Caldecott Medalist Allen Say presents a stunning graphic novel chronicling his journey as an artist during WWII, when he apprenticed under Noro Shinpei, Japan's premier cartoonist DRAWING FROM MEMORY is Allen Say's own story of his path to becoming the renowned artist he is today. Shunned by his father, who didn't understand his son's artistic leanings, Allen was embraced by Noro Shinpei, Japan's leading cartoonist and the man he came to love as his "spiritual father." As WWII raged, Allen was further inspired to consider questions of his own heritage and the motivations of those around him. He worked hard in rigorous drawing classes, studied, trained--and ultimately came to understand who he really is. Part memoir, part graphic novel, part narrative history, DRAWING FROM MEMORY presents a complex look at the real-life relationship between a mentor and his student. Walter Dean Myers Mary Ellen Snodgrass
2015-01-24 Walter Dean Myers, preeminent author of teen fiction biography and verse, refines the image of black characters that are frequently trivialized or vilified in juvenile literature, advertising, television, and film. From his saga *The Glory Field* to his novel *The Young Landlords*, Myers's canon surveys the complex realm of the teen years as colliding settings in home, school, and the street. This volume introduces readers to both the writer and his work, with an emphasis on the characters, dates, events, motifs, and themes from the books. Myers's 101 A-to-Z entries offer concise, analytical discussion on all topics and include

generous citations from primary and secondary sources. Each entry concludes with a selected bibliography on such subjects as segregation, Malcolm X, urbanism, writing, metafiction, drugs and alcohol, slavery, and the Vietnam War. Appendices offer a timeline of historical events in Myers's writings and forty topics for group or individual projects, oral analysis, background material, and theme development. A map of Harlem (where many of the stories are set), genealogical diagrams for characters, and an author chronology contribute to a comprehensive presentation.

New York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates's attempt to

answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children’s lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

Attack of the 50 Foot Blockchain David Gerard 2017-07-24 An experimental new Internet-based form of money is created that anyone can generate at home; people build frightening firetrap computers full of video cards, putting out so much heat that one operator is hospitalised with heatstroke and brain damage. A young physics student starts a revolutionary new marketplace immune to State coercion; he ends up ordering hits on people because they might threaten his great

experiment, and is jailed for life without parole. Fully automated contractual systems are proposed to make business and the law work better; the contracts people actually write are unregulated penny stock offerings whose fine print literally states that you are buying nothing of any value. The biggest crowdfunding in history attracts \$150 million on the promise that it will embody “the steadfast iron will of unstoppable code”; upon release it is immediately hacked, and \$50 million is stolen. How did we get here? David Gerard covers the origins and history of Bitcoin to the present day, the other cryptocurrencies it spawned including Ethereum, the ICO craze and the 2017 crypto bubble, and the attempts to apply blockchains and smart contracts to business. Plus a case study on blockchains in the music industry. Bitcoin and blockchains are not a technology story, but a psychology story. World Without Fish Mark Kurlansky 2018-06-15

A KID’S GUIDE TO THE OCEAN "Can you imagine a world without fish? It's not as crazy as it sounds. But if we keep doing things the way we've been doing things, fish could become extinct within fifty years. So let's change the way we do things!" World Without Fish is the uniquely illustrated narrative nonfiction account—for kids—of what is happening to the world’s oceans and what they can do about it. Written by Mark Kurlansky, author of *Cod*, *Salt*, *The Big Oyster*, and many other books, *World Without Fish* has been praised as “urgent” (*Publishers Weekly*) and “a wonderfully fast-paced and engaging primer on the key questions surrounding fish and the sea” (Paul Greenberg, author of *Four Fish*). It has also been included in the New York State Expeditionary Learning English Language Arts Curriculum. Written by a master storyteller, *World Without Fish* connects all the dots—biology, economics, evolution, politics, climate, history, culture, food, and nutrition—in a way that kids can really

understand. It describes how the fish we most commonly eat, including tuna, salmon, cod, swordfish—even anchovies— could disappear within fifty years, and the domino effect it would have: the oceans teeming with jellyfish and turning pinkish orange from algal blooms, the seabirds disappearing, then reptiles, then mammals. It describes the back-and-forth dynamic of fishermen, who are the original environmentalists, and scientists, who not that long ago considered fish an endless resource. It explains why fish farming is not the answer—and why sustainable fishing is, and how to help return the oceans to their natural ecological balance. Interwoven with the book is a twelve-page graphic novel. Each beautifully illustrated chapter opener links to the next to form a larger fictional story that perfectly complements the text.

