Therapeutic Jurisprudence

Barbara A. Babb 2014

Therapeutic jurisprudence,
developed in the late 1980s, is
a field of inquiry. It is a lens
through which to examine the
effects of substantive laws,
legal rules, legal procedures,
and the behavior of legal
actors, including judges,
lawyers, court personnel, and
service providers, on the
psychological and emotional
well-being of justice system
participants, including the
legal actors themselves.
Therapeutic Jurisprudence is a
perspective or framework, and
its use suggests the need to
conduct empirical research to
determine whether outcomes
resulting from the application

of substantive laws, legal rules, and legal procedures and from the behavior of legal actors have therapeutic (helpful) or antitherapeutic (harmful) consequences, both intended and unintended. In addition, therapeutic jurisprudence involves a reform agenda, as it urges that findings from the behavioral and social sciences be used to transform laws, rules, procedures. and the behavior of legal actors in a manner that promotes well-being. This interdisciplinary focus enables therapeutic jurisprudence scholarship and practice to encompass a broad array of subject areas.

The Evolution of Mental Health Law Lynda E. Frost 2001-01-01
 Chronicles a relatively new field that has developed around the goals of protecting the

rights and needs of people with disabilities, defining the proper sphere of individualization in criminal justice, and drawing boundaries between science and morality in decision making. Leading specialists from the field's many domains are brought together, including lawyers, health policy specialists, forensic psychologists, law professors, psychiatrists, and sociologists, who share the theoretical insights and empirical research of significant developments in mental health law and policy in the past 25 yrs. Particularly notable are chapters that examine shifts in attitudes toward the use of human participants in research; whether the statutory and regulatory framework of the increasingly privatized public mental health services system adequately protects patients' rights; how notions of therapeutic jurisprudence influence the behavior of judges and lawyers; and the means by which judges, lawyers, and clinicians can work from a more therapeutic

frame of reference in the context of civil commitment proceedings. It is maintained that this volume will be useful to specialists in law, psychology, and psychiatry who are involved in mental health law and policy.

Finding Common Ground: Mental Illness Recognition and Crisis Response for Law

Enforcement Richard Crino
2015-03-23
The need to assess the mental status and intentions of individuals has become a routine requirement of law enforcement officers. In the case of person's diagnosed with mental illness, it is critical that officers are able to recognize when they encounter someone with these issues, and that the officers have the skills necessary to balance their personal and public safety concerns with the safety and care of the person with mental illness. In his work designing treatment programs for individuals with mental illness, Richard Crino, in partnership with police representatives and state officials from various departments, co-designed Rhode Island's first crisis certification program for law enforcement officers. Crino's landmark book includes segments of this program, providing officers with education in how to recognize various psychiatric disorders; how and when to use verbal techniques in crisis situations; violence prevention tips and

strategies and much, much more.

AHLA Fundamentals of Behavioral Health Care Law

Peter J. Domas 2016 Beginning in the mid-1950s, the approach to addressing serious behavioral health disorders began to shift from institutionalizing those afflicted to making community based outpatient treatment available. By the 1960s treatment policy had shifted to this new model to promote integrating people with mental illnesses into their communities. By 1970 community support programs began to appear with an emphasis on a fully continuous system of care that would serve the comprehensive needs of the seriously mentally ill. However, integrating behavioral and physical health requires that the applicable jurisprudence evolve at the same pace, and this faces resistance. Despite state legislatures' policy decisions that persons with mental illness can live in our society as functioning individuals, our jurisprudence of tort and injury

law is often an impediment to that goal. This publication will serve as an introduction to the complex questions posed by behavioral health and the law. Coverage includes: Change from institutionalization to community based outpatient system of care Legal duty owed by behavioral health providers to others Hindsight bias and its effect on behavioral health jurisprudence Criteria for when someone can be subjected to involuntary psychiatric treatment The impact of patient's illness on the rules that govern treatment records Integration of behavioral health with physical medical issues Includes behavioral health terminology, acronyms, abbreviations, and a list of governmental entities involved in behavioral health State charts on civil commitment, duty to ward, and confidentiality of mental health records

Law and Mental Health Professionals Margaret Charlton 2006 The Law and Mental Health Professionals series is designed to provide a

resource for both mental health professionals and attorneys regarding mental health law in each state. The series presents the laws addressing many areas pertinent to mental health professionals. Some of the issues discussed include setting up a private practice, working with health care provider organizations, understanding the duty to warn, and understanding the duty to report abuse and neglect of children and adults. The Law and Mental Health Professionals series is a concise and easy-to-understand resource outlining the obligations and responsibilities of mental health professionals according to the law in any given state. It is a part of the Law and Mental Health Professionals series.

