Tactical Nuclear Weapons and NATO Douglas T. Stuart 2012 is understudied, both inside and outside of government. Tactical weapons, although less awesome than their strategic siblings, carry significant security and political risks, and they have not received the attention that is commensurate to their importance. Second, it is clear that whatever the future of these arms, the status quo is unacceptable. It is past the time for NATO to make more resolute decisions, find a coherent strategy, and formulate more definite plans about its nuclear status. Consequently, decisions about the role of nuclear weapons within the Alliance and the associated supporting analysis are fundamental to the future identity of NATO. At the Lisbon Summit in Portugal in November 2010, the Alliance agreed to conduct the Deterrence and Defense Posture Review (DDPR). This effort is designed to answer these difficult questions prior to the upcoming NATO Summit in May 2012.

Sweating the Small Stuff David Whitman 2008 This book tells the story of six secondary schools that have succeeded in eliminating or dramatically shrinking the achievement gap between whites and disadvantaged black and Hispanic students. It recounts the stories of the University Park Campus School (UPCS) in Worcester, the American Indian Public Charter School in Oakland, Amistad Academy in New Haven, the Cristo Rey Jesuit High School in Chicago, the KIPP Academy in the Bronx, and the SEED school in Washington, D.C.

Strategy For Defeat: The Luftwaffe, 1933-1945 [Illustrated Edition] Williamson Murray 2015-11-06 Includes the Aerial Warfare In Europe During World War II illustrations pack with over 200 maps, plans, and photos. This book is a comprehensive analysis of an air force, the Luftwaffe, in World War II. It follows the Germans from their prewar preparations to their final defeat. There are many disturbing parallels with our current situation. I urge every student of military science to read it carefully. The lessons of the nature of warfare and the application of airpower can provide the guidance to develop our fighting forces and employment concepts to meet the significant challenges we are certain to face in the future.

Successful Public/private Partnerships from Principles to Practices Stephen B. Friedman 2016 In a time of diminished resources, the public sector is facing new challenges - ranging from meeting the needs of aging baby boomers and the massive millennial generation to coping with a national infrastructure deficit to fostering economic competitiveness. Addressing these challenges requires a collaborative effort by the public and private sectors to use the skills and resources of each to shape and carry out developments that respond to these challenges. As a result, public private partnerships (PPPs) in development, infrastructure, and public facilities are ever more essential. This book will arm public and private sector representatives with an understanding of the obstacles and opportunities inherent in PPPs, as well as provide a toolkit of best practices and lessons learned for the creation of effective PPPs.

Integration of the Armed Forces, 1940-1965 Morris J. MacGregor 2020-06-18 "In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy."_x000D_ Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America. He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff.

IBM z/OS V2R2 Communications Server TCP/IP Implementation: Volume 3 High Availability, Scalability, and Performance Bill White 2017-04-07 For more than 50 years, IBM® mainframes have supported an extraordinary portion of the world's computing work, providing centralized corporate databases and mission-critical enterprise-wide applications. IBM z Systems™ platform, the latest generation of the IBM distinguished family of mainframe systems, has come a long way from its IBM System/360 heritage. Likewise, its IBM z/OS® operating system is far superior to its predecessors in providing, among many other capabilities, world-class and state-of-the-art support for the TCP/IP protocol suite. TCP/IP is a large and evolving collection of communication protocols managed by the Internet Engineering Task Force (IETF), an open, volunteer organization. Because of its openness, the TCP/IP protocol suite has become the foundation for the set of technologies that form the basis of the Internet. The convergence of IBM mainframe capabilities with Internet technology, connectivity, and standards (particularly TCP/IP) is dramatically changing the face of information technology and driving requirements

for even more secure, scalable, and highly available mainframe TCP/IP implementations. The IBM z/OS Communications Server TCP/IP Implementation series provides understandable, step-by-step guidance for enabling the most commonly used and important functions of z/OS Communications Server TCP/IP. This IBM Redbooks® publication is for people who install and support z/OS Communications Server. It starts with a discussion of virtual IP addressing (VIPA) for high-availability, with and without a dynamic routing protocol. It describes several workload balancing approaches with the z/OS Communications Server. It also explains optimized sysplex distributor intra-sysplex load balancing. This function represents improved application support using optimized local connections together with weight values from extended Workload Manager (WLM) interfaces. Finally, this book highlights important tuning parameters and suggests parameter values to maximize performance in many client installations.

Report of the Fort Hood Independent Review Committee United States. Fort Hood Independent Review Committee 2020-12-22 The U. S. Secretary of the Army appointed the Fort Hood Independent Review Committee(FHIRC or Committee) and directed it to "conduct a comprehensive assessment of the Fort Hood command climate and culture, and its impact, if any, on the safety, welfare and readiness of our Soldiers and units." In addressing this mandate, the FHIRC determined that during the time period covered by the Review, the command climate relative to the Sexual Harassment/Assault Response and Prevention (SHARP) Program at Fort Hood was ineffective, to the extent that there was a permissive environment for sexual assault and sexual harassment. As set forth in this Report, specific Findings demonstrate that the implementation of the SHARP Program was ineffective. During the review period, no Commanding General or subordinate echelon commander chose to intervene proactively and mitigate known risks of high crime, sexual assault and sexual harassment. The result was a pervasive lack of confidence in the SHARP Program and an unacceptable lack of knowledge of core SHARP components regarding reporting and certain victim services. Under a structurally weak and under-resourced III Corps SHARP Program, the Sexual Assault Review Board (SARB) process was primarily utilized to address administrative and not the actual substantive aspects of the Program. While a powerful tool by design, the SARB process became a missed opportunity to develop and implement proactive strategies to create a respectful culture and prevent and reduce incidents of sexual assault and sexual harassment. From the III Corps level and below, the SHARP Program was chronically under-resourced, due to understaffing, lack of training, lack of credentialed SHARP professionals, and lack of funding. Most of all, it lacked command emphasis where it was needed the most: the enlisted ranks. A resonant symptom of the SHARP Program's ineffective implementation was significant underreporting of sexual harassment and sexual assault. Without intervention from the NCOs and officers entrusted with their health and safety, victims feared the inevitable