Major Decisions Laurie Grobman 2020-03-13 A practical how-to guide for students and a powerful reminder of the value of a humanities education In recent decades, the humanities have struggled to justify themselves in the

American university. The costs of attending a four-year college have exploded, resulting in intense pressure on students to major in STEM (science, technology, engineering, and mathematics), business, and other pre-professional or "practical" majors that supposedly transmit more marketable skills than can be acquired from the humanities. But, as Laurie Grobman and E. Michele Ramsey argue, this vision of humanities majors idly pondering the meaning of life for four years is inaccurate. Major Decisions demonstrates how choosing a major in the humanities is a worthwhile investment in a global economy that is shifting in the direction of college graduates who think broadly, critically, and ethically. Indeed, the core skills and knowledge imparted by an education in the humanities—including facility with written and verbal communication, collaboration, problem-solving, technological literacy, ethics, leadership, and an understanding of the human impacts of globalization—are immensely useful

to employers across a variety of sectors. Major Decisions serves as a deeply informative guide to students and parents—and provides a powerful reminder to employers and university administrators of the true value of an education in the humanities.

King and the Dragonflies (Scholastic Gold)

Kacen Callender 2020-02-04 A 2021 Coretta Scott King Honor Book! Winner of the 2020 National Book Award for Young People's Literature! Winner of the 2020 Boston Globe-Horn Book Award for Fiction and Poetry! In a small but turbulent Louisiana town, one boy's grief takes him beyond the bayous of his backyard, to learn that there is no right way to be yourself. FOUR STARRED REVIEWS! Booklist School Library Journal Publishers Weekly The Horn Book Twelve-year-old Kingston James is sure his brother Khalid has turned into a dragonfly. When Khalid unexpectedly passed away, he shed what was his first skin for another to live down by the bayou in their small Louisiana town. Khalid still visits in dreams, and

King must keep these secrets to himself as he watches grief transform his family. It would be easier if King could talk with his best friend, Sandy Sanders. But just days before he died, Khalid told King to end their friendship, after overhearing a secret about Sandy-that he thinks he might be gay. "You don't want anyone to think you're gay too, do you?" But when Sandy goes missing, sparking a town-wide search, and King finds his former best friend hiding in a tent in his backyard, he agrees to help Sandy escape from his abusive father, and the two begin an adventure as they build their own private paradise down by the bayou and among the dragonflies. As King's friendship with Sandy is reignited, he's forced to confront questions about himself and the reality of his brother's death. The Thing About Jellyfish meets The Stars Beneath Our Feet in this story about loss, grief, and finding the courage to discover one's identity, from the author of Hurricane Child.

No Boston Olympics Chris Dempsey 2017-05-02

In 2013 and 2014, some of Massachusetts' wealthiest and most powerful individuals hatched an audacious plan to bring the 2024 Summer Olympics to Boston. Like their counterparts in cities around the world, Boston's Olympic boosters promised political leaders, taxpayers, and the media that the Games would deliver incalculable benefits and require little financial support from the public. Yet these advocates refused to share the details of their bid and only grudgingly admitted, when pressed, that their plan called for billions of dollars in construction of unneeded venues. To win the bid, the public would have to guarantee taxpayer funds to cover cost overruns, which have plagued all modern Olympic Games. The United States Olympic Committee (USOC) chose Boston 2024's bid over that of other American cities in January 2015-and for a time it seemed inevitable that the International Olympic Committee (IOC) would award the Games to Boston 2024. No Boston Olympics is the story of how an ad hoc,

underfunded group of diverse and engaged citizens joined together to challenge and ultimately derail Boston's boosters, the USOC, and the IOC. Chris Dempsey was cochair of No Boston Olympics, the group that first voiced skepticism, demanded accountability, and catalyzed dissent. Andrew Zimbalist is a world expert on the economics of sports, and the leading researcher on the hidden costs of hosting mega-events such as the Olympics and the World Cup. Together, they tell Boston's story, while providing a blueprint for citizens who seek to challenge costly, wasteful, disruptive, and risky Olympic bids in their own cities.
