Managing Microaggressions Monnica T. Williams 2020-06-17

Microaggressions have been identified as a common and troubling cause of low retention and poor psychotherapy outcomes for people of color. All therapists want and intend to be helpful to their clients, but many unknowingly committing microaggressions due to unconscious biases and misconceptions about people from ethnic and racial minority groups. Managing Microaggressions is intended for mental health clinicians who want to be more effective in their use of evidence-based practices with people of color. Many well-intentioned clinicians lack the necessary skills and knowledge to effectively engage those who are ethnoracially different. This book discusses the theoretical basis of the problem (microaggressions), the cognitive-behavioral mechanisms by which the problem is maintained, and how to remedy the problem using CBT principles, with a focus on the role of the therapist. Not only will readers learn how to avoid offending or harming their clients, they will also be better equipped to help clients navigate microaggressions they encounter in their daily lives. Managing Microaggressions will endow clinicians with a clear understanding of these behaviors and the errors that underpin them, leading to more successful therapy.

Passionate Work Renyi Hong 2022-04-04 In *Passionate Work*, Renyi Hong theorizes the notion of being "passionate about your work" as an affective project that encourages people to endure economically trying situations like unemployment, job change, repetitive and menial labor, and freelancing. Not simply a subject of aspiration, passion has been deployed as a means to build resilience and mend disappointments with our experiences of work. Tracking the rise of passion in nineteenth-century management to trends like gamification, coworking, and unemployment insurance, Hong demonstrates how passion can emerge in instances that would not typically be understood as passionate. Gamification numbs crippling boredom by keeping call center workers in an unthinking, suspensive state, pursuing even the most banal tasks in hope of career advancement. Coworking spaces marketed toward freelancers combat loneliness and disconnection at the precise moment when middle-class sureties are profoundly threatened. Ultimately, Hong argues, the ideal of passionate work sustains a condition of cruel optimism in which passion is offered as the solution for the injustices of contemporary capitalism.

[The Routledge Handbook of Architecture, Urban Space and Politics, Volume I](#) Nikolina Bobic 2022-10-28 For architecture and urban space to have relevance in the 21st Century, we cannot merely reignite the approaches of thought and design that were operative in the last century. This is despite, or because of, the nexus between politics and space often being theorized as a representation or by-product of politics. As a symbol or an effect, the spatial dimension is depoliticized. Consequently, architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role. This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing. Considering both ongoing and unprecedented global problems - from violence and urban warfare, the refugee crisis, borderization, detention camps, terrorist attacks to capitalist urbanization, inequity, social unrest and climate change - this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics, architecture and urban space. Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times. The operative and active political reading of space is disseminated through five thematic: Violence and War Machines; Security and Borders; Race, Identity and Ideology; Spectacle and the Screen; and Mapping Landscapes and Big Data. This first volume of the handbook frames cutting-edge contemporary debates and presents studies of actual theories and projects that address spatial politics. This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities.

Shopping While Black Shaun L. Gabbidon 2020-05-25 Winner of the 2022 Academy of Criminal Justice Sciences Outstanding Book Award! *Shopping While Black: Consumer Racial Profiling in America* lays out the results of nearly two decades of research on racial profiling in retail settings. Gabbidon and Higgins address the generally neglected racial profiling that occurs in retail settings. Although there is no existing national database on shoplifting or consumer racial profiling (CRP) from which to study the problem, they survey relevant legal cases and available data sources. This problem clearly affects a large number of racial/ethnic minorities, and causes real harm to the victims, such as the emotional trauma attached to being excessively monitored in stores and, in the worst-case scenarios, falsely accused of shoplifting. Their analysis is informed by their own experience: one co-author is a former security executive for a large retailer, and both are Black men who understand firsthand the sting of being profiled because of their color. After providing an overview of the history of CRP and the official and unofficial data sources and criminological literature on this topic, they address public opinion polls, as well as the extent and impact of victimization. They also provide a review of CRP litigation, provide recommendations for retailers to reduce racial profiling, and also chart some directions for future research. This book is appropriate for researchers as well as

advanced undergraduates and graduate students in Criminology, Black Studies, Ethnic Studies, Sociology, Security Studies, and Law programs, and will be of interest to the general reader.

The Human Brand Chris Malone 2013-09-10 Why we choose companies and brands in the same way that we unconsciously perceive, judge, and behave toward one another People everywhere describe their relationships with brands in a deeply personal way-we hate our banks, love our smartphones, and think the cable company is out to get us. What's actually going on in our brains when we make these judgments? Through original research, customer loyalty expert Chris Malone and top social psychologist Susan Fiske discovered that our perceptions arise from spontaneous judgments on warmth and competence, the same two factors that also determine our impressions of people. We see companies and brands the same way we automatically perceive, judge, and behave toward one another. As a result, to achieve sustained success, companies must forge genuine relationships with customers. And as customers, we have a right to expect relational accountability from the companies and brands we support. Applies the social psychology concepts of "warmth" (what intentions others have toward us) and "competence" (how capable they are of carrying out those intentions) to the way we perceive and relate to companies and brands Features in-depth analyses of companies such as Hershey's, Domino's, Lululemon, Zappos, Amazon, Chobani, Sprint, and more Draws from original research, evaluating over 45 companies over the course of 10 separate studies The Human Brand is essential reading for understanding how and why we make the choices we do, as well as what it takes for companies and brands to earn and keep our loyalty in the digital age.
