Ethics and Morality in Consumption Deirdre Shaw 2016-04-14 Ethical consumerism is on the rise. No longer bound to the counter-cultural

fringes, ethical concerns and practices are reaching into the mainstream of society and being adopted by everyday consumers - from considering carbon miles to purchasing free-range eggs to making renewable energy choices. The wide reach and magnitude of ethical issues in society across individual and collective consumption has given rise to a series of important questions that are inspiring scholars from a range of disciplinary areas. These differing disciplinary lenses, however, tend to be contained in separate streams of research literature that are developing in parallel and in relative isolation. Ethics in Morality and Consumption takes an interdisciplinary perspective to provide multiple vantage points in creating a more holistic and integrated view of ethics in consumption. In this sense, interdisciplinary presupposes the consideration of multiple and distinct disciplines, which in this book are considered in delineated chapters. In addition, the Editors make an editorial contribution in the final chapter of the book by combining these separate disciplinary perspectives to develop a nascent interdisciplinary perspective that integrates these perspectives and presents platforms for further research.

Resources in Education 1976

The Films of John Schlesinger Julia Prewitt Brown 2019-08-24 The city, with its manifold distractions and violence, its invitation to intoxication and dream, had long served to represent the experience of modernity in works of art at the time John Schlesinger made his acclaimed urban documentary 'Terminus' in 1961. To be a reader of the city was to be a reader of modern life, and Schlesinger was a discriminating, at times relentless, reader of the city throughout his career, especially in his three greatest films, 'Midnight Cowboy', 'Sunday Bloody Sunday' and 'The Day of the Locust', set in New York, London and Los Angeles, respectively. His character-driven stories, evocation of the significance of the everyday, and insistence on ambiguities of situation and motive - all qualities he was known for - point to literary influences that reach back to the nineteenth century and earlier. 'The Films of John Schlesinger' is not only the first book to fully acknowledge those influences, but also the first book to explicate the power of his art to capture the modern, urban experiences of becoming an adult in an atmosphere that relentlessly promotes fantasies of success and wealth; of coming to terms with one's national identity in the context of international politics; and of attempting to transform the past, both personal and cultural, into a viable present.

Time Bomb Douglas L. Bland 2014-11-29 A look at how a major confrontation between Canada and the First Nations could erupt, and how it might be prevented. There are few greater tragedies than a war waged by a society against itself. As Time Bomb shows, a catastrophic confrontation between Canada's so-called "settler" and First Nations communities is not only feasible, it is, in theory, inevitable. Grievances, prejudice, and other factors all combine to make the likelihood of a First Nations uprising very real. Time Bomb describes how a nationwide insurgency could unfold, how the "usual" police and military reactions to First Nations protests would only worsen such a situation, and how, on the other hand, innovative policies might defuse the smouldering time bomb in our midst. The question all Canadians and First Nations must answer is this: Must we all suffer the disaster of a great national insurgency or will we act together to extinguish the growing danger in our midst?

Talk Show Campaigns Michael Parkin 2014-02-05 Over the past twenty years, presidential candidates have developed an entertainment talk show strategy in which they routinely chat with the likes of Oprah Winfrey, David Letterman, and Jon Stewart. In fact, between 1992 and 2012, there have been more than 200 candidate interviews on daytime and late night talk shows with nearly every

presidential candidate—from long shot primary contender to major party nominee—hitting the talk show circuit at some point during the campaign. This book explores the development of the entertainment talk show strategy and assesses its impact on presidential campaigns. The chapters mix detailed narrative with extensive empirical data on audiences, content, viewer reaction, and press coverage to explain why candidates have embraced this strategy and the conditions under which these interviews are most likely to meet their expectations. The book also explores how these interviews can enhance campaigns by connecting a critical segment of the voting population with candidates who provide useful political information in a casual setting. *Talk Show Campaigns* shows that this is more than a gimmick—it's a key part of how candidates communicate with voters, which reveals a lot about how campaigns have changed over the past two decades.

Energy and Human Resource Development in Developing Countries William Hickey

2016-12-14 This book is about engaging and empowering people through their own domestic resources, by using upstream energy to create larger downstream employment opportunities. Incorporating sustainability, resource enhancement, and energy responsibility can generate awareness and better utilization of the resources and reduce reliance on foreign aid and economic development programs, which reinforce a North/ South consumption-based economy rather than empower the localized population. The author proposes a new paradigm of employee development, localized engagement, and empowerment for resource-rich developing Asian countries, based on the utilization and upbraiding of their resources in-situ. Here scholars, policymakers, and investors will find that human resource development (HRD) can structure constructive change through criterion-based education and reap economic prosperity.

Chinese Identities on Screen Klaus Mühlhahn 2012 Since 1978, the changes brought on by China's reforms have had an inevitable and significant impact on the development of literature, the arts, and the whole spectrum of culture. As well, contemporary Chinese films have reflected this transition towards commercialization and internationalization, which has included constant changes in cultural policies and the economic conditions for film production. The articles in this collection argue that contemporary Chinese films display a profound shift in identity construction. They explore Chinese identities related to class, nation, and gender, and they highlight aspects of individual identity. All of these are marked by contradiction, tension, multiple versions, changes over time, and other evidence of contingency and construction. The book draws attention to uncertain and unpredictable qualities of "Chineseness" which are often torn between past and present, but are also increasingly comprised of local, national, and global elements. (Series: Chinese History and Society / Berliner China-Hefte - Vol. 40)

Better Governance Across the Board John Zinkin 2019-05-20 Better Governance Across the Board is a practical guide for achieving good corporate governance of organizations regardless of whether they are for profit, listed, state-owned, family owned, or widely held. It delves into the questions boards must ask if they are to fulfill their fiduciary duties, taking account of regulatory issues. Part 1 defines corporate governance, explaining the four reasons why it matters and how it applies to a wide range of organizations. Part 2 explores the "Five P" framework of Purpose, Principles, Power, People, and Processes that helps boards to create sustainable value. Part 3 concludes by showing how the organization's long-term "license to operate" is achieved by boards focusing on the three most important assets of the organization: its reputation; its people, and its processes. This book explores the dilemmas that currently exist in modern approaches to corporate governance and suggests ways of overcoming them. Based on ten years of teaching more than 1,500 directors of publicly

listed companies, it integrates key principles of leadership, ethics, branding, and governance into a unique five-factor framework to help directors make good decisions in strategy, risk management, succession planning, internal controls, and stakeholder engagement.