consequences of reporting: ostracism, shunning and shaming, harsh treatment, and indelible damage to their career. Many have left the Army or plan to do so at the earliest opportunity. As part of the command climate, the issues of crime and Criminal Investigation Division (CID) operations were examined. The Committee determined that serious crime issues on and off Fort Hood were neither identified nor addressed. There was a conspicuous absence of an effective risk management approach to crime incident reduction and Soldier victimization. A military installation is essentially a large, gated community. The Commander of a military installation possesses a wide variety of options to proactively address and mitigate the spectrum of crime incidents. Despite having the capability, very few tools were employed at Fort Hood to do so. Both the Directorate of Emergency Services (DES) and the CID have a mandate and a role to play in crime reduction. Each contributed very little analysis, feedback and general situational awareness to the command toward facilitating and enabling such actions. This was another missed opportunity. The deficient climate also extended into the missing Soldier scenarios, where no one recognized the slippage in accountability procedures and unwillingness or lack of ability of noncommissioned officers (NCOs) to keep track of their subordinates. The absence of any formal protocols for Soldiers who fail to report resulted in an ad hoc approach by units and Military Police (MP) to effectively address instances of missing Soldiers during the critical first 24 hours, again with adverse consequences. Consistent with the FHIRC Charter, this Report sets forth nine Findings and offers seventy Recommendations.

Parachute Recovery Systems Theo W. Knacke 1992 The purpose of this manual is to provide recovery system engineers in government and industry with tools to evaluate, analyze, select, and design parachute recovery systems. These systems range from simple, one-parachute assemblies to multiple-parachute systems, and may include equipment for impact attenuation, flotation, location, retrieval, and disposition. All system aspects are discussed, including the need for parachute recovery, the selection of the most suitable recovery system concept, concept analysis, parachute performance, force and stress analysis, material selection, parachute assembly and component design, and manufacturing. Experienced recovery system engineers will find this publication useful as a technical reference book; recent college graduates will find it useful as a textbook for learning about parachutes and parachute recovery systems; and technicians with extensive practical experience will find it useful as an engineering textbook that includes a chapter on parachute-related aerodynamics. In this manual, emphasis is placed on aiding government employees in evaluating and supervising the design and application of parachute systems. The parachute recovery system uses aerodynamic drag to decelerate people and equipment moving in air from a higher velocity to a lower velocity and to a safe landing. This lower velocity is known as rate of descent, landing velocity, or impact velocity, and is determined by the following requirements: (1) landing personnel uninjured and ready for action, (2) landing equipment and air vehicles undamaged and ready for use or refurbishment, and (3) impacting ordnance at a preselected angle and velocity.

Corruption in Conflict John F. Sopko 2016-11-23 This report examines how the U.S. government -- primarily the Departments of Defense (DOD), State, Treasury, and Justice (DOJ), and the U.S. Agency for International Development (USAID) -- understood the risks of corruption in Afghanistan, how the U.S. response to corruption evolved, and the effectiveness of that response. The report identifies lessons to inform U.S. policies and actions at the onset of and throughout a contingency operation and makes recommendations for both legislative and executive branch action. This analysis reveals that corruption substantially undermined the U.S. mission in Afghanistan from the very beginning of Operation Enduring Freedom. It concludes that failure to effectively address the problem means that U.S. reconstruction programs, at best, will continue to be subverted by systemic corruption and, at worst, will fail. Deep Energy Retrofit Guide for Public Buildings Rüdiger Lohse 2019-04-10 This book provides detailed information on how to set up Deep Energy Retrofits (DERs) in public buildings, and shares in-depth insights into the current status of the major technologies, strategies and practical best practice examples of how to cost-effectively combine them. Case studies from Europe are analyzed with respect to energy use before and after renovation, reasons for undertaking the renovation, co-benefits achieved, resulting cost-effectiveness, and the business models employed. The building sector holds the potential for tremendous improvements in terms of energy efficiency and reducing carbon emissions, and energy retrofits to the existing building stock represent a significant opportunity in the transition to a low-carbon future. Moreover, investing in highly efficient building materials and systems can replace long-term energy imports, contribute to cost cutting, and create a wealth of new jobs. Yet, while the technologies needed in order to improve energy efficiency are readily available, significant progress has not yet been made, and "best practices" for implementing building technologies and renewable energy sources are still relegated to small "niche" applications. Offering essential information on Deep Energy Retrofits, the book offers a valuable asset for architects, public authorities, project developers, and engineers alike.