Confronting Racism Robert T. Carter 2019-11-05 This book proposes a comprehensive approach to confronting racism through a foundational framework as well as practical strategies to correct and reverse the course of the past and catalyze the stalled efforts of the present. It will do so by focusing on those specific aspects of law and legal theory that intersect with psychological research and practice. In Part I, the historical and current underpinnings of racial injustice and the obstacles to combating racism are introduced. Part II examines the documented psychological and emotional effects of racism, including race-based traumatic stress. In Part III, the authors analyze the application of forensic mental health assessment in addressing race-related experiences and present a legal and policy framework for reforming institutional and organizational policies. Finally, in part IV the authors advocate

for a close, collaborative approach among legal and mental health professionals and their clients to seek redress for racial discrimination. Confronting Racism provides a framework for legal, mental health, and other related social science professionals and leaders to acknowledge and act on the harmful aspects of our societal systems.

Advanced Introduction to Mental Health Law Michael L. Perlin 2021-01-29 Written by esteemed legal scholar Michael L. Perlin, this indispensable Advanced Introduction examines the long-standing but ever-dynamic relationship between law and mental health. The author discusses and contextualises how the law, primarily in the United States but also in other countries, treats mental health, intellectual disabilities, and mental incapacity, giving examples of how issues such as the rights of patients, the death penalty and the insanity

defense permeate constitutional, civil, and criminal matters, and indeed the general practice of law.

Provision of Mental Health Counseling Services Under TRICARE

Institute of Medicine 2010-06-23 In this book, the IOM makes recommendations for permitting independent practice for mental health counselors treating patients within TRICARE-the DOD's health care benefits program. This would change current policy, which requires all counselors to practice under a physician's supervision without regard to their education, training, licensure or experience.

Simon 2008-08-13 "Why did the defendant do it?" Mental health professionals are asked to help courts answer this question. To serve justice, the law calls for evidence of the mental state at the time a crime is committed, of suicide intent in civil litigation, and of mental capacity in contract litigation. The law asks psychiatrists and psychologists to retrospectively determine mental states -- a daunting task made even more difficult by the passage of time, the uncertain credibility of witnesses, the paucity of collateral sources of information, and often the death of the person in question. This is the first book dedicated entirely to the retrospective assessment of mental states.

This fascinating book explores the role of the psychiatrist and psychologist, as an expert witness in litigation, in rendering a retrospective judgment of an individual's mental state. Distinguished contributors apply their expertise in psychiatry, psychology, and the law to address the problems of retrospective assessment. With the goal of developing guidelines for more accurate retrospective assessment of mental states, they present topics such as Guidelines for conducting retrospective assessments in children and adults Guidelines for the retrospective assessment without benefit of direct examination Assessments of suicide cases in both civil and criminal litigation Psychological testing and interviewing techniques that may assist in retrospective assessment Methods and analysis to help clinicians and attorneys critically evaluate the search for "truth" about the past. This remarkable book will prove indispensable for helping

clinicians, lawyers, and judges better understand the complex and difficult process of retrospective reconstruction of mental states.

A Casebook of Mental Capacity in US Legislation

Lynn A. Schaefer 2022 "A Casebook of Mental Capacity in US Legislation: Assessment and Legal Commentary employs an applied and accessible approach to the assessment of mental capacity. Through the use of rich vignettes and case examples, the text provides legal commentary to illustrate state laws and ethical principles from varied decision-making capacities in distinct settings to fortify its assessment. The text begins by providing a background about decision-making capacity as a construct. It also provides practical guidance on capacity assessment germane to a broad range of clinical settings, including geropsychology, health psychology, and neuropsychology. It moves on

to reviewing decision-making rights that make up capacity, and provides ethical guidelines along with drawing the practitioner's attention to the common pitfalls. The case presentations and legal commentary underline key areas such as the capacity to consent to medical treatment, make welfare decisions, enter into a sexual relationship, make financial decisions, create or revoke a will, litigate and contract, and stand trial. It also includes a chapter focusing on integrating culture and diversity in capacity evaluations with the aim of increasing the practitioner's competence"--

Deinstitutionalization: Promise

and Problems Richard H. Lamb 2001-07-25 Both the scope and effects of deinstitutionalization have been dramatic. This volume examines both positive and negative effects of this mass movement of persons with severe mental illness out of the state hospitals and into the community. The chapters address the following issues: the use of community alternatives to state hospitalization; the very large numbers of persons with severe mental illness who have found their way into the criminal justice system, why this has happened, and what to do about it; the community treatment of mentally ill offenders; how to prevent inappropriate entry of mentally ill persons into the criminal justice system; the value of mental health consultation in courtroom settings; the therapeutic use of mental health conservatorship; and finally, psychiatric rehabilitation. Although deinstitutionalization for the most part can result in a much richer life experience in the

community, much more needs to be done to make that occur. This is the 90th issue of the Jossey-Bass series *New Directions for Mental Health Services*.
