**The Comprehension Toolkit** Stephanie Harvey 2005 Grades 3-6 "Active literacy is the means to deeper understanding and diverse, flexible thinking, and is the hallmark of our approach to teaching and learning. Reading, writing, talking, listening, and investigating are the cornerstones

of active literacy. The Toolkit captures the language of thinking we use to explicitly teach kids to comprehend the wide variety of informational text they encounter. Through the Toolkit lessons, we demonstrate how the kids adopt and adapt our teaching language as their learning language." - Stephanie Harvey and Anne Goudvis In The Comprehension Toolkit, Stephanie Harvey and Anne Goudvis have created an intensive curricular resource designed to help students understand, respond to, and learn from nonfiction text. By actively engaging students in reading, talking, and writing about information and ideas, The Comprehension Toolkit provides a foundation for developing independent readers and learners across the curriculum and throughout the school year. Framed around the Gradual Release of Responsibility approach, The Comprehension Toolkit provides scaffolded comprehension strategy instruction. First through modeling and guided practice, then releasing responsibility to

students through collaborative practice, independent practice, and application, the Toolkit's lessons teach students to use comprehension strategies flexibly in a variety of texts, topics, and subject areas. Professional Support A series of resources introduce, support, and extend the Toolkit's core lessons. The Teacher's Guide outlines the thinking behind the Toolkit and describes its components, instructional design, and assessment options. The Resources for The Comprehension Toolkit CD-ROM provides an array of print and video resources including a photographic overview of an Active Literacy Classroom, downloadable research articles, templates, assessment masters, and full-colour lesson text. Extend and Investigate helps you extend the Toolkit's comprehension strategies across the curriculum and throughout the year. It provides strategies for content area reading and research, textbook reading, test reading, and a variety of practical bibliographies. 6 Strategy Clusters The 26

strategy lessons in The Comprehension Toolkit are organized into six Strategy Cluster books. Informational Text A series of short, engaging, real-world informational texts provide an effective context for using and practising the Toolkit's comprehension strategies. The Source Book of Short Text provides two kinds of nonfiction text: Lesson Text, 24 articles from children's magazines; and Nonfiction Short Text, 43 short informational articles specially written for the Toolkit.

*Building Academic Vocabulary* Robert J.

Marzano 2006-12-01 In *Building Academic*

*Vocabulary: Teacher s Manual*, Robert J.

Marzano and Debra J. Pickering give teachers a practical way to help students master academic vocabulary. Research has shown that when

teachers, schools, and districts take a systematic approach to helping students identify and master essential vocabulary and concepts of a given subject area, student comprehension and achievement rises. In the manual, readers will find the following tools: \* A method to help teachers, schools, and districts determine which academic vocabulary terms are most essential for their needs \* A six-step process for direct instruction in subject area vocabulary \* A how-to to help students use the *Building Academic Vocabulary: Student Notebook*. The six-step method encourages students to learn critical academic vocabulary by connecting these terms to prior knowledge using linguistic and non-linguistic means that further encourage the refinement and deepening of their understanding. \* Suggestions for tailoring academic vocabulary procedures for English Language Learners. \* Samples and blackline masters for a variety of review activities and games that reinforce and refine student

understanding of the academic terms and concepts they learn. The book also includes a list of 7, 923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. Building Academic Vocabulary: Teacher s Manual puts into practice the research and ideas outlined in Marzano s previous book Building Background Knowledge for Academic Achievement. Using the teacher s manual and vocabulary notebooks, educators can guide students in using tools and activities that will help them deepen their own understanding of critical academic vocabulary--the building blocks for achievement in each discipline.
