Fluent Forever Gabriel Wyner 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

200 Write-And-Learn Sight Word Practice Pages Scholdeners 2019-09-27 The Most Effective Way to Master the 200 Sight Words Essential to your Child's Reading & Writing Success From the trusted name in children's education worldwide comes the biggest and most comprehensive sight word learning and practice workbook. Once your child has mastered these key words they will: □ Read far more fluently □ Write with greater ease □ Spell with increased accuracy □ Boost reading comprehension □ Accelerate language learning Why Your Child MUST Master Sight Words Sight words are a set of words that

constantly appear on almost any page of writing, such as 'who, does, come, we'. They are the building blocks of written language. However, many sight words cannot be 'sounded out' because they do not follow the standard rules of spelling. The child has to memorize sight words as a whole, by sight, so that they recognize them immediately without having to decode the spelling. The problem is that minimal instruction is given by teachers and parents. Often, little more is done than showing the word to the child and telling them what it is. However, for many children, this is not nearly enough. As a result, their reading and comprehension of these crucial words is lacking, which significantly brings down their overall reading ability. Scholdener's Sight Word Workbook is the solution. A Multi-Dimensional Approach Educational research has shown that the best technique for learning sight words is accurate writing and spelling of the word, comprehension of its use in a simple sentence, and a visual representation of the phrase to reinforce how the word is used in context. Scholdener's Sight Word Workbook is the only workbook that uses this multi-dimensional model for each and every one of its 200 words. This ensures that the child really grasps the sight word, along with its spelling, meaning and usage. In teaching terms, giving your child the opportunity to learn words in proper context is known as 'meaningful reading'. This is an extremely effective tool that has been shown to be far superior for retention than plain memorization or rote learning. Includes Dolche Word List Educator Dr Edward William Dolch developed the 'Dolch Sight Words List' by studying the most frequently occurring words in children's books. These words comprise a staggering 80% of the words you would find in a standard children's book. Once a child knows this list of words, it makes reading much easier. You'll be pleased to know that this workbook incorporates the key Dolch words. Book Details 8.5" x 11" - Large size provides plenty of room for writing inside. 200 sight words - TWICE as many as other workbooks. More than 100 pages of writing exercises. First 130 High Frequency Words in Cartoons Lidia Stanton 2020-05-12 For sample pages preview, follow the link: <https://books.lidiastanton.com> The learning resource First 130 High Frequency Words in Cartoons consists of two books: a guide to HFWs (Multisensory Guide) an activity pack (Activity Sheets and Flash Cards) The Multisensory Guide provides an 'at-a-glance' breakdown of visual hints for high frequency words (HFWs) introduced in Year Reception and Year 1. It reveals that each HFW, whether phonically regular or irregular, can be a story hidden inside a cartoon, and that it has a shape that can be recognised. Colour is introduced to emphasise letter (not sound) patterns, where these are visually identifiable, e.g. words within words ('am' and 'me' in 'came' and 'name'; 'an' in 'can' and 'can't', etc.) Using the above principles, the child is encouraged to engage in a range of practical, multisensory learning activities that strengthen their HFW knowledge and result in confident rapid HFW recognition. The Activity Sheets and Flash Cards book supplements the guide. It has removable/detachable worksheets that can be displayed around the house. As sounding out is the most reliable reading strategy, learning tricky words by sight is not recommended to children who make the expected progress in Early Years and Key Stage 1 literacy. However, the method presented here works well for children with specific learning difficulties (SpLDs), especially those who are significantly behind their peers in reading and spelling assessments. Children with dyslexia take longer to break the phonemic code; for some, the goal of becoming a fluent phonemic reader may require years of specialist instruction. Sight word recognition equips SpLD children with an initial bank of HFWs they can rely upon. As an example, once the child has learned the visual pattern 'the' (using a cartoon of two heavy elephants overlaid on the word 'the'), the pattern becomes regular to them, not tricky. They now remember

how to recognise 'the' as well as how to read 'them', 'then', 'they' and 'their'. The visual cue 'the' is thus temporary, becoming part of the child's bank of decodable words. Rapid identification of HFWs improves reading fluency. Children with SpLDs begin to experience early reading success and start enjoying literacy activities. Importantly, parallel with the visual instruction, a structured and intensive phonemic decoding programme should be used as part of specialist support at school or home. In this sense, the visual reading method supplements phonemic decoding instruction, rather than replacing it. Children, with or without dyslexia, who are successful at sounding out regular words should be encouraged to do so every time they encounter a new word. The reason why both decodable and tricky words have been turned into visual cues in this book is to help the children accelerate their early literacy skills. Being able to rapidly read words and make up simple sentences during writing tasks boosts their self-image and minimises the chances of losing early enthusiasm for literacy. Multisensory instruction gives children more than one way to make connections when learning words. It targets visual skills (observing how letters within words unfold/reveal themselves through a story), motor (tactile) skills (tracing the letters within words on the background that relates to the story) and auditory ones (listening to the connecting story, engaging with it, answering questions, predicting what might happen next, etc.) Not every HFW story will inspire the child to use all of their senses (taste, smell, touch, sight, hearing and movement), but it will encourage them to engage with the material in more than one way.

I Can Fly Reading Program - Book A, Online Games Available, Orton-Gillingham Based Reading Lessons for Young Students Who Struggle with Reading and May Have Dyslexia Cheryl Orlassino 2014-02-01 The I Can Fly Reading Program, Books A & B, are lesson-based workbooks which provide lessons in phonics for children who are just beginning to learn to read. The methods used in this program are based on the Orton-Gillingham approach, in that every sound and spelling rule is taught in a structured, cumulative manner with repetition. Perfect for all young students, especially those who have learning delays, speech and language difficulties, APD, autism, and those with a family history of dyslexia and may be dyslexic. This program is perfect for homeschooling, tutoring and for parents who need to help their children. There's no training needed, and the program is step-by-step, requiring no planning or lesson preparation. This program can also be used in the classroom with our Kindle version for the Smart Board or for remote teaching. All that is needed is the Kindle App (which can be used on PCs and Macs). A web app is available to augment the program. Go to: ICanFlyReadingProgram (dot com). This book is colorful, with large text and a simple layout that is created to be visually appealing to children. The program comes in two books, Book A and Book B. Book A: the alphabet, consonants, vowels, consonant blends, FLOSS words, high frequency words, 'ch', 'sh', 'th', 'ck', 'ng', 'nk', VCV, 'oo', 'ou' and 'ow' as /ou/. Book B: 'ow' as long 'o', 'ay', 'ar', 'er', 'ir', 'or', 'ur', 'oy', 'oi', long vowel teams, the letter 'y', words ending with 'ie', 'ew', long 'o' words, long 'i' words, 'qu', 'au', 'aw', 'alk', 'ct', 'ea' as short 'e', protecting short vowels, and past tense words.
