Hormuz and

establish itself as a global transport and logistics hub. Feeding off this development drive are the sultanate's banks, with project finance regarded as one of the most promising areas for lending growth. In the longer term, Oman Vision 2020 seeks to boost private sector participation in the economy and fuel SME growth in key sectors, including construction, retail, tourism and transport.
